

**Table 1: Annual Respondent Burden and Cost – NSPS for Polymeric Coating of Supporting Subs**

Burden Item	(A)	(B)
	Technical person-hours per occurrence	No. of occurrences per respondent per year
1. Applications	N/A	
2. Surveys and studies	N/A	
3. Reporting requirements		
A. Familiarize with the regulatory requirements <sup>c</sup>	1	1
B. Required activities		
Initial performance test	280	1
Repeat performance test <sup>d</sup>	280	1
Monthly compliance test <sup>e</sup>	90	12
C. Create information	See 3B	
D. Gather existing information	See 3E	
E. Write report		
Notification of construction/ reconstruction	2	1
Notification of actual startup	2	1
Notification of initial performance test	2	1
Notification of VOC use at end of initial year <sup>f</sup>	2	1
Report of performance test	See 3B	
Report of monitoring exceedances and non-compliance periods <sup>g</sup>	16	4
Report of no excess emissions <sup>h</sup>	8	2
Report when 1st projected VOC use exceeds cutoff	2	1
Report when 1st actual 12-month VOC use exceeds cutoff <sup>i</sup>	2	1
Notification of changes <sup>j</sup>	4	1
<b>Subtotal for Reporting Requirements</b>		
4. Recordkeeping requirements		
A. Read instructions	See 3A	
B. Plan activities	See 3B	
C. Implement activities	See 3B	
D. Develop record system	N/A	
E. Time to enter information		
Records of startups, shutdowns, malfunctions, etc. <sup>k</sup>	1.5	25
Records of operating parameters <sup>l</sup>	0.25	350
Records of semiannual projected VOC use estimate <sup>m</sup>	1	2
Records of 12-month actual VOC use <sup>m</sup>	1	12
F. Train personnel	N/A	
G. Audits	N/A	
<b>Subtotal for Recordkeeping Requirements</b>		
<b>TOTAL ANNUAL BURDEN AND COST (rounded) <sup>n</sup></b>		
<b>TOTAL CAPITAL AND O&amp;M COST (rounded) <sup>n</sup></b>		

<b>GRAND TOTAL (rounded) <sup>n</sup></b>		
-------------------------------------------	--	--

**Assumptions:**

- <sup>a</sup> On average, EPA estimates 58 existing plants and 1 new plant per year will be subject to the NSPS over the next 3 years.
- <sup>b</sup> This ICR uses the following labor rates: \$108.28 (technical), \$144.33 (managerial), and \$53.34 (clerical). These rates are :
- <sup>c</sup> This ICR assumes all respondents will have to familiarize with the regulatory requirements each year.
- <sup>d</sup> This ICR assumes 20 percent of initial performance tests must be repeated due to failure ( $5 \times 20\% = 1$ ).
- <sup>e</sup> This ICR assumes one coating line per year will demonstrate compliance by the liquid material balance method, which rec
- <sup>f</sup> This ICR assumes one plant per year will be required to submit this notification.
- <sup>g</sup> This ICR assumes 20 percent of existing and new plants will report monitoring exceedances or non-compliance periods or
- <sup>h</sup> This ICR assumes 80 percent of existing and new plants will report no excess emissions ( $62 \times 80\% = 50$ , after rounding).
- <sup>i</sup> This ICR assumes no coating lines at any existing or new plants will exceed the cutoff value.
- <sup>j</sup> This burden applies to new plants and existing plants that modify or reconstruct coating operations or coating mix prepara
- <sup>k</sup> This ICR assumes there will be one malfunction or shutdown every 2 weeks over 50 weeks per year, or 25 occurrences pe
- <sup>l</sup> This ICR assumes operating parameters will be recorded over 350 days per year.
- <sup>m</sup> This assumes 20 percent of existing and new plants will record VOC use estimates ( $62 \times 20\% = 12$ , after rounding).
- <sup>n</sup> Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.
