

Supporting Statement for Department of Veterans Affairs (VA)
Acquisition Regulation (VAAR) Clause 852.211-70,
Service Data Manual,
OMB No. 2900-0587

A. JUSTIFICATION

1. Explain the circumstances that make the collection of information necessary. Identify legal or administrative requirements that necessitate the collection of information.

This Paperwork Reduction Act submission seeks renewal of Office of Management and Budget approval No. 2900-0587 for collections of information for both commercial and non-commercial item, service, and construction solicitations and contracts using clause 852.211-70, Service data manuals. In the original approval, this clause was numbered 852.210-70. The clause number has been changed to 852.211-70 with no other changes.

2. Indicate how, by whom, and for what purposes the information is to be used; indicate actual use the agency has made of the information received from current collection.

VAAR clause 852.211-70, Service Data Manual, is used when VA purchases technical medical equipment and devices or mechanical equipment. The clause requires the contractor to furnish both operator's manuals and maintenance/repair manuals with the equipment provided to the Government. This clause sets forth those requirements and sets forth the minimum standards those manuals must meet to be acceptable. Generally, this is the same operator's manual furnished with each piece of equipment sold to the general public and the same repair manual used by company technicians in repairing the company's equipment. The cost of the manuals is included in the contract price or listed as separately priced line items on the purchase order. The operator's manual will be used by the individual actually operating the equipment to ensure proper operation and cleaning. The repair manual will be used by VA equipment repair staff to repair the equipment.

3. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g. permitting electronic submission of responses, and the basis for the decision for adopting this means of collection. Also describe any consideration of using information technology to reduce burden.

Collection efforts do not involve the use of automation. There are no plans to use information technology to collect this data. The information is specific to each item of equipment and the information must accompany the delivery of the equipment. Offerors are required to provide specific information, unique to the product that they are offering, to show how that product is operated and maintained. However, the information could be furnished on disk or other electronic media.

4. Describe efforts to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purposes described in Item 2 above..

There are no duplicated efforts. Each reporting situation is unique and the data that must be submitted is unique to the product being offered for sale to the Government.

5. If the collection of information impacts small businesses or other small entities, describe any methods used to minimize burden.

There is no significant impact on small businesses.

6. Describe the consequences to Federal program or policy activities if the collection is not conducted or is conducted less frequently as well as any technical or legal obstacles to reducing burden.

Failure to collect the information would have a negative impact on VA. Without the information, VA would be purchasing equipment for which it would not have proper operating instructions. This could be hazardous to VA employees and to VA patients. In addition, without maintenance manuals, VA would be unable to make repairs to the equipment.

7. Explain any special circumstances that would cause an information collection to be conducted more often than quarterly or require respondents to prepare written responses to a collection of information in fewer than 30 days after receipt of it; submit more than an original and two copies of any document; retain records, other than health, medical, government contract, grant-in-aid, or tax records for more than three years; in connection with a statistical survey that is not designed to produce valid and reliable results that can be generalized to the universe of study and require the use of a statistical data classification that has not been reviewed and approved by OMB.

The information is needed for each product offered rather than quarterly. The information is specific to the product offered and unique to that particular solicitation. The information is submitted for each product offered. The time for response is the same as the time for delivery of the equipment, which may be fewer than 30 days, especially for lower dollar value contracts or for commercial items. The information is normally standard company operating and service manuals and does not require any special preparation. For most equipment procurements, two copies of the maintenance manual and two copies of the operating manual will be required. One set will remain with the equipment, while the other set will go to the biomedical engineer/maintenance shop for use in repairing the equipment at that location. When a procurement will result in the initial purchase of a particular make and model of an item of equipment, the purchase order will require the contractor to furnish three additional copies of the operating and maintenance manuals to VA's Service and Reclamation Division for use in maintaining the equipment from that location.

8. a. If applicable, provide a copy and identify the date and page number of publication in the Federal Register of the sponsor's notice, required by 5 CFR 1320.8(d), soliciting comments on the information collection prior to submission to OMB. Summarize public comments received in response to that notice and describe actions taken by the sponsor in responses to these comments. Specifically address comments received on cost and hour burden.

Notice regarding use of this clause in all applicable solicitations was published in the Federal Register on April 15, 2013, at page 44191. There were no comments received.

b. Describe efforts to consult with persons outside the agency to obtain their views on the availability of data, frequency of collection, clarity of instructions and recordkeeping, disclosure or reporting format, and on the data elements to be recorded, disclosed or reported. Explain any circumstances which preclude consultation every three years with representatives of those from whom information is to be obtained.

There were no efforts to consult with persons outside the agency.

9. Explain any decision to provide any payment or gift to respondents, other than remuneration of contractors or grantees.

No payments or gifts will be provided.

10. Describe any assurance of confidentiality provided to respondents and the basis for the assurance in statute, regulation, or agency policy.

No assurances of confidentiality will be provided to respondents. However, should a contractor believe the information is proprietary, VA will agree to protect the material from unauthorized disclosure.

11. Provide additional justification for any questions of a sensitive nature (Information that, with a reasonable degree of medical certainty, is likely to have a serious adverse effect on an individual's mental or physical health if revealed to him or her), such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private; include specific uses to be made of the information, the explanation to be given to persons from whom the information is requested, and any steps to be taken to obtain their consent.

The request for information does not include any questions of a sensitive nature.

12. Estimate of the hour burden of the collection of information:

a. The number of respondents, frequency of responses, annual hour burden, and explanation for each form is reported as follows:

No. of respondents	x No. of responses	x No. of	÷by 60	Number of Burden Hours
3,725	1 per contract awarded	10	XX	621

b. If this request for approval covers more than one form, provide separate hour burden estimates for each form and aggregate the hour burdens in Item 13 of OMB 83-1.

c. Provide estimates of annual cost to respondents for the hour burdens for collections of information. The cost of contracting out or paying outside parties for information collection activities should not be included here. Instead, this cost should be included in Item 14.

Estimated annualized cost: \$9,315 (621 hours at \$15 per hour).

13. Provide an estimate of the total annual cost burden to respondents or record keepers resulting from the collection of information. (Do not include the cost of any hour burden shown in Items 12 and 14).

None

14. Provide estimates of annual cost to the Federal Government. Also, provide a description of the method used to estimate cost, which should include quantification of hours, operation expenses (such as equipment, overhead, printing, and support staff), and any other expense that would not have been incurred without this collection of information. Agencies also may aggregate cost estimates from Items 12, 13, and 14 in a single table.

Estimated annualized cost to the Government: \$6,510 (621 hours at \$10 per hour plus \$300 printing costs). The information is evaluated upon receipt. If acceptable, no further action is required.

15. Explain the reason for any burden hour changes since the last submission.

Burden hours were calculated based on annualized amount of documents created with this clause since 10/1/11.

16. For collections of information whose results will be published, outline plans for tabulation and publication. Address any complex analytical techniques that will be used. Provide the time schedule for the entire project, including beginning and ending dates of the collection of information, completion of report, publication dates, and other actions.

The results will not be published.

17. If seeking approval to omit the expiration date for OMB approval of the information collection, explain the reasons that display would be inappropriate.

This request seeks approval to not display the expiration date for OMB approval. This is an on-going requirement. VA has a continuing need for this information in order to operate and repair equipment purchased. VA expects to continue use of this clause indefinitely and an expiration date would only tend to confuse the public.

18. Explain each exception to the certification statement identified in Item 19, "Certification for Paperwork Reduction Act Submissions," of OMB 83-I.

There are no exceptions.

B. COLLECTIONS OF INFORMATION EMPLOYING STATISTICAL METHODS

Statistical methods will not be employed.
