Discussion:

For multi-racial decedents, please check each race identified in source documents (e.g., if the decedent is identified as "white" and "Asian", please check "white" and "Asian"). If source documents indicate "Mulatto," check both "white" and "black". If "Asian/Pacific Islander" is indicated, check both "Asian" and "PacificIsland". These standards were used by the U.S. Census Bureau in the 2010 decennial census.

Decedents should only be indicated as being of "Unspecified" race if their indicated race does not fit into one of the five summary categories (white, black, Asian, Native Hawaiian or Pacific islander, American Indian or Alaska native). The five summary categories are consistent with current OMB and HHS standards:

Also note that HHS includes more granular categories that roll up into the five summary categories (the OMB standard). Please consult the following table to determine if any other specified race can be categorized into one of the five summary race categories:
