The logic below correctly chooses between the question wording of an “In person housing unit respondent”, “Telephone housing unit respondent”, “In person proxy respondent”, and “Telephone proxy respondent”.

- If ATTACTUAL=PV then the “In Person” question wording should be displayed for any screens following the ATTEMPT TYPE screen with alternate question wording indicated in the Questionnaire Content Document.
- If ATTACTUAL=T then the “Telephone” question wording should be displayed for any screens following the ATTEMPT TYPE screen with alternate question wording indicated in the Questionnaire Content Document.
- If RESP_TYPE=HH then the “Housing Unit Respondent” question wording should be displayed for any screens following the ADDRESS screen with alternate question wording indicated in the Questionnaire Content Document.
- If RESP_TYPE=proxy, then the “Proxy Respondent” question wording should be displayed for any screens following the ADDRESS screen with alternate question wording indicated in the Questionnaire Content Document.

Boats, recreational vehicles (RVs), vans, tents, railroad cars, and the like are included only if they are occupied as someone's current place of residence. Excluded from the housing inventory are quarters being used entirely for nonresidential purposes, such as a store or an office, or quarters used for the storage of business supplies or inventory, machinery, or agricultural products.</p> <p>Occupied - A housing unit is classified as occupied if it is the usual place of residence of the person or group of people living in it on census day, even if the usual occupants are temporarily away on vacation or a business trip. The living quarters occupied by staff personnel within any group quarters are separate housing units if they satisfy the housing unit criteria of separateness and direct access; otherwise, they are considered group quarters (not a housing unit). Occupied rooms or suites of rooms in hotels, motels, and similar places are classified as housing units only when occupied by people who consider the hotel as their usual place of residence or have no usual home elsewhere.</p> <p>Vacant - A housing unit is vacant if no one is living in it on census day. Units occupied on census day entirely by persons who have a usual home elsewhere are classified as "vacant." Usual home elsewhere is the place where a person lives and sleeps most of the time. New units not yet occupied are classified as vacant housing units if construction has reached a point where all exterior windows and doors are installed and final usable floors are in place. Help text	<p>Housing Unit: A housing unit may be a house, an apartment, a mobile home, a group of rooms or a single room that is occupied (or, if vacant, intended for occupancy) as separate living quarters. Separate living quarters are those in which the occupants live separately from any other individuals in the building and which have direct access from outside the building or through a common hall. For vacant units, the criteria of separateness and direct access are applied to the intended occupants whenever possible. If that information cannot be obtained, the criteria are applied to the previous occupants.</p> <p>Both occupied and vacant housing units are included in the housing unit inventory. Boats, recreational vehicles (RVs), vans, tents, railroad cars, and the like are included only if they are occupied as someone's current place of residence. Vacant mobile homes are included provided they are intended for occupancy on the site where they stand. Vacant mobile homes on dealers' sales lots, at the factory, or in storage yards are excluded from the housing inventory. Also excluded from the housing inventory are quarters being used entirely for nonresidential purposes, such as a store or an office, or quarters used for the storage of business supplies or inventory, machinery, or agricultural products.</p> <p>Vacant Housing Unit: A housing unit is vacant if no one is living in it on census day. Units occupied on census day entirely by persons who have a usual home elsewhere (UHE) are considered to be temporarily occupied, and are classified as "vacant." UHE is defined as the place where a person lives and sleeps most of the time. The census defines everyone as having only one usual residence.</p> <p>New units not yet occupied are classified as vacant housing units if construction has reached a point where all exterior windows and doors are installed and final usable floors are in place. Vacant units are excluded from the housing inventory if they are open to the elements, that is, the roof, walls, windows, and/or doors no longer protect the interior from the elements. Also, excluded are vacant units with a sign</p>

Help text	Vacant units are subdivided according to their housing market classification as follows: For Rent – These are vacant units offered “for rent,” and vacant units offered either “for rent” or “for sale.” Rented, Not Occupied – These are vacant units rented but not yet occupied, including units where money has been paid or agreed upon, but the renter has not yet moved in. For Sale Only – These are vacant units being offered “for sale only,” including units in cooperatives and condominium projects if the individual units are offered “for sale only.” If units are offered either “for rent” or “for sale” they are included in the “for rent” classification. Sold, Not Occupied – These are vacant units sold but not yet occupied, including units that have been sold recently, but the new owner has not yet moved in. For Seasonal, Recreational, or Occasional Use – These are vacant units used or

Seasonal units include those used for summer or winter sports or recreation, such as beach cottages and hunting cabins. Seasonal units also may include quarters for such workers as herders and loggers. Interval ownership units, sometimes called shared-ownership or time-sharing condominiums, also are included here.</p> <p>For Migrant Workers – These include vacant units intended for occupancy by migratory workers employed in farm work during the crop season. (Work in a cannery, a freezer plant, or a food-processing plant is not farm work.)</p> <p>Other– If a vacant unit does not fall into any of the categories specified above, it is classified as “Other vacant.” For example, this category includes units held for occupancy by a caretaker or janitor, and units held for personal reasons of the owner.</p>

Instructions

Owned by you or someone in this household with a mortgage or loan

Select this response option to describe any house, apartment, or mobile home that has any type of loan secured by real estate. These liens may be called mortgages, deeds of trust, trust deeds, or contracts to purchase. Owner-occupied units with reverse mortgages and home equity loans are considered to be "owned with a mortgage or loan" as are owner-occupied mobile homes with installment loans.

Owned by you or someone in this household free and clear (without a mortgage or loan)

Select this response option to describe owner-occupied properties without any loans secured by real estate.

Rented

Select this response option to describe units where money rent is paid or contracted. 'Continuing care,' sometimes called life care, is a contract between an individual and housing services provider. The contract requires that shelter, usually a house or apartment, and services such as meals or transportation to shopping or recreation, be provided. For these kinds of living arrangements, mark the 'Rented' box.

Occupied without payment of rent

Select this response option if the house or apartment is not owned or being bought by a member of the household and if money rent is not paid or contracted. (For example, a house or apartment that is provided free to a janitor, caretaker, or superintendent in exchange for services.)

Landlord-tenant - Multiple single-family detached homes on one property

You may have an address on your case list that is a single family home which is a guest house (or other separate housing unit) that has another home on the property that is occupied by the owner. If you are interviewing the guest house (or other separate housing unit), it is the tenure of the guest house (or other separate housing unit) in which you are interested. If the respondent at the guest house – or someone on the respondent's behalf - pays rent to the owner, then the answer would be rented; and if neither the respondent at the guest house – nor someone on the respondent's behalf - pays rent to the owner, then the answer would be occupied without payment of rent. If the other house occupied by the owner is on your case list, interview it as well. The answer for this home would be owned with or without a mortgage, depending on what the respondent at this home said.

Landlord-tenant - Duplexes and other small apartment buildings

You may have an address on your case list that is a housing unit within a duplex or other small apartment building in which the owner lives in one of the housing units. It is the tenure of the housing unit/apartment – not the entire building - in which you are interested. So if you are interviewing at a housing unit not occupied by the building owner then the answer will be either rented, if the respondent – or someone on the respondent's behalf - pays rent to the owner, or occupied without payment of rent if neither the respondent – nor someone on the respondent's behalf - pays rent to the owner. If the housing unit/apartment occupied by the owner is on your caselist, the answer would be owned with or without a mortgage, depending on what the building owner said.
