

Appendix G. 4-Poster Deer Treatment Device Acceptability Survey Website

Below is the language for a study specific webpage to be utilized by participants invited to take the Community Tick Control: 4-Poster Deer Treatment Device Survey. This website will be hosted on the Centers for Disease Control and Prevention TickNET website (www.cdc.gov/TickNET/survey). A link to this webpage will be sent to participants in a survey invitation postcard as well as follow-up reminder postcard. Participants can view this webpage if they are concerned about the legitimacy of the study or if they wish to reach the study coordinator for the state in which they reside. This webpage is NOT meant for recruitment purposes

4-Poster Deer Treatment Device Acceptability Survey

The Centers for Disease Control and Prevention (CDC), the New York State Department of Health, and Yale Emerging Infections Program are studying the use of 4-Poster Deer Treatment Devices (or 4-poster devices) to reduce ticks in areas where people live and possibly reduce tickborne diseases. A small number of households in Connecticut and New York have been randomly selected to participate. If your household was selected to participate, you should have received a postcard with information on how to take the survey.

If you received an invitation postcard and have questions, please contact your study coordinator using the below information:

Connecticut Emerging Infections Program
