TITLE OF INFORMATION COLLECTION: eLearning Student Learning Event Evaluation Survey

PURPOSE: The Defense Security Service (DSS) Center for Development of Security Excellence (CDSE) is required to evaluate education and training activities. The survey is used to collect course user experience data immediately following completion of an eLearning course. This survey will employ a common set of model questions and additional custom questions reflecting the course delivery method. The information collected is used for the purpose of assessing and improving the availability, effectiveness, and usability of training and education services and products. Responses to these surveys are requested online immediately following the completion of a learning event or within a few days of completion via email for some instructor-led classes when online access is not available. Responding is optional. No personally identifiable information is requested. Anonymity of responses is maintained. Responses are aggregated and summarized for reports that are reviewed by CDSE instructors, training program and course developers, and management.

DESCRIPTION OF RESPONDENTS: The respondents to the information collection are individuals who have completed learning events provided by the DSS CDSE. Respondents comprise employees of the Department of Defense, employees of participants in the National Industrial Security Program (NISIP), employees of other Federal Departments and State, and Local Governments, and other users. These surveys are made available to the population of learning event completers, including military personnel, DoD civilian employees, Federal Government civilian employees, and employees of contractors that participate in the NISIP. The estimated response rate is approximately 27%. A small percentage of potential respondents (<1%) includes employees of state and local governments, educational institutions, or employees of foreign governments. Respondents participate because the CDSE solicits their input on training event satisfaction, experience, problems encountered in learning, and suggestions for improvement in order to identify problems, assure quality, and assess effectiveness in meeting training program goals.
