Submission Date: August 20, 2020

The Centers for Disease Control and Prevention (CDC), Division of Healthcare Quality Promotion (DHQP) requests a nonmaterial/non-substantive of the currently approved Information Collection Request: “National Healthcare Safety Network (NHSN) Patient Impact Module for Coronavirus (COVID-19) Surveillance in Healthcare Facilities (OMB Control No. 0920-1290).”

CDC is updating the COVID-19 Module, Long Term Care Facility (LTCF): Resident Impact and Facility Capacity form (CDC 57.144) to capture access information related to the rapid point-of-care diagnostic testing devices that have been and continue to be sent to LTCFs across the United States. All nursing homes are expected to have a testing device by Sept. 6th, 2020. The new questions will allow NHSN to assess the impact of the devices in terms of nursing home outcomes among residents and healthcare personnel. We estimate these changes will add an additional five minutes to the total burden for this form.

The previous burden calculated for this entire data collection consisted of 1,393,627 hours. As a result of the changes proposed in this change memo, the new burden will consist of **1,647,976 hours**.

Type of Respondent	Form Name	No. of Respondents	No. Responses per Respondent	Avg. Burden per response (in hrs.)	Total Burden (in hrs.)
LTCF personnel	COVID-19 Module, Long Term Care Facility: Resident Impact and Facility Capacity form	9,782	26	40/60	169,555
Business and financial operations occupations	COVID-19 Module, Long Term Care Facility: Resident Impact and Facility Capacity form	2,446	26	40/60	42,397
State and local health department occupations	COVID-19 Module, Long Term Care Facility: Resident Impact and Facility Capacity form	2,446	26	40/60	42,397
Total form burden					254,349
