Partnership Category

Please determine which partnership category is the best fit for you based on the SPP Partnership Requirements. Note that each SPP partnership category has unique requirements. Applying to more than one partnership category will require that you meet requirements of admittance for each partnership category.

Existing Commercial Buildings SPP

SPPs in this partnership category conduct business primarily with clients who have existing commercial buildings. To qualify for partnership, SPPs must have used Portfolio Manager to benchmark at least 10 customer commercial buildings in the last 12 months, and/or served as the primary SPP helping at least one customer building earn the ENERGY STAR label in the last 12 months.

Portfolio Manager Building ID numbers are required to complete this online application process. These ID numbers are located in your [Portfolio Manager account](#). If you do not have this information, do not proceed. You cannot save this application session once you begin.

Industrial SPP

SPPs in this partnership category work with ENERGY STAR Industrial partners to implement energy efficiency projects.

Commercial New Construction SPP (Architecture Firms)

SPPs in this partnership category are comprised of architecture and architecture/engineering firms specializing in commercial new construction.
