

Patient Safety Component—Annual Facility Survey for IRF

Instructions for this form are available at: <http://www.cdc.gov/nhsn/forms/instr/TOI-57.151-IRF.pdf>

Page 1 of 4

*required for saving	Tracking #:
*Facility ID:	*Survey Year:
Facility Characteristics (completed by Infection Preventionist)	
*Ownership (check one):	
<input type="checkbox"/> For profit <input type="checkbox"/> Not for profit, including church <input type="checkbox"/> Government <input type="checkbox"/> Veterans Affairs	
*Affiliation (check one):	
<input type="checkbox"/> Independent <input type="checkbox"/> Multi-facility organization (specialty network) <input type="checkbox"/> Hospital system	
*How would you describe your licensed inpatient rehabilitation facility? (check one)	
<input type="checkbox"/> Free-standing <input type="checkbox"/> Healthcare facility based	
In the previous calendar year, indicate:	
*Total number of beds:	_____
*Average daily census:	_____
*Number of patient days:	_____
*Average length of stay:	_____
*Indicate the number of admissions with the primary diagnosis for each of the following rehabilitation categories (<i>must sum to the total number of admissions listed below</i>)	
a. Traumatic spinal cord dysfunction:	_____
b. Non-traumatic spinal cord dysfunction:	_____
c. Stroke:	_____
d. Brain dysfunction (non-traumatic or traumatic):	_____
e. Other neurologic conditions (e.g. multiple sclerosis, Parkinson's disease, etc):	_____
f. Orthopedic conditions (incl. fracture, joint replacement, other):	_____
g. All other admissions:	_____
*Total number of admissions:	_____
*Number of admissions on a ventilator:	_____
*Number of pediatric (≤ 18 years old) admissions:	_____
Facility Microbiology Laboratory Practices (completed with input from Microbiology Laboratory Lead)	
*1. Does your facility have its own on-site laboratory that performs antimicrobial susceptibility testing?	
<input type="checkbox"/> Yes <input type="checkbox"/> No	
If No, where is your facility's antimicrobial susceptibility testing performed? (check one)	
<input type="checkbox"/> Affiliated medical center <input type="checkbox"/> Commercial referral laboratory <input type="checkbox"/> Other local/regional, non-affiliated reference laboratory

<small>Assurance of Confidentiality: The voluntarily provided information obtained in this surveillance system that would permit identification of any individual or institution is collected with a guarantee that it will be held in strict confidence, will be used only for the purposes stated, and will not otherwise be disclosed or released without the consent of the individual, or the institution in accordance with Sections 304, 306 and 308(d) of the Public Health Service Act (42 USC 242b, 242k, and 242m(d)). Public reporting burden of this collection of information is estimated to average 50 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC, Reports Clearance Officer, 1600 Clifton Rd., MS D-74, Atlanta, GA 30333, ATTN: PRA (0920-0666). CDC 57.151 (Front) Rev. 2, v8.3</small>

Page 2 of 8

Facility Microbiology Laboratory Practices (continued)

*2. Does the laboratory use CLSI (formerly NCCLS) antimicrobial susceptibility standards?

Yes No

If Yes, specify the version of the M100 document that the laboratory uses: M100- S_____

*3. For the following organisms please indicate which methods are used for:

(1) primary susceptibility testing and

(2) secondary, supplemental, or confirmatory testing (if performed).

If your laboratory does not perform susceptibility testing, please indicate the methods used at the outside laboratory.

Please use the testing codes listed below the table.

Pathogen	(1) Primary	(2) Secondary	Comments
<i>Staphylococcus aureus</i>	_____	_____	_____
<i>Enterococcus spp.</i>	_____	_____	_____
Enterobacteriaceae	_____	_____	_____
<i>Pseudomonas aeruginosa</i>	_____	_____	_____
<i>Acinetobacter spp.</i>	_____	_____	_____

1 = Kirby-Bauer disk diffusion	5.1 = MicroScan walkaway rapid	10 = E test
2 = Vitek (Legacy)	5.2 = MicroScan walkaway conventional	12 = Vancomycin agar screen (BHI + vancomycin)
2.1 = Vitek 2	5.3 = MicroScan auto or touchscan	13 = Other (describe in Comments section)
3.1 = BD Phoenix	6 = Other micro-broth dilution method	
4 = Sensititre	7 = Agar dilution method	

*4. Has the laboratory implemented the revised cephalosporin and monobactam breakpoints for Enterobacteriaceae recommended by CLSI as of 2010?

Yes No

*5. Has the laboratory implemented the revised carbapenem breakpoints for Enterobacteriaceae recommended by CLSI as of 2010?

Yes No

*6. Does the laboratory perform a special test for presence of carbapenemase? Yes No

If Yes, please indicate what is done if carbapenemase production is detected: (check one)

Change susceptible carbapenem results to resistant

Report carbapenem MIC results without an interpretation

No changes are made in the interpretation of carbapenems, the test is used for epidemiological or infection control purposes

If Yes, which test is routinely performed to detect carbapenemase: (check all that apply)

PCR

MBL screen

Modified Hodge Test

Carba NP

E test

Other (specify): _____

Facility Microbiology Laboratory Practices (continued)

*7. Does the laboratory perform colistin or polymyxin B susceptibility testing for drug-resistant gram negative bacilli? Yes No

If Yes, please indicate methods: (check all that apply)

- | | | |
|---|--|---|
| <input type="checkbox"/> Vitek (Legacy) | <input type="checkbox"/> MicroScan walkaway rapid | <input type="checkbox"/> Agar dilution method |
| <input type="checkbox"/> Vitek 2 | <input type="checkbox"/> MicroScan walkaway conventional | <input type="checkbox"/> E test |
| <input type="checkbox"/> BD Phoenix | <input type="checkbox"/> MicroScan auto or touchscan | <input type="checkbox"/> Other (specify): _____ |
| <input type="checkbox"/> Sensititre | <input type="checkbox"/> Other micro-broth dilution method | |

*8. Does your facility have its own laboratory that performs antifungal susceptibility testing for *Candida* species?

Yes No

If No, where is your facility's antifungal susceptibility testing performed? (check one)

- | | |
|--|---|
| <input type="checkbox"/> Affiliated medical center | <input type="checkbox"/> Commercial referral laboratory |
| <input type="checkbox"/> Other local/regional, non-affiliated reference laboratory | <input type="checkbox"/> Not offered by my facility |

9. If antifungal susceptibility testing is performed at your facility or an outside laboratory, what methods are used? (check all that apply)

- | | | | |
|--|--|--|---------------------------------|
| <input type="checkbox"/> Broth macrodilution | <input type="checkbox"/> Broth microdilution | <input type="checkbox"/> YeastOne colorimetric microdilution | <input type="checkbox"/> E test |
| <input type="checkbox"/> Vitek 2 card | <input type="checkbox"/> Disk diffusion | <input type="checkbox"/> Other (specify): _____ | |

*10. Is antifungal susceptibility testing performed automatically/reflexively for *Candida* spp. cultured from normally sterile body sites (such as blood), without needing a specific order or request for susceptibility testing from the clinician?

Yes No

If Yes, what antifungal drugs are tested automatically/reflexively? (check all that apply)

- | | | | |
|--------------------------------------|--|---------------------------------------|--------------------------------------|
| <input type="checkbox"/> Fluconazole | <input type="checkbox"/> Itraconazole | <input type="checkbox"/> Voriconazole | <input type="checkbox"/> Caspofungin |
| <input type="checkbox"/> Miconazole | <input type="checkbox"/> Anidulafungin | <input type="checkbox"/> Flucytosine | <input type="checkbox"/> Other |

Page 4 of 8

Facility Microbiology Laboratory Practices (continued)

*11. What is the primary testing method for *C. difficile* used most often by your facility's laboratory or the outside laboratory where your facility's testing is performed? (check one)

- Enzyme immunoassay (EIA) for toxin
- Cell cytotoxicity neutralization assay
- Nucleic acid amplification test (NAAT) (e.g., PCR, LAMP)
- Glutamate dehydrogenase (GDH) antigen plus EIA for toxin (2-step algorithm)
- GDH plus NAAT (2-step algorithm)
- GDH plus EIA for toxin, followed by NAAT for discrepant results
- Toxigenic culture (*C. difficile* culture followed by detection of toxins)
- Other (specify): _____
(“Other” should not be used to name specific laboratories, reference laboratories, or the brand names of *C. difficile* tests; most methods can be categorized accurately by selecting from the options provided. Please ask your laboratory or conduct a search for further guidance on selecting the correct option to report.)

*12. Does your facility produce an antibiogram (i.e., cumulative antimicrobial susceptibility report)?

- Yes No

If Yes, is the antibiogram produced at least annually?

- Yes No

If Yes, are data stratified by hospital location?

- Yes No

If No, please identify any obstacle(s) to producing an antibiogram. (Check all that apply)

- The laboratory data are difficult to access
- Limited or no information technology tool for data analysis
- Limited personnel time for data analysis
- Limited personnel skills for data analysis
- Limited interest in an antibiogram from staff who prescribe antibiotics
- Our institution does not have enough isolates of any or most species (i.e., < 30 isolates per species) to produce an antibiogram
- Other (please specify): _____

Page 5 of 8

Infection Control Practices (completed with input from Hospital Epidemiologist and/or Quality Improvement Coordinator)

- *13. Number of trained or certified infection preventionists (IPs) in facility: _____
- a. Total hours per week performing surveillance: _____
- b. Total hours per week for infection control activities other than surveillance: _____
- *14. Does your facility perform active surveillance testing (culturing) of new patients on admission for colonization with any of the following multi-drug resistant organisms (MDROs)? (check all that apply)
- Methicillin-resistant *Staphylococcus aureus* (MRSA)
 - Vancomycin-resistant *Enterococcus* (VRE)
 - Carbapenem-resistant Enterobacteriaceae (CRE)
 - Other multidrug-resistant gram-negative rods
 - We do not screen new admissions for MDROs
- *15. Does the facility routinely place patients infected or colonized with MRSA in contact precautions? (check one)
- Yes, all infected or colonized patients
 - Yes, only all infected patients
 - Yes, only those with certain characteristics that make them high-risk for transmission (e.g., wounds, diarrhea, presence of an indwelling device)
 - Yes, only those admitted to high-risk settings (e.g., ICU)
 - No
- *16. Does the facility routinely place patients infected or colonized with VRE in contact precautions? (check one)
- Yes, all infected or colonized patients
 - Yes, only all infected patients
 - Yes, only those with certain characteristics that make them high-risk for transmission (e.g., wounds, diarrhea, presence of an indwelling device)
 - Yes, only those admitted to high-risk settings (e.g., ICU)
 - No
- *17. Does the facility routinely place patients infected or colonized with CRE in contact precautions? (check one)
- Yes, all infected or colonized patients
 - Yes, only all infected patients
 - Yes, only those with certain characteristics that make them high-risk for transmission (e.g., wounds, diarrhea, presence of an indwelling device)
 - Yes, only those admitted to high-risk settings (e.g., ICU)
 - No

Patient Safety Component—Annual Facility Survey for IRF

Page 6 of 8

Infection Control Practices (continued)

*18. Does the facility routinely place patients infected or colonized with ESBL-producing or extended spectrum cephalosporin resistant Enterobacteriaceae in contact precautions? (check one)

- Yes, all infected or colonized patients
- Yes, only all infected patients
- Yes, only those with certain characteristics that make them high-risk for transmission (e.g., wounds, diarrhea, presence of an indwelling device)
- Yes, only those admitted to high-risk settings (e.g., ICU)
- No

*19. Does the facility routinely perform screening cultures for CRE?

- Yes
- No

If Yes, in which situations does the facility routinely perform screening cultures for CRE? (check all that apply)

- Surveillance cultures of epidemiologically-linked patients of newly identified CRE patients (e.g., roommates)
- Surveillance cultures at admission of all patients
- Surveillance cultures at admission of high-risk patients (e.g., admitted from LTAC or LTCF)
- Surveillance cultures at admission of patients admitted to high-risk settings (e.g. ICU)
- Other (please specify): _____

*20. Does the facility use chlorhexidine bathing on any patient to prevent transmission of MDROs in your hospital?

- Yes
- No

*21. Are results rapidly communicated (generally within 4 hours) to infection prevention staff and/or clinical staff when MDROs are identified from clinical or screening cultures in the laboratory?

- Yes
- No

If Yes, for which MDROs? (check all that apply)

- MRSA
- VRE
- CRE
- ESBL-producing Enterobacteriaceae
- Other (please specify): _____

*22. When a patient with an MDRO is transferred to another facility, does the facility communicate the patient's MDRO status to the receiving facility at the time of transfer?

- Yes
- No

*23. Among patients with an MDRO admitted to the facility from another healthcare facility, what percentage of the time does the facility receive information from the transferring facility about the patient's MDRO status?

_____ %

Antibiotic Stewardship Practices (completed with input from Physician and Pharmacist Stewardship Champions)

- *24. Does your facility have a written statement of support from leadership that supports efforts to improve antibiotic use (antibiotic stewardship)?
- Yes No
- *25. Is there a leader responsible for outcomes of stewardship activities at your facility?
- Yes No
- If Yes, what is the position of this leader: (check one)
- Physician Pharmacist Other (please specify): _____
- *26. Is there at least one pharmacist responsible for improving antibiotic use at your facility?
- Yes No
- *27. Does your facility provide any salary support for dedicated time for antibiotic stewardship activities?
- Yes No
- *28. Does your facility have a policy that requires prescribers to document in the medical record or during order entry, a dose, duration, and indication for all antibiotics?
- Yes No
- If Yes, has adherence to a documentation policy (dose, duration, and indication) been monitored?
- Yes No
- *29. Does your facility have facility-specific treatment recommendations, based on national guidelines and local susceptibility, to assist with antibiotic selection for common clinical conditions?
- Yes No
- If Yes, has adherence to facility-specific treatment recommendations been monitored?
- Yes No
- *30. Is there a formal procedure for all clinicians to review the appropriateness of all antibiotics at or after 48 hours from the initial orders (e.g. antibiotic time out)?
- Yes No
- *31. Do any specified antibiotic agents need to be approved by a physician or pharmacist prior to dispensing (i.e., pre-authorization) at your facility?
- Yes No
- *32. Does a physician or pharmacist review courses of therapy for specified antibiotic agents and communicate results with prescribers (i.e., audit with feedback) at your facility?
- Yes No

Continued >>

Patient Safety Component—Annual Facility Survey for IRF

Page 8 of 8

Antibiotic Stewardship Practices (continued)

*33. Does your facility monitor antibiotic use (consumption) at the unit, service, and/or facility wide?

Yes No

If Yes, by which metrics? (Check all that apply)

Days of Therapy (DOT)

Purchasing Data

Defined Daily Dose (DDD)

Other (please specify): _____

If Yes, are facility- and/or unit- or service-specific reports on antibiotic use shared with prescribers?

Yes No

*34. Do prescribers ever receive feedback by the stewardship program about how they can improve their antibiotic prescribing?

Yes No

*35. Has your stewardship program provided education to clinicians and other relevant staff on improving antibiotic use?

Yes No
