Minimal Data Collection Form for Medical Monitoring Project (MMP)

Medical Monitoring Project (MMP) Minimum Data Set Fields

Public reporting burden of this collection of information is estimated to average 3 minutes per patient record pulled, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: CDC, Project Clearance Officer, 1600 Clifton Road, MS D-24, Atlanta, GA 30333, ATTN: PRA (0920-0740). Do not send the completed form to this address.

Note to interviewers: This information should be obtained for all sampled MMP patients. This information is collected even if there is an interview or a medical record abstraction that has been completed for the patient. These data will be obtained via HARS or EHARS data extraction. A SAS program and an MDS Excel spreadsheet will be supplied by CDC to facilitate the extraction of the following data elements from HARS or eHARS. Please be sure to complete the Excel spreadsheet before you attempt to run the SAS code. All information on the sheet will be generated from the SAS program using the HARS /eHARS data file.
