Mine Safety and Health Administration
MSHA - Protecting Miners' Safety and Health Since 1978

Contractor ID Request (7000-52)

Step 1: Contractor Information > Step 2: Mailing Address and Contact Information > Step 3: Mine Location and Production Information > Step 4: Summary

Step 1: Contractor Information

NOTE: MSHA does not require independent contractors to have identification numbers as a precondition to bidding for work contracts on mine property. If an independent contractor becomes a successful bidder and if the contract to be performed covers any of the nine types of service or construction listed below, the contractor must obtain an identification number.

- Mine development, including shaft and slope sinking;
- Construction or reconstruction of mine facilities; including building or rebuilding preparation plants and mining equipment, and building additions to existing facilities;
- Demolition of mine facilities;
- Construction of dams;
- Excavation or earthmoving activities involving mobile equipment;
- Equipment installation, such as crushers and mills;
- Equipment service or repair of equipment on mine property for a period exceeding five consecutive days at a particular mine;
- Material handling within mine property; including haulage of coal, ore, refuse, etc., unless for the sole purpose of direct removal from or delivery to mine property;
- Drilling and blasting.
