period 3	Jan 1, 2017 - Dec 31, 2017
period 4	Jan 1, 2018 - Dec 31, 2018
period 5	Jan 1, 2019 - Dec 31, 2019

Now, suppose there is a subaward that performs in support year 1 and does not become active again until support year 4. The subaward can fill out the first two periods of their budget form as follows:

period 1	Jan 1, 2015 - Dec 31, 2015 (dates correspond to prime period 1)
period 2	Jan 1, 2018 - Dec 31, 2018 (dates correspond to prime period 4)

It is not necessary that the budget period numbers between the prime and subaward match; the correlation is reflected in the dates. Do be careful, however, that the dates exactly match what is listed for the period in the prime budget.

Note this approach may cause a validation warning regarding the NIH \$500,000 per year limit on direct costs, therefore you should document in both the cover letter and the subaward budget justification that the subaward is only active for specific periods of the prime. Appropriate NIH staff has access to the cover letter and reviewers have access to the budget justification. This documentation will make the date correlation immediately apparent and will help avoid any confusion.
