

**Measurement Development:
Quality of Family-Provider Relationships in Early Care and Education
Parent Consent Form**

Child Trends is doing a research study with parents of infants, toddlers and preschoolers. This is information that we ask you to use in deciding whether or not you want to take part in the study. You will be given a copy of this form to keep for yourself.

1. Goal:

The goal of our study is to develop questions about relationships between parents and those who care for/teach their children. The questions will be used in national surveys, research studies, and program evaluations.

2. What will you need to do:

If you agree to be part of the study, you will be interviewed for about two hours. During the interview, we will ask you about relationships between parents and those that care for/teach their children. We will ask you to:

- Give us your thoughts about the meanings and wording of questions;
- Talk about how clear the questions are;
- Ask about any problems you think parents may have understanding the questions;
- Give ideas about how to word questions; and
- Talk about aspects of relationships between parents and those who care for/teach their children.

3. Risks and Benefits to Participants:

We will not be talking about any sensitive topics so the risks are minimal. However, there is some risk of loss of privacy of the things you tell us. You do not have to answer any questions you do not want to.

There are no costs related to the study other than the time needed to be part of the interview. We cannot be sure that everyone will benefit from being a part of the interview, but talking about this topic with others can be a learning opportunity. And, the results will help us improve questions

about relationships that parents and teachers/caregivers have. To thank you for your time, you will receive \$50 at the end of the interview.

4. Privacy:

Everything you tell us will remain as private as possible. We will combine what you and other tell us. This will help to reduce the chance that anyone can be identified when the study results are described. Only approved study staff will have access to the tape recordings and written notes. The tapes and notes will be kept in a locked file cabinet in a secured office. All computer files will be stored on a secure network.

There are limits to privacy. If someone on the study team feels that keeping information private would result in danger to you or another person, they will have to tell proper agencies to protect you or the other person. The types of information that would not remain private include any reports of the abuse or neglect of a child or any thoughts you may have to hurt yourself or anyone else.

Also, we would like your permission to record your interview so that we do not miss anything you say. We would also like your permission to use specific quotes from your interview in our reports. The quotes will not include any identifying information like names or birth dates. You can still participate in the interview even if you do not give your permission for us to record the interview or for us to use quotes

5. Voluntary Participation:
Your participation in this study is voluntary. That means that you are free to not participate in the interview. Nothing bad will happen because you decide not to be in the study and you are not giving up any rights. If you learned about our study through a program your child is in, your child's participation at that program will not be affected. Also, once we begin, you may end the interview at any time.
