Attachment 11: Disease-Specific Data

Subsequent tabs in this workbook describe the disease-specific data elements that are requested from each program area.

CDC Priority (Legacy):		Indicates whether the program specifies the field as:
		R - Required - Mandatory for sending the message. If data element is not present, the message will error out.
		P - Preferred - This is an optional variable and there is no requirement to send this information to CDC. However, if this variable is already being collected by the state/territory, or if the state/territory is planning to collect this information because it is deemed important for your own programmatic needs, CDC would like this information sent. CDC preferred variables are the most important of the optional variables to be earmarked for CDC analysis/assessment, even if sent from a small number of states.
		O - Optional - This is an optional variable and there is no requirement to send this information to CDC. This variable is considered nice-to-know if the state/territory already collects this information or is planning to collect this information, but has a lower level of importance to CDC than the preferred classification of optional data elements.

CDC Priority (New):		Indicates whether the program specifies the field as:
		R **- Required** - This data element is **mandatory for sending a message**. If the required data element is not present, the message will be rejected. The required data elements alone are not sufficient for national surveillance purposes
		1**-Priority 1** – Highest priority for reporting. These data elements are **critical** for national surveillance activities. Jurisdiction's **data collection system should be modified to collect Priority 1 data elements.** If this data element is not currently collected and available to send, please discuss with the CDC Program whether you can onboard without that element being available and included in the messages. Some CDC programs may request a plan addressing future inclusion of these data elements, if not able to collect and transmit at onboarding.

		2 **- Priority 2 –** High priority data element that will **support** national surveillance activities. If this data element is not currently collected and available to send, **please plan to update jurisdiction's data collection system**. Some CDC programs may request a plan addressing future inclusion of these data elements, if not able to collect and transmit at onboarding.
		3 - **Priority 3** – Lower priority data element that **should be considered for inclusion in the surveillance system** and case notification. Please send if currently collected in the system.

Label/Short Name	Description
AnimalID	Unique ID for animal submitted for rabies diagnosis
Date Collected	Date animal collected for rabies diagnosis
Species	Species of animal submitted for rabies diagnosis
Sex	Sex of animal
Age	Age category of animal
Vax Status	Rabies vaccination status of animal submitted for rabies diagnosis
Human Exposure	Was there a potential human exposure to the animal submitted
Animal Exposure	Was there a potential domestic animal exposure ot the animal submitted
Latitude	Latitutde of Animal Collection
Longitude	Longitude of animal collection
Address	Street Address of animal collection
City	City of animal collection
County	County of animal collection
State	State of animal collection
ZipCode	Zip Code of animal collection
DFAResult	Results of direct flourescent antibody test
Date DFA	Date tested by DFA
DRIT Result	Results of direct rapid immunohistochemistry test
Date DRIT	Date tested by DRIT
Variant	Rabies virus variant if typed
DateTyped	Date rabies virus typed

Description

Status of the case/event as suspect, probable, confirmed, or not a case per CSTE/CDC/ surveillance case definitions.
How was the case status determined, from "Laboratory Results", "Clinical Presentation", "Epi Link"
State reporting case

States use this field to link NEDSS investigations back to their own state investigations.

Date State Notified
County reporting the case

Date local health department notified

Name of the person who is reporting the case to the CDC. This is the person that CDC should contract in a state if there are questions regarding this case notification.

Phone Number of the person who is reporting the case to the CDC. This is the person that CDC should contract in a state if there are questions regarding this case notification.
Name of the treating health care provider of the subject
Telephone number of the treating health care provider of the subject
MMWR year of report
Event Date (earliest date associated with case)
Event Type from "Date Onset", "Date Diagnosis", "Date State Notified", "Date LHD notified", "Date Laboratory diagnosis"
Subject's current sex
Indicates whether the subject was pregnant at the time of the event.
Birth Date *(mm/yyyy)*
Subject age at time of case investigation
Subject age units at time of case investigation
Country of usual residence
Provide the subject's occupation
Date Onset
County of residence of the subject
Date Diagnosis
Clinical Presentation (Cutaneus, Inhalation, Meningitis, GI/Oroph, Injection)
Was subject hospitalized because of this event?
List the place of final treatment (only to be sent during a bioterrorism event)
Subject's first admission date to the hospital for the condition covered by the investigation.
Was the subject admitted to Intensive Care Unit for any length of time?
Was the subject on mechanical ventilation for any length of time?
Did the subject receive Anthrax anti-toxin?
Did the subject receive raxibacumab?
Clinical outcome of the patient ("Still hospitalized"; "Discharged"; "Died";"Other")
Subject's first discharge date from the hospital for the condition covered by the investigation.

If the subject died from this illness or complications associated with this illness, indicate the date of death
If the subject died, was an autopsy performed?
Name of Laboratory that reported test result.
Date Laboratory diagnosis
Date Sample Received at Lab (accession date).
The date the acute specimen was collected.
The date the convalscent specimen was collected.

The lab test that was run on the specimen
Results expressed as numeric value/quantitative result.
The unit of measure for numeric result value.
Coded qualitative result value (e.g., Positive, Negative).
The organism name as a test result. This element is used when the result was reported as an organism.
Textual result value, used if result is neither numeric nor coded.
The Result Status is the degree of completion of the lab test.
Were specimens or isolates sent to CDC for testing?
The interpretation flag identifies a result that is not typical as well as how it's not typical. Examples: Susceptible, Resistant, Normal, Above upper panic limits, below absolute low.
If participated in a documented exposure event, give the name or location
Participated in exposure response?
Exposure to livestock/ wild mammals/ their body fluids?
Exposure to animal products?
Consumed or contact with undercooked or raw meat?
Gardened or other work with soil?
If yes, was bone meal fertilizer or similar used?
Worked in a clinical or microbiological laboratory?
Exposed to unknown powder?
Handled suspicious mail?
Undiagnosed similar illness in friends, family, coworkers, or other contacts?
Consumed same food/drink as lab-confirmed anthrax case?
Exposed to the same environment, animal, or objects as a lab-confirmed anthrax case?

Contact with illicit drugs?
Received an injection?
Took public transportation?
If Took public transportation is "Yes", what form of transportation did the subject take ("Bus"; "Train";"Light rail"; "Subway"; "Ferry"; "Other")
If the patient took Other form of public transportation, describe
Attended a large gathering *(e.g., concert, sporting event)?*
Attended a place where people congregate *(e.g., shopping mall, relgious services)?*
Traveled out of county, state, or country?

Latitude of suspected exposure location (only to be sent during a bioterrorism event)

Longitude of suspected exposure location (only to be sent during a bioterrorism event)

Was anthrax vaccine received?
If anthrax vaccine received is "Yes", specify what was received from "Post-exposure vaccine (1,2,or 3 doses)", "Partial series of pre-exposure vaccine", "Full series of pre-exposure vaccine"
If anthrax vaccine received is "Yes" specify the number of doses received or vaccination status, from "1", "2", "3", "<5", "Outdated on annual boosters", "Fully updated on annual boosters", "Unknown"
Received Post-Exposure Antibiotics
Antibiotics not taken or discontinued?
If Antibiotics were not taken or were discontinued is "Yes", select the primary reason why they were not taken "Low perceived risk", "Adverse events", "Fear of side effects", "Other", "Unknown"
TBD
TBD
TBD
TBD
Is the Subject a First Responder

What category of vaccine did the subject get

Date last received anthrax vaccine
If received a full series of pre-exposure vaccine, is the subject up-to-date on the annual booster vaccine
If the case patient received post exposure antimicrobials, indicate the antimicrobials received
What was the date that the case patient starting taking antimicrobials

What was the date that the case patient stopped taking antimicrobials

Signs and symptoms associated with Anthrax
Indicator for associated signs and symptoms
TBD
What is the patient's current tobacco smoking status?
State where laboratory is located
TBD
CDC specimen ID number from the 50.34 submission form. Example format (10-digit number): 3000123456.
Was the specimen used for testing collected before antibiotics was taken?

Transferred from Initial Hospital
Antimicrobials given for illness
Antimicrobial Name
Antimicrobial Start Date
Antimicrobial End Date
Number of Days of Treatment
What is the route of antibiotic administration?

Date AIG Given
Date Raxibacumab Given

On vasopressors for any length of time

Suspected primary route of infection at time of evaluation (select all that apply):
List all international destinations (country) traveled during the 14 days prior to illness onset
List all domestic destinations (state) traveled to during the 14 days prior to illness onset
Specify public transportation route (e.g. name/number)
Specify date(s) using public transportation
Indicate the type of exposure the patient had in the 14 days prior to illness onset.
Types of exposure to animal.
If exposure type is Animal contact, specify animal the subject had contact with in the 14 days prior to illness onset. If the subject had contact with multiple animals complete separate repeating groups for each one.
If worked in a clinical, microbiological, or animal research laboratory, specify lab.
If linked to confirmed case or contact with similar illness or sign and symptoms, indicate type of contact.
If linked to confirmed case or contact with similar illness or sign and symptoms, indicate geographic location where contact occurred (e.g. city, country, state).
If subject had contact with illicit drugs, specify the name or type of the drug.
Location name of place or event.
Location address of place or event (e.g. country, city, state, county.)
List all date(s) of event or place attendance.
Specify the name of a place that was routinely visited in the 14 days prior to illness onset, such as a place of worship, volunteer, gym, etc.
List the time period during the day when the place was visited
Date last received anthrax vaccine
Indicates if medication received is for post-exposure or anthrax treatment.
In the past 30 days, how often does the patient take alcoholic drinks?
On the days when the case patient drank, about how many drinks did the case patient drink on average?

If subject was hospitalized, were any of the following procedures or treatments done?

Results from procedures or treatments done in the hospital.
Listing of treatment or medical intervention the subject received for this illness.
Indicate if treatment was administered.

When was CSF collected?

Patient was hospitalized as a result of arboviral illness
Patient died as a result of arboviral infection
Date of death
Patient likely acquired infection due to occupational exposure in a laboratory setting

Patient likely acquired infection due to occupational exposure in a non-laboratory setting
Patient donated blood within 30 days prior to illness onset
Patient received a blood transfusion within 30 days prior to illness onet
Patient donated a solid organ within 30 days prior to illness onset
Patient received a solid organ transplant within 30 days prior to illness onset
Patient was a breastfed infant at time of illness onset
Patient likely acquired infection in utero or perinatal
Patient acquired infection during pregnancy
Patient suffered acute flaccid paralysis
Infection identified through blood donor screening
Date of blood donation
Source of diagnostic testing

Did patient receive medication for fever?
Is patient on immunosuppressive therapy?
Does patient have an immunosuppressive condition?
Description of immunosuppressive condition

Description

Date the case report form (extended variables) was submitted to CDC
Name of treating clinician
Phone number for treating clinician
Was the case-patient symptomatic?
Did the case-patient have any clinical manifestations of babesiosis?
Is the case-patient asplenic?
Why was the case-patient's spleen removed?
Date of splenectomy
Indicate case-patient's signs and symptoms
Did the case-patient have a fever?
If fever was indicated, specify temperature (observation includes units)
If fever was indicated, specify Fahrenheit or Celsius
Did the case-patient have a headache?
Did the case-patient have myalgia?
Did the case-patient have anemia?
Did the case-patient have chills?
Did the case-patient have arthralgia?
Did the case-patient have thrombocytopenia?
Did the case-patient have sweats?
Did the case-patient have nausea?
Did the case-patient have hepatomegaly?
Did the case-patient have splenomegaly?
Did the case-patient have a cough?
Indicate any additional symptoms or clinical manifestations
Select all complications
At the time of diagnosis, was the case-patient immunosuppressed?
If the case-patient reported being immunosuppressed, what was the cause?
If the case-patient was hospitalized, indicate the length in days of the hospitalization.

Was the case-patient's death related to the Babesia infection?
Did the case-patient receive antimicrobial treatment for Babesia infection?
If the case-patient was treated, specify which drugs were administered.
Was the case-patient’s infection transfusion associated?
Was the case-patient a blood donor identified during a transfusion investigation?
In the eight weeks before symptom onset or diagnosis (use earlier date), did the case-patient engage in outdoor activities?
Specify outdoor activities
Indicate case-patient's occupation
In the eight weeks before symptom onset or diagnosis (use earlier date), did the case-patient spend time outdoors in or near wooded or brushy areas?
Does the case-patient have a previous history of babesiosis in the last 12 months (prior to this report)?
Date of previous babesiosis diagnosis
In the eight weeks before symptom onset or diagnosis (use earlier date), did the case-patient notice any tick bites?
When did the tick bite occur (approximate dates accepted)?

Where (geographic location) did the tick bite occur (city, state, country)?
In the eight weeks before symptom onset or diagnosis (use earlier date), did the case-patient travel (check all that apply)?
When did the travel occur?
Where did the case-patient travel (city, state, country)?
Was the case-patient an infant born to a mother who had babesiosis or Babesia infection during pregnancy?
Did the case-patient's mother test positive for babesiosis after delivery?
Did the case-patient's mother test positive for babesiosis before or at the time of delivery?
Date of mother's earliest positive test result
Donors who have been identified as having a Babesia infection through routine blood donor screening (e.g., IND) by the blood collection agency. May or may not be symptomatic.
Did the case-patient donate blood in the 8 weeks prior to onset?
Date of blood donation(s)
Was a transfusion recipient(s) identified for the case-patient's donation?
Did the case-patient receive a blood transfusion in the 8 weeks prior to onset?
Date of blood transfusion(s)
If a blood product was implicated, specify which type of product.
Was a blood donor identified for the case-patient's transfusion?
Did the case-patient donate an organ in the 30 days prior to onset?
Did the case-patient receive an organ in the 30 days prior to onset?
Indicate each test performed (repeat variables as necessary).
Provide the date the specimen was collected
Information on whether the specimen was tested in public health labs or exclusively in commercial laboratories.
Coded qualitative result value (e.g., positive, negative).
Results expressed as numeric value/quantitative result (e.g., titer).
Provide species identified by the laboratory test (if applicable).
Estimated number of infected erythrocytes expressed as a percentage of the total erythrocytes.
Was the diagnosis confirmed at the state public health laboratory?
If exact date of illness onset is not known, provide approximate date (mm/yyyy).
If exact date of death is not known, provide approximate date (mm/yyyy).
Is the date provided an approximation?
Indicate the case classification status (confirmed, probable, suspect, unknown)
In the year before symptom onset or diagnosis, did the subject receive a blood transfusion?
In the year before symptom onset or diagnosis, did the subject donate blood?
Provide the local record ID used for reporting mother's case (DE Identifier "N/A: OBR-3" in the Generic portion of the message). This will be used for linking the reported congenital case to the mother's reported case.

Description

Was botulism laboratory confirmed from patient specimen?
Was C. botulinum/ C. baratii/ or C. butyricum isolated in culture from patient specimen?
Was botulinum toxin confirmed from patient specimen?
If clinical specimen positive, what was its toxin type?
What was the transmission category (e.g., foodborne, wound, infant, other/unknown)?

If food is known or thought to be the source, please specify food type:
If “Other,” please specify other food type:
Was food tested?
The technique or method used to perform the test and obtain the test results.
Examples: Serum Neutralization, Titration, dipstick, test strip, anaerobic culture.
Was food positive for botulism?
If food positive, what was the food item?
If food was positive, what was its toxin type?
If “Other,” please specify other toxin type:
If not foodborne botulism, what was the vehicle/exposure (e.g., black tar heroin)
Does the patient have Other Clinical based Botulism?
Was botulism laboratory confirmed from patient specimen?
If botulism not laboratory confirmed from patient specimen or food, was case epi-linked to a confirmed botulism case?
Space to add in general comments
Name of Laboratory that reported test result.
CLIA (Clinical Laboratory Improvement Act) identifier for the laboratory that performed the test.
Sending system-assigned local ID of the case investigation with which the subject is associated. This field has been added to provide the mapping to the case/investigation to which this lab result is associated. This field should appear exactly as it appears in OBR-3 of the Case Notification.
A laboratory generated number that identifies the test/order instance.
Ordered Test Name is the lab test ordered by the physician. It will always be included in an ELR, but there are many instances in which the user entering manual reports will not have access to this information.
The date the specimen was collected.
This indicates the physical location, of the subject, where the specimen originated.
Examples include: Right Internal Jugular, Left Arm, Buttock, Right Eye, etc.
A laboratory generated number that identifies the specimen related to this test.
The medium from which the specimen originated. Examples include whole blood, saliva, urine, etc.
Specimen details if specimen information entered as text.
Date Sample Received at Lab (accession date).
The date and time the sample was analyzed by the laboratory.
Date result sent from Reporting Laboratory.
The status of the lab report.
The lab test that was run on the specimen.
Results expressed as numeric value/quantitative result.

The unit of measure for numeric result value.
Coded qualitative result value (e.g., Positive, Negative).
The organism name as a test result. This element is used when the result was reported as an organism.
Textual result value, used if result is neither numeric nor coded.
The Result Status is the degree of completion of the lab test.
The interpretation flag identifies a result that is not typical as well as how it's not typical. Examples: Susceptible, Resistant, Normal, Above upper panic limits, below absolute low.
The reference range from value allows the user to enter the value on one end of a expected range of results for the test. This is used mostly for quantitative results.
The reference range to value allows the user to enter the value on the other end of a valid range of results for the test. This is used mostly for quantitative results.
The technique or method used to perform the test and obtain the test results. Examples: Serum Neutralization, Titration, dipstick, test strip, anaerobic culture.
Comments having to do specifically with the lab result test. These are the comments from the NTE segment if the result was originally an Electronic Laboratory Report.

Description

A laboratory generated number that identifies the specimen related to this test.
Date/time the notification was first sent to CDC. This value does not change after the original notification.
Denotes whether the reported case was associated with an identified outbreak.
What is the source of infection from list "naturally-acquired", "lab-aquired", "bioterrorism"
If case outbreak indicator is "Yes", what was the common exposure source, including "Food consumption", "Occupational exposure", "Recreational exposure", "Family", "Close contact", "Sexual contact"
States use this field to link NEDSS investigations back to their own state investigations.

Health care provider name
The local ID of the subject/entity.
Health care provider phone number
Name of the person who is reporting the case to the CDC. This is the person that CDC should contract in a state if there are questions regarding this case notification.

Phone Number of the person who is reporting the case to the CDC. This is the person that CDC should contract in a state if there are questions regarding this case notification.
State of residence of the subject
County of residence of the subject
Subject age at time of case investigation
Subject age units at time of case investigation
Subject's current sex
Indicates whether the subject was pregnant at the time of the event.
Country of Birth
Based on the self-identity of the subject as Hispanic or Latino
Field containing one or more codes that broadly refer to the subject's race(s).

Occupation of the case patient, from list "Animal Research", "Medical Research", "Dairy", "Laboratory", "Wildlife", "Rancher", "Slaughterhouse", "Tannery/rendering", "Veterinarian/Vet Tech", "Lives w/person of with an occupation listed here", "Other"
Status of the case/event as suspect, probable, confirmed, or not a case per CSTE/CDC/ surveillance case definitions.
Stage of disease, inlcuding "Acute", "Subacute", "Chronic", "Unknown"
Did patient have a fever?
Onset date of fatigue
Maximum temperature reported
Specify fahrenheit or celsius
Experienced sweats
Onset date of sweats
Experienced arthralgia?
Onset date of arthralgia

Onset date of arthritis
Experienced meningitis
Onset date of meningitis
Experienced spondylitis
Onset date of spondylitis
Were other symptoms or signs experienced
Describe other symptoms or signs experienced
Details of other symptoms experienced
Was subject hospitalized because of this event?
Subject’s first admission date to the hospital for the condition covered by the investigation.
Subject's first discharge date from the hospital for the condition covered by the investigation.
Did the subject die from this illness or complications of this illness?
If the subject died from this illness or complications associated with this illness, indicate the date of death
Status of treatment at time of case notification ("Currently under treatment", "Completed treatment", "Not treated", "No Response")
treated with doxycycline?
dosage of doxycycline prescribed
days of doxycycline prescribed
treated with rifampin?
dosage of rifampin prescribed
days of rifampin prescribed
treated with streptomycin?
dosage of streptomycin prescribed
days of streptomycin prescribed
treated with other drug 1?
If Other drug 1 is "Yes", list name of the drug

If Other drug 1 is "Yes", list the prescribed dosage of this drug
If Other drug 1 is "Yes", list the prescribed duration of this drug
treated with other drug 2?
If Other drug 2 is "Yes", list name of the drug
If Other drug 2 is "Yes", list the prescribed dosage of this drug
If Other drug 2 is "Yes", list the prescribed duration of this drug
treated with other drug 3?
If Other drug 3 is "Yes", list name of the drug
If Other drug 3 is "Yes", list the prescribed dosage of this drug
If Other drug 3 is "Yes", list the prescribed duration of this drug
In the 6 months prior to illness onset did the subject travel outside of the state of residence?
Location of travel 1
If traveled, departure date to first destination
If traveled, return date from first destination
Location of travel 2
If traveled, departure date to second destination
If traveled, return date from second destination
In the 6 months prior to illness onset, did the subject have animal contact?
Which animal(s) did case patient have contact with birthing products ("Cow", "Pig", "Goat", "Sheep", "Dog", "Deer", "Bison", "Elk", "Other")
Other animal with which case patient had contact with birthing products
Which animal did case patient have contact with skinning/slaughtering ("Cow", "Pig", "Goat", "Sheep", "Dog", "Deer", "Bison", "Elk", "Other")?
If animal skinned/slaughtered is "Other", describe which animal(s) the case patient had contact with
Which animal(s) did case patient hunt, from list "Cow", "Pig", "Goat", "Sheep", "Dog", "Deer", "Bison", "Elk", "Other"
If type of animal hunted is "Other", specify the type(s) of animal(s) hunted
If Type of animal contact is "Other" describe the contact

If Type of animal contact is "Other", which animal did case patient have this type of contact including "Cow", "Pig", "Goat", "Sheep", "Dog", "Deer", "Bison", "Elk", "Other"
If Type of animal contact is "Other" and animal is "Other" which animal did case patient have this type of contact
If case patient had contact with birthing products, who owned the animal ("Case", " Private", " Wild", " Commercial", " Unknown")
Who owned the animal which the case patient had contact with skinning/slaughter ("Case", " Private", " Wild", " Commercial", " Unknown")
Who owned the animal which the case patient had contact with hunting from list "Case", " Private", " Wild", " Commercial", " Unknown"
If animal contact type was "Other", describe who owned the animal from this contact, from list "Case", " Private", " Wild", " Commercial", " Unknown"
In the 6 months prior to illness onset, did the subject consume unpasteurized dairy or undercooked meat?
If the subject consumed unpasteurized milk from which animal(s) "Cow", "Pig", "Goat", "Sheep", "Dog", "Deer", "Bison", "Elk", "Other"
If milk animal source is "Other", describe which animal this milk product was from

Consumed fresh or soft cheese from which animal(s), including "Cow", "Pig", "Goat", "Sheep", "Dog", "Deer", "Bison", "Elk", "Other"
If animal source of cheese is "Other", which animal(s) was the source of cheese
Consumed undercooked meat from which animal(s) "Cow", "Pig", "Goat", "Sheep", "Dog", "Deer", "Bison", "Elk", "Other"
If animal source of meat is "Other", list the animal source(s) from which the case patient consumed meat
If food product is "Other", describe other food consumed
If food product is "Other", select the animal sources of this food from list "Cow", "Pig", "Goat", "Sheep", "Dog", "Deer", "Bison", "Elk", "Other"
If food product and animal are "Other", describe which animal this other food was from
Country milk was from, "U.S.", "Other"
If milk source country is "Other", list country
If milk source country is "Other", list country

Country where the cheese product was from. Notification types include "U.S.", "Other"
If cheese source country is "Other", list country
If cheese source country is "Other", list country
Country meat was from, "U.S.", "Other"
If meat source country is "Other", list country
If meat source country is "Other", list country

Country where the food product was from. Notification types include "U.S.", "Other"
If food source country is "Other", list country
If food source country is "Other", list country
Is this case epi-linked to a laboratory-confirmed case?
Similar illness in contact of the subject?
If epi-link to a laboratory-confirmed case or similar illness in a close contact are "Yes", then select the relationship of the contact ("Household", "Neighbor", "Co-worker", "Other")
If Close Contact is "Other", then describe the relationship of the contact
Was the case patient exposed to Brucella, from the list "Clinical specimen", "Isolate", "Vaccine", "Unknown"
If Brucella exposure is selected, where did exposure occur, from list "Clinical", "Laboratory", "Farm/ranch", "Surgery", "Unknown", "Other"
If location of exposure to Brucella is "Other", specify exposure location
Exposure risk classificaiton ("high", "low", "Unknown")
If case patient was exposed to "Vaccine", choose which vaccine patient was exposed to, from list "S19", "RB51", "Rev1", "Other"
Did the subject receive post exposure prophylaxis?
If the case-patient had a known eposure to Brucella and PEP was not taken, why not, from list "Unaware of exposure", "Unavailable", "Allergic", "Pregnant", "Unknown", "Other"
If no PEP taken reason was "Other", desribe the reason PEP was not taken
Did the patient complete PEP regimen ("Yes","No", "Unknown", "Partial"?
If PEP completed is "Partial", Explain why partial pep was taken
Earliest date reported to state public health system

Name of Laboratory that reported test result.
City location of Laboratory that reported test result.
State Laboratory that reported test result.
Zip code of Laboratory that reported test result.
Received from (e.g., lab name, clinician, etc)
Received from city
Received from state
Date Sample Received at Lab (accession date).
Name of agglutination test used
Acute Total antibody titer
Convalscent Total antibody titer
Based on the acute and covalscent titers for the agglutination test used, what is the result of the paired total antibody titers (e.g., Positive, Negative, Unknown)?
Cut off value of a positive result for the Agglutination test used
Acute IgG agglutination titer
Convalscent IgG agglutination titer
Based on the acute and covalscent titers for the agglutination test used, what is the result of the paired IgG titers (e.g., Positive, Negative, Unknown)?
Name of the ELISA test used
Acute IgG ELISA titer
Convalscent IgG ELISA titer
Based on the acute and covalscent titers for the IgG ELISA test used, what is the result of the paired IgG titers (e.g., Positive, Negative, Unknown)?
Acute IgM ELISA titer
Convalscent IgM ELISA titer
Based on the acute and covalscent titers for the IgM ELISA test used, what is the result of the paired IgM titers (e.g., Positive, Negative, Unknown)?
ELISA test cut off
The date the acute serum specimen was collected.

The date the convalscent serum specimen was collected.

Rose Bengal titer
Result of Rose Bengal test (e.g., Positive, Negative, Unknown)?
Cut off value of a positive result for the Rose Bengal test
Coombs Titer
Result of Coombs test (e.g., Positive, Negative, Unknown)?
Cut off value of a positive result for the Coombs test
Name of other serologic test used 1
Titer or value of other serologic test 1
Result of other serologic test 1 (e.g., Positive, Negative, Unknown)?
Cut off value of a positive result for the Other test used 1
Name of other serologic test used 2
Value of other serologic test 2
Result of other serologic test 2 (e.g., Positive, Negative, Unknown)?
Cut off value of a positive result for the Other test used 2
If PCR was done, select on which specimens it was used ("Blood", "Abscess/wound", "Bone marrow", "CSF", "Other")

Describe the specimen if specimen tested by PCR was "Other"
The date the specimen was collected for PCR
Result of PCR (e.g., Positive, Negative, Unknown)?
What Brucella species were identified as a result of PCR ("abortus", "canis", "melitensis", "suis", "ceti", "inopinata", "microti", "neotomae", "pinnipedalis")
If culture was done, which specimens were used ("Blood", "Abscess/wound", "Bone marrow", "CSF", "Other")
Describe the specimen if specimen tested by culture was "Other"

The date the specimen was collected for culture
Result of culture (e.g., Positive, Negative, Unknown)?
What Brucella species were identified as a result of culture ("abortus", "canis", "melitensis", "suis", "ceti", "inopinata", "microti", "neotomae", "pinnipedalis")
Were specimens collected before antimicrobials were taken
Was the select agent reported to CDC
Did a laboratory exposure occur during manipulation of an isolate?
If a laboratory exposure is "Yes", was it reported?
Were specimens or isolates sent to CDC for testing?
are clinical specimens or isolates still available for further testing?
Clinical presentation associated with the illness being reported
Indicator for associated clinical presentation
The date and time, if available, of onset of clinical presentation
Name of antibiotic administered to subject/patient for this illness
Dose of the antibiotic received
Date the treatment or therapy was started
Prescribed duration (in days) of antibiotic treatment

What type of animal did the patient have contact with, or acquire food products from?

Who owns the animals?
What type of activity was the case/patient engaged in that led to contact with the animal(s)?

Where was the food product acquired?

The duration in which the disease presented
What type of animal-based food product did the patient consume?
If linked to confirmed case or contact with similar illness or signs and symptoms, indicate type of contact.
Did the case/patient know anyone else with a similar illness?
Name of the physician or clinician who diagnosed and/or treated the subject
Phone number of the patient's clinician/provider of care
Were antimicrobials prescribed or administered to the subject for this illness or following an exposure?
Dose units of the antimicrobial prescribed or administered
What was the date that the case patient stopped taking antimicrobials
List all international destination (country) traveled to during six months before symptom onset or diagnosis
List all domestic destination (state) traveled to during six months before symptom onset or diagnosis.

List all intrastate destination (county) traveled to during six months before symptom onset or diagnosis.

Was the specimen for culture collected prior to antimicrobial therapy?

Reason for travel related to current illness

Description

Symptoms and signs associated with illness
Did the case have travel outside of the U.S. in the 10 days before the illness began?
Did the case eat undercooked or raw meat before the illness began?
Did the case eat undercooked or raw poultry before the illness began?
Did the case drink untreated water before the illness began?
Did the case have contact with untreated recreational water before the illness began?
Did the case consume raw milk or unpasteurized dairy before the illness began?

Did the case have contact with pets or farm animals from which Campylobacter species were isolated?

Did the case have contact with another probable or confirmed case of Campylobacteriosis?
Did the case consume or have exposure to a vehicle implicated in an outbreak or a location in which an implicated food vehicle was prepared or eaten?
The identifier used in PulseNet for the whole genome sequenced isolate that corresponds to the reported case
Probable case is laboratory diagnosed
Probable case is epi linked
State lab ID submitted to PulseNet
Domestic destination, state(s) traveled to
International destination or countries the patient traveled to
Date of arrival to travel destination
Date of departure from travel destination
Reason for travel related to current illness

Label/Short Name	Description
Previously Counted Case	Was patient previously counted as a colonization/screening case?
Previously Reported State Case Number	If patient was previously counted as a colonization/screening case or a CP-CRE case, please provide the related case ID(s)
Tracheostomy Tube at Specimen Collection	Did patient have a tracheostomy tube at the time of specimen collection?
Ventilator Use at Specimen Collection	Was patient on a ventilator at the time of specimen collection?
Long-term Care Resident	Did the patient have a stay in a long-term care facility in the 90 days before specimen collection date?
Type of Long-term Care Facility	If patient had a stay in a long-term care facility in the 90 days before specimen collection date, indicate the type of long-term care facility.
Healthcare Outside Resident State	Indicate if the patient received overnight healthcare within the United States, but outside of the patient's resident state in the year prior to the date of specimen collection.
Travel Outside USA Prior to Illness Onset within Program Specific Timeframe	Did the patient travel internationally in the past 1 year from the date of specimen collection?
International Destination(s) of Recent Travel	List the names of the country(ies) outside of the United States the patient traveled to in the year prior to the date of specimen collection, if the patient traveled outside of the United States during that time.
Healthcare Outside USA	Indicate if the patient received overnight healthcare outside of the United States in the year prior to the date of specimen collection.
Country(ies) of Healthcare Outside USA	List the names of the country(ies) outside of the United States where the patient received overnight healthcare in the year prior to the date of specimen collection, if the patient received overnight healthcare outside of the United States during that time.
Type of Location Where Specimen Collected	Indicate the physical location type of the patient when the specimen was collected
County of Facility	County of facility where specimen was collected

State of Facility	State of facility where specimen was collected
Infection with Another MDRO	Does the patient have infection or colonization with another MDRO?
Co-infection Type	If patient has infection or colonization with another MDRO, indicate the MDRO.
State Lab specimen ID	State lab specimen ID
WGS ID Number	NCBI SRA Accession number (SRX#) We would describe this as: The accession number generated by NCBI's Sequence Read Archive when sequence data are uploaded to NCBI. This provides both the sequence data and metadata on how the sample was sequenced.

Label/Short Name	Description
Smoking status	Current smoker (yes, no, unknown)
Source of data for case ascertainment	*Hospital/emergency department *Poison control center * Laboratory report *Death certificate *Provider/medical examiner report
Carboxyhemoglobin (COHb) level	Laboratory test result (%)
Intent	*Intentional *Unintentional
Primary Language	What is the patient's primary language?
Marital Status	What is the patient's current marital status?
Education	Indicate the highest degree or level of school completed at the time of the event.
Poison Control Center Record	Does the patient have a poison control record indicating exposure to carbon monoxide?
Outcome of Poison Control Center Record	If patient has a poison control record, select the outcome identified in the Poison Control Center Record.
Treatment Management Type	If patient has a poison control record, indicate how the care was managed.
Workers Compensation Record	Does the patient have a worker's compensation record with a finding, problem, diagnosis or other indication of exposure to carbon monoxide or carbon monoxide poisoning?
Type of Workers Compensation Claim	Indicate the type of claim if patient has a worker's compensation claim with a finding, problem, diagnosis or other indication of exposure to carbon monoxide or carbon monoxide poisoning.
Fire Related Exposure	Was the carbon monoxide exposure related to a fire?
Power Outage Event	Was the carbon monoxide exposure related to a power outage?
Extreme Weather	Was the carbon monoxide exposure related to an extreme weather event?

Extreme Weather Type	Identify the extreme weather event(s) occurring when the patient was exposed to carbon monoxide.
Warning Announcement	Immediately before or during the extreme weather event, did patient hear or read about any warnings on the danger of carbon monoxide poisoning?
Exposure Source	If patient was physically and temporally associated with a CO-emitting source, specify the source.
Generator Location	If the exposure source is generator, where was it placed while it was running?
Generator Distance	If the exposure source was a generator, how many feet was the generator placed from the (house/attached garage/detached garage or other location of event)?
Carbon Monoxide Alarm Present	Patient was in a location where a carbon monoxide alarm was present.
Carbon Monoxide Alarm Sounded	The carbon monoxide alarm sounded.
Carbon Monoxide Elevated Exposure	Exposure to an elevated level of CO based on a dedicated or multi-gas meter/instrument (e.g., fire department measurement)?
Air Concentration of CO Level (PPM)	Air concentration of CO Level in parts per million (PPM) at exposure site.
Person/Organization Taking CO Reading	If air concentration of CO level was taken, indicate the person or organization taking the CO reading.
Date of Reading	What was the date and time, if known, of the CO reading?
Exposure Site Category	Categorize the location of exposure.
Public Site of Exposure	If a public setting where the exposure occurred, please indicate specific site.
Residential Site of Exposure	If a residential setting where the exposure occurred, please indicate specific site.
Epi-Linked	Patient was present and exposed in the same event as that of a carbon monoxide poisoning case.
Date and Time of Incident	Please provide the date and time, if known, of the carbon monoxide incident.
Address of Establishment Where Exposure Occurred	Street address of the location or establishment where the carbon monoxide exposure occurred. Please provide street, city, county, state, and zip code.
City of Establishment Where Exposure Occurred	City of the location or establishment where the carbon monoxide occurred.

State of Establishment Where Exposure Occurred	State of the location or establishment where the carbon monoxide occurred.
Zip Code of Establishment Where Exposure Occurred	Zip code of the location or establishment where the carbon monoxide occurred.
County of Establishment Where Exposure Occurred	County of the location or establishment where the carbon monoxide occurred.
Event Notes	Description of incident.
Number of Exposed Cases	Total number of exposed persons (including case patient).
Average Number of Cigarettes Smoked per Day	During the past 30 days, please specify the average number of cigarettes smoked per day. There are 20 cigarettes per pack.
Marijuana Smoking Status	Does the patient currently smoke marijuana?
Other Substance	Type of other substance used (e.g., e-cigarette tobacco, e-cigarette THC)
Underlying Condition(s)	Select the patient's preexisting condition(s).
Signs and Symptoms	Signs and symptoms associated with the carbon monoxide exposure or poisoning.
ICD Codes List	ICD Codes in patient's report.
Treatment Provided	Was patient treated for carbon monoxide exposure?
Treatment Type	Specify the treatment type.
Treatment Location	Where did the patient receive treatment?
Treatment Date	Provide the date of treatment.
Occupation Related to Exposure	Is the patient's carbon monoxide exposure related to their current occupation?
Work Site of Exposure	If a work setting where the exposure occurred, please indicate specific site.

Specimen from mother or infant

At the time of cessation of pregnancy, what was the age of the fetus (in weeks)?
Birth State
Mother's Country of Residence

Mother's pre-pregnancy serological test date.

Mother's pre-pregnancy serological test interpretation.
Pregnancy outcome

Number of doses received on or after 1st birthday
Date of last dose prior to illness onset

Description

The date the patient was last evaluated by a healthcare provider
The primary cause of subject's death, as noted on the death certificate
The secondary cause of subject's death, as noted on the death certificate.
Was an autopsy performed on the subject's body?
The final anatomical cause of subject's death
The reason this was not a case of CRS.
The subject's gestational age (in weeks) at birth
The subject's age at the time of diagnosis.
The age units at the time of diagnosis
The subject's birth weight
The subject's birth weight units
Did/does the subject have cataracts?
Did/does the subject have hearing impairment (loss)?
Did the subject have a congenital heart disease?
Did/does the subject have patent ductus arteriosus?
Did/does the subject have peripheral pulmonic stenosis?
Did/does the subject have congenital glaucoma?
Did/does the subject have pigmentary retinopathy?
Did/does the subject have developmental delay or mental retardation?
Did the subject have meningoencephalitis?
Did the subject have microencephaly?
Did the subject have purpura?
Did/does the subject have an enlarged spleen?
Did/does the subject have an enlarged liver?
Did the subject have radiolucent bone disease?
Did the subject have jaundice?
Did/does the subject have low platelets?
Did subject have dermal erythropoisesis?
Did the subject develop other conditions as a complication of this illness?
Please specify the other complication(s) the subject developed, during or as a result of this illness.
Was laboratory testing done for Rubella on this subject?
Epidemiologic interpretation of the type of test(s) performed for this case
Epidemiologic interpretation of the results of the tests performed for this case
The date the lab test was performed
The technique or method used to perform the test and obtain the test results.
Date of specimen collection
The medium from which the specimen originated.
Identifies whether the CRS virus was genotype sequenced
Identifies whether the Rubella virus was genotype sequenced
Were clinical specimens sent to CDC laboratories for genotyping (molecular typing)?

Specimen type sent to CDC for genotyping
The date the specimens were sent to the CDC laboratories for genotyping.
Identifies the genotype sequence of the Rubella virus
Did the mother have a maculopapular rash?

What was the mother's rash onset date?
How many days did the mother's rash being reported in this investigation last?
Did the mother have a fever?
What was the mother's rash onset date?
How many days did the mother's rash being reported in this investigation last?
Did the mother have arthralgia/arthritis?
Did the mother have lymphadenopathy?
Mother's other clinical features of maternal illness
The mother's country of birth
Length of time (in years) the mother has been in the U.S.
The age of the mother when the infant (subject) was delivered
The mother's occupation at time of this conception
Did the mother attend a family planning clinic prior to conception of this infant?
The number of the mother's children less then 18 years of age living in household during this pregnancy
Were any of the mother's children less than 18 years of age immunized with the rubella vaccine?
The number of the mother's children less than 18 years of age immunized with the rubella vaccine
Was prenatal care obtained for this pregnancy?
Date of the first prenatal visit for this pregnancy
Where was the prenatal care for this pregnancy obtained?
Did the mother have serological testing prior to this pregnancy?
Was there a rubella-like illness during this pregnancy?
The month of pregnancy that Rubella-like symptoms appeared
Was Rubella lab testing performed for the mother in conjunction with this pregnancy?

Was the mother diagnosed with Rubella by a physician at time of illness?
If the mother was not diagnosed with Rubella by a physician, then diagnosed by whom?
Was Rubella serologically confirmed (mother) at time of illness?
The date Rubella was serologically confirmed (mother)
The result of the Rubella serological confirmation (mother)
Has the mother ever been reported as a Rubella case?
Did the mother know where she might have been exposed to Rubella?
If the Rubella exposure is unknown, did the mother travel outside the US during the first(1st) trimester of pregnancy?
List any international destinations of recent travel
The date the mother left for all international travel
The date the mother returned to United States from travel
Was the mother directly exposed to a confirmed Rubella case?
The mother's relationship to the confirmed Rubella case
The mother's exposure date to the confirmed rubella case
Has mother given birth in the US previously?
List years in which mother has given birth in US previously
Mother's number of previous pregnancies
Mother's total number of live births
Mother's number of births delivered in U.S.

Was the mother immunized with Rubella vaccine?
Source of mother's Rubella immunization information
Source of mother's Rubella vaccine
The type of vaccine administered, (e.g., Varivax, MMRV). First question of a repeating group of vaccine questions.
Manufacturer of the vaccine. Second question of a repeating group of vaccine questions.
The vaccine lot number of the vaccine administered. Third question of a repeating group of vaccine questions.
The date that the vaccine was administered. Fourth question of a repeating group of vaccine questions.
Sub-classification of disease or condition acquired in the US

Is the specimen from the mother or infant?
If applicable, at the time of cessation of pregnancy, what was the age of the fetus (in weeks)?
State where the subject was born
What is the mother's country of residence?
If pre-pregnancy serological testing was performed, what was the date of mother's pre-pregnancy serological test?
If pre-pregnancy serological testing was performed, what was the interpretation of mother's pre-pregnancy serological test?
What was the outcome of the current pregnancy
The number of vaccine doses against this disease which the mother received on or after their first birthday
Date of mother's last vaccine dose against this disease prior to illness onset

Label/Short Name	Description
RECTYPE	Record type will determine how the record is handled when it arrives at CDC.
UPDATE	Currently not implemented.
STATE	Reporting State FIPS code - (e.g., "06", "13").
YEAR	MMWR Year (2-digits) for which case information reported to CDC.
CASEID	Unique Case ID (numeric only) assigned by the state.
SITE	Location code used by the state to indicate where report originated and who has responsibility for maintaining the record. (NOTE: STD*MIS software substitutes a '#' for the leading 'S' in codes listed).
WEEK	MMWR Week on Surveillance Calendar, i.e., week for which case information reported to CDC.
EVENT	Event (disease) code for the disease being reported.
COUNT	For case records this field will always contain "00001".
COUNTY	FIPS code for reporting county (999=Unknown)
BIRTHDATE	Date of birth of infant in YYYYMMDD format (99999999=Unknown)
AGE	Estimated Gestational Age in weeks - (e.g., "038", "042") (999= Unknown)
AGETYPE	Indicates the units (weeks) for the AGE field.

RACE	Race of Mother.
HISPANIC	Indicator for Mother's Hispanic ethnicity.
EVENTDATE	Date of Report to Health Department in YYMMDD format
DATETYPE	A code describing the type of date provided in EVENTDATE.
CASE STATUS	Recode of Case Classification.
OUTBREAK	Indicates whether the case was associated with an outbreak.

INFOSRCE	Information Source/Provider Codes (from Interview Record if available).
DETECTED	Method of Case Detection (from Interview Record if available).
MZIP	Zip Code for Mother's Residence
MSTATE	FIPS Code for Mother's State of Residence. Code 98 for Mexico and 97 for any other non-USA residence. (999=Unknown)
MCOUNTY	FIPS Code for Mother's County of Residence. Code 998 for Mexico and 997 for any other non-USA residence. (999=Unknown)
MBIRTH	Mother's Date of Birth in YYYYMMDD format. (99999999=Unknown)
MARITAL	Mother's Marital Status.

LMP	Date of Mother's Last Menstrual Period before delivery in YYYYMMDD format. (99999999=Unknown)
PRENATAL	Did mother have prenatal care?
PNCDATE1	Date of mother's first prenatal visit in YYYYMMDD format. (99999999=Unknown)
DATEA	Date of mother’s most recent non-treponemal test in YYYYMMDD format. (99999999=Unknown)
RESULTA	Result of mother’s most recent non-treponemal test.
DATEB	Date of mother’s first non-treponemal test in YYYYMMDD format. (99999999=Unknown)
RESULTB	Result of mother’s first non-treponemal test.
TITER	Titer of mother’s most recent non-treponemal test. (The titer for date b is in columns 214-217).
VITAL	Vital status of infant/child.
DEATHDAT	Date of death of infant/child in YYYYMMDD format.
BIRTHWT	Birthweight in grams (9999=Unknown)
REACSTS	Did infant/child have reactive non-treponemal test for syphilis?
REACDATE	Date of infant/child's first reactive non-treponemal test for syphilis in YYYYMMDD format. (99999999=Unknown)

DARKFLD	Did the infant/child, placenta, or cord have darkfield exam, DFA, or special stains?
XRAYS	Did infant/child have long bone x-rays?
CSFVDRL	Did infant/child have a CSF-VDRL?
TREATED	Was infant/child treated?
CLASS	Case Classification.
ID126	CDC 73.126 form Case ID number (9999999=Unknown)
VERSION	CDC 73.126 Form Version.
TITERB	Titer of mother's first non-treponemal test b.
INFTITER	Titer of infant/child's first reactive non-treponemal test for syphilis.
AMIND	American Indian/Alaskan Native:
ASIAN	Asian:

BLACK	Black:
WHITE	White:
NAHAW	Native Hawaiian or Other Pacific Islander:
RACEOTH	Other Race:
RACEUNK	Unknown Race:
MCOUNTRY	Mother's country of residence. (XX=Unknown)
REACTREP	Did infant/child have reactive treponemal test?
RTDATE	Date of infant/child's reactive treponemal test in YYYYMMDD format. (99999999=Unknown)
STD IMPORT	Was case imported? Was disease acquired elsewhere? Indicates probable location of disease acquisition relative to reporting state values.
GRAVIDA	Number of pregnancies (e.g. 01) (99=Unknown)
PARA	Number of live births (e.g. 03) (99=Unknown)
PNCTRI	Trimester of mother's first prenatal visit.
TESTVISA	Did mother have non-treponemal or treponemal test at first prenatal visit?
TESTVISB	Did mother have non-treponemal or treponemal test at 28-32 weeks gestation?
TESTVISC	Did mother have non-treponemal or treponemal test at delivery?
TREPDTA	Date of mother's first treponemal test in YYYYMMDD format. (99999999=Unknown)

TESTTYPA	Test type of mother's first treponemal test.
TREPRESA	Result of mother's first treponemal test.
TREPDTB	Date of mother's most recent treponemal test in YYYYMMDD format. (99999999=Unknown)
TESTTYPB	Test type of mother's most recent treponemal test.
TREPRESB	Result of mother's most recent treponemal test.
HIVSTAT	What was mother's HIV status during pregnancy?
CLINSTAG	What clinical stage of syphilis did mother have during pregnancy?
SURVSTAG	What surveillance stage of syphilis did mother have during pregnancy?
FIRSTDT	Date of mother's first dose of benzathine penicillin in YYYYMMDD format. (99999999=Unknown)

FIRSTDOS	When did mother receive her first dose of benzathine penicillin?
MOMTX	What was mother's treatment?
RESPAPP2	Did mother have an appropriate serologic response?
CLINNO	No signs/asymptomatic?
CLINLATA	Condyloma lata?
CLINSNUF	Snuffles?
CLINRASH	Syphilitic skin rash?
CLINHEPA	Hepatosplenomegaly?
CLINJUAN	Jaundice/Hepatitis?
CLINPARA	Pseudo paralysis?
CLINEDEM	Edema?
CLINOTH	Other signs of CS?
CLINUNK	Unknown signs of CS?
CSFWBC	Did the infant/child have a CSF WBC count or CSF protein test?
Maternal Local Record ID	
Maternal Notification Reporting Jurisdiction

WGS ID Number

Description

Type of case (i.e., was case identified based on testing of a clinical specimen or screening specimen)
Lab isolate identifier from public health lab for mechanism testing
Phenotypic Test Name (phenotypic methods for carbapenemase production)
Result of Phenotypic test
Test performed to identify carbapenemase (molecular methods for resistance mechanism)
Result of test to identify carbapenemase
County of facility where specimen was collected
State of facility where specimen was collected

Did the patient travel internationally in the past 1 year from the date of specimen collection?

This data element is used to capture the names of the country(ies) outside of the United States the patient traveled to in the year prior to the date of specimen collection, if the patient has traveled outside of the United States during that time.
This data element is used to capture if the patient received healthcare outside of the United States in the year prior to the date of specimen collection.
This data element is used to capture the names of the country(ies) outside of the United States where the patient received healthcare in the year prior to the date of specimen collection, if the patient traveled outside of the United States during that time.
Gene identifier
Was patient previously counted as a colonization/screening case?

If patient was previously counted as colonization/screening case please provide related case ID(s)

NCBI SRA Accession number (SRX#) We would describe this as: The accession number generated by NCBI's Sequence Read Archive when sequence data are uploaded to NCBI. This provides both the sequence data and metadata on how the sample was sequenced.

Description

If contact with animal, then display the following questions

Did patient come in contact with an animal?
Type of animal: (MULTISELECT)
If “Other,” please specify other type of animal:
If “Other Amphibian,” please specify other type of amphibian:
If “Other Reptile,” please specify other type of reptile:
If "Other Mammal," please specify other type of mammal:
Name or Location of Animal Contact:
Did the patient acquire a pet prior to onset of illness?
Applicable incubation period for this illness is
If Patient associated with a day care center:
Attend a day care center?
Work at a day care center?
Live with a day care center attendee?
What type of day care facility?
What is the name of the day care facility?
Is food prepared at this facility?
Does this facility care for diapered persons?
If patient has had Drinking Water exposure, then display the following questions
What is the source of tap water at home?
If “Private Well,” how was the well water treated at home?
If “Other,” specify other source of tap water at home:
What is the source of tap water at school/work?

If “Private Well,” how was the well water treated at school/work?
If “Other,” specify other source of tap water at school/work:

Did patient drink untreated water 14 days prior to onset of illness?

If patient is a Food Handler, then display the following questions
Did patient work as a food handler after onset of illness?
What was the last date worked as a food handler after onset of illness?
Where was patient a food handler?
If patient has had recreational water exposure, then display the following

Was there recreational water exposure in the 14 days prior to illness?

What was the recreational water exposure type? (MULTISELECT)

If "Other," please specify other recreational water exposure type:

If "Swimming Pool," please specify swimming pool type: (MULTISELECT)
If "Other," please specify other swimming pool type:
Name or location of water exposure:
If related cases are associated to this case, then display the following questions

Does the patient know of any similarly ill persons?

If "Yes," did the health department collect contact information about other similarly ill persons and investigate further?
Are there other cases related to this one?
If patient has traveled, then display the following questions
Did the patient travel prior to onset of illness?
Applicable incubation period for this illness is 14 days
What was the purpose of the travel? (MULTISELECT)
If “Other,” please specify other purpose of travel:
Destination 1 Type:
(Domestic) Destination 1:
(International) Destination 1
Mode of Travel: (1)
Date of Arrival: (1)
Date of Departure (1)
Destination 2 Type
(Domestic) Destination 2
(International) Destination 2
Mode of Travel: (2)
Date of Arrival: (2)
Date of Departure (2)
Destination 3 Type:
(Domestic) Destination 3:
(International) Destination 3
Mode of Travel: (3)
Date of Arrival: (3)
Date of Departure (3)
If more than 3 destinations, specify details here:
Name of Laboratory that reported test result.
CLIA (Clinical Laboratory Improvement Act) identifier for the laboratory that performed the test.
Sending system-assigned local ID of the case investigation with which the subject is associated. This field has been added to provide the mapping to the case/investigation to which this lab result is associated. This field should appear exactly as it ap

A laboratory generated number that identifies the test/order instance.
Ordered Test Name is the lab test ordered by the physician. It will always be included in an ELR, but there are many instances in which the user entering manual reports will not have access to this information.
The date the specimen was collected.
This indicates the physical location, of the subject, where the specimen originated. Examples include: Right Internal Jugular, Left Arm, Buttock, Right Eye, etc.
A laboratory generated number that identifies the specimen related to this test.
The medium from which the specimen originated. Examples include whole blood, saliva, urine, etc.
Specimen details if specimen information entered as text.
Date Sample Received at Lab (accession date).

The date and time the sample was analyzed by the laboratory.
Date result sent from Reporting Laboratory.
The status of the lab report.
The lab test that was run on the specimen.
Results expressed as numeric value/quantitative result.
The unit of measure for numeric result value.
Coded qualitative result value.
The organism name as a test result. This element is used when the result was reported as an organism.
Textual result value, used if result is neither numeric nor coded.
The Result Status is the degree of completion of the lab test.
The interpretation flag identifies a result that is not typical as well as how it's not typical. Examples: Susceptible, Resistant, Normal, Above upper panic limits, below absolute low.
The reference range from value allows the user to enter the value on one end of a expected range of results for the test. This is used mostly for quantitative results.
The reference range to value allows the user to enter the value on the other end of a valid range of results for the test. This is used mostly for quantitative results.
The technique or method used to perform the test and obtain the test results. Examples: Serum Neutralization, Titration, dipstick, test strip, anaerobic culture.
Comments having to do specifically with the lab result test. These are the comments from the NTE segment if the result was originally an Electronic Laboratory Report.

Date the isolate was received in state public health laboratory.

Explanation for missing result (e.g., clotting, quantity not sufficient, etc.)
Indicate whether the specimens were genotyped and/or subtyped
If the specimen was sent to the CDC for genotyping, date on which the specimens were sent.
Indicate where Genotype and/or subtype testing was performed
If the specimen was sent for genotype identification, indicate the genotype
If the specimen was sent for subtype idenfication, indicate the subtype
Track Isolate functionality indicator
Patient status at specimen collection

Isolate received in state public health lab

Reason isolate not received
Reason isolate not received (Other)
Date received in state public health lab

State public health lab isolate id number

Case confirmed at state public health lab

What was the result of specimen testing using an antigen-based test (e.g. EIA or lateral flow) at a clinical laboratory?
Name of antigen-based test used at clinical laboratory

Age of case-patient in months if patient is <1yr
Age of case-patient in years
What was the result of specimen testing using an antigen-based test (e.g. EIA or lateral flow) at a state public health laboratory?
Name of antigen-based test used at state public health laboratory
Did the case-patient have bloody diarrhea (self reported) during this illness?
Did the case-patient have diarrhea (self-reported) during this illness?
Date of hospital admission for second hospitalization for this illness
Date of hospital discharge for second hospitalization for this illness
Date case was entered into site's database
Date case-pateint's specimen was received in laboratory for initial testing
Date case report form was completed
Case-patient's specimen collection date
If case-patient patient traveled internationally, date of departure from the U.S.
If case-patient traveled internationally, date of return to the U.S.
CDC FDOSS outbreak ID number
Did the case-patient have fever (self-reported) during this illness?
If case-patient was hospitalized, was s/he transferred to another hospital?
Did case-patient immigrate to the U.S.? (within 15 days of illness onset)
Was the case-patient interviewed by public health (i.e. state or local health department) ?
Name of submitting laboratory
Case-patient's medical record number
What was the result of specimen testing using another test at CDC?
What was the result of specimen testing using another test at a clinical laboratory?

Name of other test used at a clinical laboratory
What was the result of specimen testing using another test at a state public health laboratory?
Name of other test used at a state public health laboratory
Type of outbreak that the case-patient was part of
Case-patient identification number
What was the result of specimen testing for diagnosis using PCR at CDC? (Do not enter PCR results if PCR was performed for speciation or subtyping).
What was the result of specimen testing using PCR at a clinical laboratory? (where goal of testing is primary detection not subtyping or speciation)
Name of PCR assay used
What was the result of specimen testing for diagnosis using PCR at the state public health laboratory? (Do not enter PCR results if PCR was performed for speciation or subtyping).
Unique identification number for person or patient
Unique identifier for laboratory result
Is all of the information for this case complete?
Was specimen or isolate forwarded to CDC for testing or confirmation?
State lab identification number
What was the species result at clinical lab?
What was the species result at SPHL?
Case patient's specimen collection source

Was the isolate sent to a state public health laboratory? (Answer 'Yes' if it was sent to any state lab, even if it was sent to a lab outside of the case's state of residence)

If case-patient traveled internationally, to where did they travel?
Did the case patient travel internationally? (within 15 days of onset)
If the epidemiologic exposure window used by the jurisdiction is different from that stated in the exposure questions, specify the time interval in days here. Otherwise, leave blank.
Unique CryptoNet ID (formed by concatenating [Case Year]-[State Lab ID]-[Specimen Type]-[Reporting State]-[Reporting Country]) where Specimen Type is: ES for Environmental, HS for Human, or AS for Animal.
Whole Genome Sequencing (WGS) ID Number
Domestic destination, state(s) traveled to
International destination or countries the patient traveled to

Date of arrival to travel destination

Date of departure from travel destination

Reason for travel related to current illness

Description

Was fresh cabbage consumed in the 14 days prior to onset of illness?
Interview Status
Travel Destination Type
Travel Mode
Purpose of Travel
Departure Date
Arrival Date
FIPS code assigned to city/state/country
Name of city/state/country
Does the patient know of any similarly ill persons?

Did the patient have diarrhea?
If "Yes," please specify maximum number of stools per 24 hours:
Did patient experience weight loss?
If “Yes,” please specify baseline weight:
specify baseline weight in lbs or kgs
Specify how much weight was lost:
Specify weight loss in lbs or kgs
Did patient have a fever?
If "Yes," please specify temperature (observation includes units)
Specify temperature in fahrenheit or centigrade
Did the patient have any of the following signs or symptoms of Cyclosporiasis? (MULTISELECT)
If “Other,” please specify other signs or symptoms of Cyclosporiasis:
Was the case confirmed at the CDC lab?
Was the patient treated for Cyclosporiasis?
Does the patient have a sulfa allergy?
What fresh berries were eaten in the 14 days prior to onset of illness? (MULTISELECT)

If “Other,” please specify other type of fresh berries:
What fresh herbs were eaten in the 14 days prior to onset of illness? (MULTISELECT)

If “Other,” please specify other type of fresh herbs:
What fresh lettuce was eaten in the 14 days prior to onset of illness? (MULTISELECT)

If “Other,” please specify other type of fresh lettuce:
What other types of fresh produce were eaten in the 14 days prior to onset of illness? (MULTISELECT)
If “Other,” please specify other type of fresh produce:
If "Fruit, other than berries," please specify type of fruit other than berries:
Did patient attend any events in the 14 days prior to onset of illness?

If “Yes,” please specify the event:
Date of event:
Did patient eat at restaurant(s) in the 14 days prior to onset of illness?

If “Yes,” please specify the name of the restaurant(s):
Name of Laboratory that reported test result.
CLIA (Clinical Laboratory Improvement Act) identifier for the laboratory that performed the test.
Sending system-assigned local ID of the case investigation with which the subject is associated. This field has been added to provide the mapping to the case/investigation to which this lab result is associated. This field should appear exactly as it appears in OBR-3 of the Case Notification.
A laboratory generated number that identifies the test/order instance.
Ordered Test Name is the lab test ordered by the physician. It will always be included in an ELR, but there are many instances in which the user entering manual reports will not have access to this information.
The date the specimen was collected.
This indicates the physical location, of the subject, where the specimen originated. Examples include: Right Internal Jugular, Left Arm, Buttock, Right Eye, etc.
A laboratory generated number that identifies the specimen related to this test.
The medium from which the specimen originated. Examples include whole blood, saliva, urine, etc.
Specimen details if specimen information entered as text.
Date Sample Received at Lab (accession date).
The date and time the sample was analyzed by the laboratory.
Date result sent from Reporting Laboratory.
The status of the lab report.
The lab test that was run on the specimen.
Results expressed as numeric value/quantitative result.
The unit of measure for numeric result value.
Coded qualitative result value (e.g., Positive, Negative).
The organism name as a test result. This element is used when the result was reported as an organism.
Textual result value, used if result is neither numeric nor coded.
The Result Status is the degree of completion of the lab test.
The interpretation flag identifies a result that is not typical as well as how it's not typical. Examples: Susceptible, Resistant, Normal, Above upper panic limits, below absolute low.
The reference range from value allows the user to enter the value on one end of a expected range of results for the test. This is used mostly for quantitative results.
The reference range to value allows the user to enter the value on the other end of a valid range of results for the test. This is used mostly for quantitative results.
The technique or method used to perform the test and obtain the test results. Examples: Serum Neutralization, Titration, dipstick, test strip, anaerobic culture.
Comments having to do specifically with the lab result test. These are the comments from the NTE segment if the result was originally an Electronic Laboratory Report.

Date the isolate was received in state public health laboratory.

Explanation for missing result (e.g., clotting, quantity not sufficient, etc.)
Indicate whether the specimens were sent to CDC for genotyping.

If the specimen was sent to the CDC for genotyping, date on which the specimens were sent.
Indicate whether the specimen was sent for strain identification.
If the specimen was sent for strain identification, indicate the strain.
Track Isolate functionality indicator
Patient status at specimen collection

Isolate received in state public health lab

Reason isolate not received
Reason isolate not received (Other)
Date received in state public health lab

State public health lab isolate id number

Case confirmed at state public health lab

What was the result of specimen testing using an antigen-based test (e.g. EIA or lateral flow) at a clinical laboratory?
Name of antigen-based test used at clinical laboratory
Age of case-patient in months if patient is <1yr
Age of case-patient in years
What was the result of specimen testing using an antigen-based test (e.g. EIA or lateral flow) at a state public health laboratory? Results from rapid card testing or EIA would be entered here.
Name of antigen-based test used at state public health laboratory
Did the case-patient have bloody diarrhea (self reported) during this illness?
Did the case-patient have diarrhea (self-reported) during this illness?
Date of hospital admission for second hospitalization for this illness
Date of hospital discharge for second hospitalization for this illness
Date case was entered into site's database
Date case-pateint's specimen was received in laboratory for initial testing
Date case report form was completed
Case-patient's specimen collection date
If case-patient patient traveled internationally, date of departure from the U.S.
If case-patient traveled internationally, date of return to the U.S.
CDC FDOSS outbreak ID number
Did the case-patient have fever (self-reported) during this illness?
If case-patient was hospitalized, was s/he transferred to another hospital?
Did case-patient immigrate to the U.S.? (within 15 days of illness onset)
Was the case-patient interviewed by public health (i.e. state or local health department) ?
Name of submitting laboratory
Ccase-patient's medical record number
For other pathogens: What was the result of specimen testing using another test at CDC? Results from DFA, IFA or other tests would be entered here.
What was the result of specimen testing using another test at a clinical laboratory? Results from DFA, IFA or other tests would be entered here.

Name of other test used at a clinical laboratory
What was the result of specimen testing using another test at a state public health laboratory? Results from DFA, IFA or other tests would be entered here.
Name of other test used at a state public health laboratory
Type of outbreak that the case-patient was part of
Case-patient identification number
What was the result of specimen testing for diagnosis using PCR at CDC? (Do not enter PCR results if PCR was performed for speciation or subtyping).
What was the result of specimen testing using PCR at a clinical laboratory? (where goal of testing is primary detection not subtyping or speciation)
Name of PCR assay used
What was the result of specimen testing for diagnosis using PCR at the state public health laboratory? (Do not enter PCR results if PCR was performed for speciation or subtyping).
Unique identification number for person or patient
Unique identifier for laboratory result
Is all of the information for this case complete?
Was specimen or isolate forwarded to CDC for testing or confirmation?
State lab identification number
Case patient's specimen collection source
Was the isolate sent to a state public health laboratory? (Answer 'Yes' if it was sent to any state lab, even if it was sent to a lab outside of the case's state of residence)

If case-patient traveled internationally, to where did they travel?
Did the case patient travel internationally? (within 15 days of onset)
In the two weeks before onset of illness, did the case-patient travel out of their state or US?
Domestic destination or state(s) the case-patient traveled to in the two weeks before onset of illness
What treatment did the case-patient receive?
Performing laboratory type
If other non-Cyclospora organism(s) identified from stool specimen(s), indicate the organism
If the travel exposure window used by the jurisdiction is different from that stated in the travel exposure questions, specify the time interval in days here. Otherwise, leave blank.
Did the case patient travel domestically within program specific timeframe?

If the epidemiologic exposure window used by the jurisdiction is different from that stated in the exposure questions, specify the time interval in days here. Otherwise, leave blank.
Reason for travel related to current illness

Did/does the patient have voice change?
Did/does the patienthave weakness?
Did/does the patient have fatique?
Did/does the patient have any other symptoms?
Did/does the patient have soft tissue swelling?
Did/does the patient have neck edema?
If neck edema, was it bilateral, left side only, or right side only?
If neck edema, extent of the neck edema
Did/does the patient have stridor?
Did/does the patient have wheezing?
Did/does the patient have weakness?
Did/does the patient have tachycardia?
Did/does the patient have EKG abnormalities?
Did/does the patient have complications due to this illness?
Did/does the patient have airway obstruction as a complication of this illness?
Patient's onset date for airway obstruction
Was intubation of the patient required?
Did/does the patient have myocarditis as a complication of this illness?
Patient's onset date for myocarditis
Did/does the patient have (poly)neuritis as a complication of this illness?
Patient's onset date for (poly)neuritis
Did/does the patient experience any other complications due to this illness?
Description of other complications due to this illness.
Was a specimen for diphtheria culture obtained?
If yes, date culture specimen obtained
What is the result for culture specimen?
Specify laboratory performing culture

If culture result positive, specify biotype
If culture positive, what is the result of toxigenicity testing?
Was a specimen sent to the CDC Diphtheria Lab for confirmation/molecular typing?

Indicate type of specimen sent to CDC
Was a serum specimen for diphtheria antitoxin antibodies obtained?
Specify the PCR result
Was patient treated with antibiotics?
Did patient receive treatment as an outpatient?
If yes, what is the date outpatient treatment initiated?
What antibiotic did the patient receive?
What was the duration of therapy (in days)?
Was antibiotic therapy obtained in a hospital?
Did patient receive treatment as an inpatient?
What antibiotic did the patient receive?
What was the duration of therapy (in days)?
Did patient receive antibiotics in the 24 hours before culture specimen taken?
What is patient's country of residence?
If other than US, what is the country?
What is the date of patient's arrivaal in the US?
Did patient have history of international travel 2 weeks prior to symptom onset?
What country(s) were visited?
Date the patient left for international travel
Date the patient returned from international travel
Did patient have history of interstate travel 2 weeks prior to symptom onset?
What state(s) were visited?
Date the patient left for interstate travel
Date the patient returned from intestate travel
Was patient exposed to a known case or carrier of diphtheria?
Did the patient have a known exposure to any international travelers?

Did the patient have a known exposure to any immigrants?
Units of DAT administered
What was the final clinical diagnosis for this patient?
How was the final diagnosis confirmed?

Description

If contact with animal, then display the following questions

Did patient come in contact with an animal?
Type of animal: (MULTISELECT)
If “Other,” please specify other type of animal:
If “Other Amphibian,” please specify other type of amphibian:
If “Other Reptile,” please specify other type of reptile:
If "Other Mammal," please specify other type of mammal:
Name or Location of Animal Contact:
Did the patient acquire a pet prior to onset of illness?
Applicable incubation period for this illness is
If Patient associated with a day care center:
Attend a day care center?
Work at a day care center?
Live with a day care center attendee?
What type of day care facility?
What is the name of the day care facility?
Is food prepared at this facility?
Does this facility care for diapered persons?
If patient has had Drinking Water exposure, then display the following questions
What is the source of tap water at home?
If “Private Well,” how was the well water treated at home?
If “Other,” specify other source of tap water at home:
What is the source of tap water at school/work?

If “Private Well,” how was the well water treated at school/work?
If “Other,” specify other source of tap water at school/work:

Did patient drink untreated water 14 days prior to onset of illness?

If patient is a Food Handler, then display the following questions
Did patient work as a food handler after onset of illness?
What was the last date worked as a food handler after onset of illness?
Where was patient a food handler?
If patient has had recreational water exposure, then display the following

Was there recreational water exposure in the 14 days prior to illness?

What was the recreational water exposure type? (MULTISELECT)

If "Other," please specify other recreational water exposure type:

If "Swimming Pool," please specify swimming pool type: (MULTISELECT)
If "Other," please specify other swimming pool type:
Name or location of water exposure:
If related cases are associated to this case, then display the following questions

Does the patient know of any similarly ill persons?

If "Yes," did the health department collect contact information about other similarly ill persons and investigate further?
Are there other cases related to this one?
If patient has traveled, then display the following questions
Did the patient travel prior to onset of illness?
Applicable incubation period for this illness is 14 days
What was the purpose of the travel? (MULTISELECT)
If “Other,” please specify other purpose of travel:
Destination 1 Type:
(Domestic) Destination 1:
(International) Destination 1
Mode of Travel: (1)
Date of Arrival: (1)
Date of Departure (1)
Destination 2 Type
(Domestic) Destination 2
(International) Destination 2
Mode of Travel: (2)
Date of Arrival: (2)
Date of Departure (2)
Destination 3 Type:
(Domestic) Destination 3:
(International) Destination 3
Mode of Travel: (3)
Date of Arrival: (3)
Date of Departure (3)
If more than 3 destinations, specify details here:
Name of Laboratory that reported test result.
CLIA (Clinical Laboratory Improvement Act) identifier for the laboratory that performed the test.
Sending system-assigned local ID of the case investigation with which the subject is associated. This field has been added to provide the mapping to the case/investigation to which this lab result is associated. This field should appear exactly as it ap

A laboratory generated number that identifies the test/order instance.
Ordered Test Name is the lab test ordered by the physician. It will always be included in an ELR, but there are many instances in which the user entering manual reports will not have access to this information.
The date the specimen was collected.
This indicates the physical location, of the subject, where the specimen originated. Examples include: Right Internal Jugular, Left Arm, Buttock, Right Eye, etc.
A laboratory generated number that identifies the specimen related to this test.
The medium from which the specimen originated. Examples include whole blood, saliva, urine, etc.
Specimen details if specimen information entered as text.
Date Sample Received at Lab (accession date).

The date and time the sample was analyzed by the laboratory.
Date result sent from Reporting Laboratory.
The status of the lab report.
The lab test that was run on the specimen.
Results expressed as numeric value/quantitative result.
The unit of measure for numeric result value.
Coded qualitative result value.
The organism name as a test result. This element is used when the result was reported as an organism.
Textual result value, used if result is neither numeric nor coded.
The Result Status is the degree of completion of the lab test.
The interpretation flag identifies a result that is not typical as well as how it's not typical. Examples: Susceptible, Resistant, Normal, Above upper panic limits, below absolute low.
The reference range from value allows the user to enter the value on one end of a expected range of results for the test. This is used mostly for quantitative results.
The reference range to value allows the user to enter the value on the other end of a valid range of results for the test. This is used mostly for quantitative results.
The technique or method used to perform the test and obtain the test results. Examples: Serum Neutralization, Titration, dipstick, test strip, anaerobic culture.
Comments having to do specifically with the lab result test. These are the comments from the NTE segment if the result was originally an Electronic Laboratory Report.

Date the isolate was received in state public health laboratory.

Explanation for missing result (e.g., clotting, quantity not sufficient, etc.)
Indicate whether the specimens were genotyped and/or subtyped
If the specimen was sent to the CDC for genotyping, date on which the specimens were sent.
Indicate where Genotype and/or subtype testing was performed
If the specimen was sent for genotype identification, indicate the genotype
If the specimen was sent for subtype idenfication, indicate the subtype
Track Isolate functionality indicator
Patient status at specimen collection

Isolate received in state public health lab

Reason isolate not received
Reason isolate not received (Other)
Date received in state public health lab

State public health lab isolate id number

Case confirmed at state public health lab

What was the result of specimen testing using an antigen-based test (e.g. EIA or lateral flow) at a clinical laboratory?
Name of antigen-based test used at clinical laboratory

Age of case-patient in months if patient is <1yr
Age of case-patient in years
What was the result of specimen testing using an antigen-based test (e.g. EIA or lateral flow) at a state public health laboratory?
Name of antigen-based test used at state public health laboratory
Did the case-patient have bloody diarrhea (self reported) during this illness?
Did the case-patient have diarrhea (self-reported) during this illness?
Date of hospital admission for second hospitalization for this illness
Date of hospital discharge for second hospitalization for this illness
Date case was entered into site's database
Date case-pateint's specimen was received in laboratory for initial testing
Date case report form was completed
Case-patient's specimen collection date
If case-patient patient traveled internationally, date of departure from the U.S.
If case-patient traveled internationally, date of return to the U.S.
CDC FDOSS outbreak ID number
Did the case-patient have fever (self-reported) during this illness?
If case-patient was hospitalized, was s/he transferred to another hospital?
Did case-patient immigrate to the U.S.? (within 15 days of illness onset)
Was the case-patient interviewed by public health (i.e. state or local health department) ?
Name of submitting laboratory
Case-patient's medical record number
What was the result of specimen testing using another test at CDC?
What was the result of specimen testing using another test at a clinical laboratory?

Name of other test used at a clinical laboratory
What was the result of specimen testing using another test at a state public health laboratory?
Name of other test used at a state public health laboratory
Type of outbreak that the case-patient was part of
Case-patient identification number
What was the result of specimen testing for diagnosis using PCR at CDC? (Do not enter PCR results if PCR was performed for speciation or subtyping).
What was the result of specimen testing using PCR at a clinical laboratory? (where goal of testing is primary detection not subtyping or speciation)
Name of PCR assay used
What was the result of specimen testing for diagnosis using PCR at the state public health laboratory? (Do not enter PCR results if PCR was performed for speciation or subtyping).
Unique identification number for person or patient
Unique identifier for laboratory result
Is all of the information for this case complete?
Was specimen or isolate forwarded to CDC for testing or confirmation?
State lab identification number
What was the species result at clinical lab?
What was the species result at SPHL?
Case patient's specimen collection source

Was the isolate sent to a state public health laboratory? (Answer 'Yes' if it was sent to any state lab, even if it was sent to a lab outside of the case's state of residence)

If case-patient traveled internationally, to where did they travel?
Did the case patient travel internationally? (within 15 days of onset)

Susceptibility Test

Description

If <6 years of age, is the patient in daycare?
Name of the daycare facility.
Does the patient reside in a nursing home or other chronic care facility?
Name of the nursing home or chronic care facility.
Types of infection that are caused by the organism. This is a multi-select field.
Other infection that is caused by the organism.
Bacterial species that was isolated from any normally sterile site.
Other bacterial species that was isolated from any normally sterile site.
Sterile sites from which the organism was isolated. This is a multi-select field.
Other sterile site from which the organism was isolated.
Date the first positive culture was obtained. (This is considered diagnosis date.)
Nonsterile sites from which the organism was isolated. This is a multi-select field.
Did the patient have any underlying conditions?
Underlying conditions that the subject has. This is a multi-select field.
Other malignancy that the subject had as an underlying condition.
Detail of the organ transplant that the subject had as an underlying condition.
Other prior illness that the subject had as an underlying condition.
Another Bacterial Species not listed in the Other Bacterial Species drop-down list.
Internal Body Site where the organism was located.
Other prior illness that the subject had as an underlying condition.
Other prior illness that the subject had as an underlying condition.
Other nonsterile site from which the organism was isolated.
Patient's type of insurance (multi-selection).
Patient's other type of insurance.
Weight of the patient in pounds.
Weight of the patient in ounces.
Weight of the patient in kilograms.
Height of the patient in feet.
Height of the patient in inches.
Height of the patient in centimeters.
Indicator that the weight of the patient is unknown.
Indicator that the height of the patient is unknown.
Serotype of the culture.
If <15 years of age and serotype is 'b' or 'unk', did the patient receive Haemophilus Influenzae b vaccine?
Type of medical insurance the family has.
Other medical insurance type.
Is there a known previous contact with Hib disease within the preceding two months?

Type of previous contact with Hib disease within the preceding two months.
Patient's significant past medical history.
Number of weeks of a preterm birth (less than 37 weeks).
Specify immunosupression/HIV.
Specify other prior condition.
Is acute serum available?
Date of acute serum availability.

Is convalescent serum available?
Date of convalescent serum availability.
Person's country of birth.
Another serotype not included in the serotype dropdown list.
Indicator whether the patient was less than 15 years of age at the time of first positive culture.
Types of infection caused by organism
At the time of first positive culture, was the patient pregnant or postpartum? (The postpartum period is defined as the 30 days following a delivery or miscarriage)
If pregnant or postpartum, what was the outcome of fetus?
If patient <1 month of age, indicate gestational age (in weeks)
If patient <1 month of age, indicate birth weight
Birth Weight Units
Is there a known previous contact(s) with Hib disease within the preceding two months?
Type of previous contact(s) with Hib disease within the preceding two months.
Did patient have known previous contact(s) with a non-b or nontypeable case of H. influenzae disease within the preceding 2 months?
Specify type of contact(s) with non-b or nontypeable case of H. influenzae

this case have recurrent disease with the same pathogen? (For Streptococcus pneumoniae, the specimen from the current case must have been isolated 8 or more days after any previous case due to the same pathogen. For all other pathogens, the specimen from the current case must have been isolated 30 or more days after any previous case due to the same pathogen.)
StateID of 1st occurrence for this pathogen and person.
Case Report Form Status
Illness onset age
Illness onset age units
Where was the patient a resident at time of initial culture?
Premature at birth (for children ≤2 years old)
Is this case epi-linked to a laboratory-confirmed case?

ABCs case?
ABCs State ID
Was laboratory testing done to confirm the diagnosis?
Was the case laboratory confirmed?
Test Manufacturer
Lab Accession Number (including CDC Lab ID)
Did the subject ever receive a vaccine against this disease?

Date of last vaccine dose against this disease prior to illness onset

Number of vaccine doses against this disease prior to illness onset
Vaccine History Comments
The persons age at the time the vaccine was given
The age units of the person at the time the vaccine was given
What sources were used for vaccination history?

Vaccination History Information Source Indicator

Description

States use this field to link NEDSS investigations back to their own state investigations.

Date the initial leprosy surveillance form was completed by a reporting source (physician or lab reported to the local/county/state health department).
Date the case was first reported to the CDC
Status of the notification.
Condition or event that constitutes the reason the notification is being sent
Status of the case/event as suspect, probable, confirmed, or not a case per CSTE/CDC/ surveillance case definitions.
MMWR Week for which case information is to be counted for MMWR publication.
MMWR Year (YYYY) for which case information is to be counted for MMWR publication.
State reporting the notification.
County reporting the notification.
National jurisdiction reporting the notification to CDC.
Type of facility or provider associated with the source of information sent to Public Health.
ZIP Code of the reporting source for this case.
Earliest date the case was reported to the public health department whether at the local, county, or state public health level.
Name of the person who is reporting the case to the CDC. This is the person that CDC should contract in a state if there are questions regarding this case notification.

Phone Number of the person who is reporting the case to the CDC. This is the person that CDC should contract in a state if there are questions regarding this case notification.
Job title / description of the person reporting the case to the CDC. This is the person that CDC should contract in a state if there are questions regarding this case notification.
Affiliated Facility of the person reporting the case to the CDC. This is the person that CDC should contract in a state if there are questions regarding this case notification.

Classify the diagnosis based on one of the ICD-9-CM diagnosis codes
County of residence of the subject
State of residence of the subject
Subject age units at time of case investigation
Country of Birth
Length of time this subject has been living in the U.S. (if born out of the U.S.
Provide the date that subject first entered U.S. in YYYYMM format (if born out of the U.S.)
Subject's current sex
Field containing one or more codes that broadly refer to the subject's race(s).
Based on the self-identity of the subject as Hispanic or Latino

Where does the person usually* live (defined as their residence)

*For the definition of 'usual residence' refer to CSTE position statement # 11-SI-04 titled "Revised Guidelines for Determining Residency for Disease Reporting" at http://www.cste.org/ps2011/11-SI-04.pdf .

Earliest date reported to county public health system

Earliest date reported to state public health system

Earliest date of diagnosis (clinical or laboratory) of condition being reported to public health system

Indication of where the disease/condition was likely acquired.

If the disease or condition was imported, indicates the country in which the disease was likely acquired.

Indicates the country in which the disease was potentially acquired.

Date of the beginning of the illness. Reported date of the onset of symptoms of the condition being reported to the public health system

Provide month and year first diagnosis was made (if applicable)

Was subject diagnosed in the U.S. or outside the U.S.

Was biopsy performed in the U.S.?

Was skin smear test performed

Provide date test was performed in YYYYMM format

Epidemiologic interpretation of the results of the tests performed for this case

Indicate all antimicrobial drugs used to treat subject

Indicate the date antimicrobial treatment started

Indicate any sensory abnormalities or deformities of the hands, feet or eyes

Did subject ever had direct contact with an armadillo?

Was the patient previously diagnosed with Hansen's disease?

Date of previous Hansen's Disease diagnosis

How many doctors has the patient seen for this problem?

Was a biopsy performed on the patient as a result of Hansen's disease?

TBD

Indicate the results of the biopsy

If biopsy was performed on the patient, indicate the date of biopsy.

List all places in the US. and all foreign countries a PATIENT resided (including military service) BEFORE leprosy was diagnosed.

TBD

Have any household contacts of the patient been examined

TBD

If skin smears were performed, please select the results.

Date of Skin Smear

What antibiotic was administered to the patient for Leprosy

Was the patient previously treated for Hansen's Disease
If the patient was previously treated, how many months was the patient treated.
Date the treatment was initiated
Have any household contacts of the patient started prophylaxis?
Total number of known or suspected household contacts.

Have any family members or household contacts been previously diagnosed with HD

List number of diagnosed previously with Hansen's Disease.
If answer yes to previous question regarding family member diagnosed, please check relationship.

If household contacts of the patient were examined, were any additional cases found
Indicate the patient's case status
Does the case patient have a history of being of post-exposure prophylaxis for Hansen's disease or tuberculosis (TB)
Indicate the location of the initial diagnosis of Hansen's Disease
What was the date that the case patient stopped taking antimicrobials
Indicates if medication received is for post-exposure or Hansen's treatment.
If answer is yes to the previous question regarding household contacts of the patient receiving prophylaxis, please specify PEP

Does the case patient have a history of being on treatment for latent or active TB?

Frequency of medication administered for this condition.
Unit of measure for the frequency of medication administered (e.g. daily, weekly, monthly).
Duration of medication treatment or post-exposure prophylaxis.
Unit of measure for the duration of medication administered (e.g. days, weeks, months).
Specify recipient of medication for Hansen's disease (e.g. household contact, case subject).
Dosage of medication received.
Unit of measure for medication received (e.g. milligram [mg], milligram/kilogram [mg/kg])

Infant HCV Antigen Test Result

Infant HCV Antigen Positive Date

Tissue or organ transplant

Non-injection Drug Use

Specimen From Mother or Infant
Transplant Date

Subject of Lab Test Performed

Previously Infected Individual

Previous State Case Number

Other Reported Case(s)

Description

Listing of the reason(s) the subject was tested for hepatitis.
Was the subject symptomatic for hepatitis?
Date of the beginning of the illness. Reported date of the onset of symptoms of the condition being reported to the public health system
Was the subject jaundiced?
Subject's pregnancy due date
Was the subject aware they had Hepatitis prior to lab testing?
Does the subject have a provider of care for Hepatitis? This is any healthcare provider that monitors or treats the patient for viral hepatitis.
Liver Enzyme Test Type
Liver Enzyme Test Result Date
Liver Enzyme Upper Limit Normal
Liver Enzyme Test Result
Epidemiologic interpretation of the type of test(s) performed for this case.
Epidemiologic interpretation of the results of the test(s) performed for this case.
Used to specify the anti-HCV signal to cut-off ratio if antibody to Hepatitis C virus was the test performed.
Specify if this case is Epidemiologically-linked to another confirmed or probable case of hepatitis?

During the 2-6 weeks prior to the onset of symptoms, was the subject a contact of a person with confirmed or suspected hepatitis virus infection?
During the 2-6 weeks prior to the onset of symptoms, type of contact the subject had with a person with confirmed or suspected hepatitis virus infection
During the 2-6 weeks prior to the onset of symptoms, answer (Yes, No, Unknown) for each type of contact the subject had with a person with confirmed or suspected hepatitis virus infection
During the 2-6 weeks prior to the onset of symptoms, was the subject a child or employee in daycare center, nursery, or preschool?
During the 2-6 weeks prior to the onset of symptoms, was the subject a household contact of a child or employee in a daycare center, nursery, or preschool?
Was there an identified hepatitis case in the childcare facility?
What is/was the subject's sexual preference?
During the 2-6 weeks prior to the onset of symptoms, number of male sex partners the person had.
During the 2-6 weeks prior to the onset of symptoms, number of female sex partners the person had.
During the 2-6 weeks prior to the onset of symptoms, did the subject inject drugs not prescribed by a doctor?
During the 2-6 weeks prior to the onset of symptoms, did the subject use street drugs but not inject?
During the 2-6 weeks prior to the onset of symptoms, did the subject travel or live outside the U.S.A. or Canada?
The country(s) to which the subject traveled or lived (outside the U.S.A. or Canada) prior to symptom onset.
What was the principal reason for travel?

During the 3 months prior to the onset of symptoms, did anyone in the subject's household travel outside the U.S.A. or Canada?
The country(s) to which anyone in the subject's household traveled (outside the U.S.A. or Canada) prior to symptom onset.
Is the subject suspected as being part of a common-source outbreak?
Subject is associated with a foodborne outbreak that is asscociated with an infected food handler.
Subject is associated with a foodborne outbreak that is not associated with an infected food handler.
Food item with which the foodborne outbreak is associated.
Subject is associated with a waterborne outbreak .
Subject is associated with an outbreak that does not have an identifed source.
During the 2 weeks prior to the onset of symptoms or while ill, was the subject employed as a food handler?
Does subject have diabetes?
If subject has diabetes, date of diabetes diagnosis.
Did the subject ever receive the hepatitis A vaccine?
Number of doses of hepatitis A vaccine the subject received.
Year the subject received the last dose of hepatitis A vaccine.
Has the subject ever received immune globulin?
Date the subject received the last dose of immune globulin.
Race of the subject's mother.
Ethnicity of the patient's mother.
Was mother born outside of the United States of America?
What is the birth country of the mother?
Was the mother confirmed HBsAg positive prior to or at time of delivery?

Was the mother confirmed HBsAg positive after delivery?

Date of mother's earliest HBsAg positive test result.
Number of doses of hepatitis vaccine the child received.
Has the child ever received immune globulin?
Date the child received the last dose of immune globulin.
The vaccine dose number in series of vaccination for hepatitis.
The date that the vaccine was administered.
For Acute Hepatitis B, in the 6 weeks to 6 months prior to onset of symptoms, was the patient a contact of a person with confirmed or suspected hepatitis B virus infection?

For Acute Hepatitis C, in the 2 weeks to 6 months prior to onset of symptoms, was the patient a contact of a person with confirmed or suspected hepatitis C virus infection?

For Acute Hepatitis B, in the 6 weeks to 6 months prior to onset of symptoms, type of contact with a person with confirmed or suspected hepatitis B virus infection?

For Acute Hepatitis C, in the 2 weeks to 6 months prior to onset of symptoms, type of contact with a person with confirmed or suspected hepatitis C virus infection?

For Acute Hepatitis B, in the 6 weeks to 6 months prior to onset of symptoms, answer (Yes, No, Unknown) for each type of contact the subject had with a person with confirmed or suspected hepatitis B virus infection.

For Acute Hepatitis C, in the 2 weeks to 6 months prior to onset of symptoms, answer (Yes, No, Unknown) for each type of contact the subject had with a person with confirmed or suspected hepatitis B virus infection.

What is/was the subject's sexual preference?

Prior to the onset of symptoms, number of male sex partners the person had.

For Acute Hep B, the time period prior to onset of symptoms is 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 6 months.

Prior to the onset of symptoms, number of female sex partners the person had.

For Acute Hep B, the time period prior to onset of symptoms is 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 6 months.

How many sex partners (approximately) has subject ever had?

Was the subject ever treated for a sexually transmitted disease?

Year the patient received the most recent treatment for a sexually transmitted disease.

Has the patient ever injected drugs not prescribed by a doctor, even if only once or a few times?

Was the patient ever a contact of a person who had hepatitis?

If the patient was ever a contact of a person who had hepatitis, what was the type of contact?

Prior to the onset of symptoms, did the patient inject drugs not prescribed by a doctor?

For Acute Hep B, the time period prior to onset of symptoms is 6 weeks - 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 2 weeks - 6 months.

Prior to the onset of symptoms, did the patient use street drugs but not inject?

For Acute Hep B, the time period prior to onset of symptoms is 6 weeks - 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 2 weeks - 6 months.

Was the patient ever on long-term hemodialysis?
Prior to the onset of symptoms, did the patient udergo hemodialysis?

For Acute Hep B, the time period prior to onset of symptoms is 6 weeks - 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 2 weeks - 6 months.

Prior to the onset of symptoms, did the patient have an accidental stick or puncture with a needle or other object contaminated with blood?

For Acute Hep B, the time period prior to onset of symptoms is 6 weeks - 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 2 weeks - 6 months.

Did the patient receive a blood transfusion prior to 1992?
Did the patient receive an organ transplant prior to 1992?
Did the patient receive clotting factor concentrates prior to 1987?
Prior to the onset of symptoms, did the patient receive blood or blood products (transfusion)?

For Acute Hep B, the time period prior to onset of symptoms is 6 weeks - 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 2 weeks - 6 months.

Date the subject began receiving blood or blood products (transfusion) prior to symptom onset.

For Acute Hep B, the time period prior to onset of symptoms is 6 weeks - 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 2 weeks - 6 months.

Prior to the onset of symptoms, did the patient receive any IV infusions and/or injections in an outpatient setting?

For Acute Hep B, the time period prior to onset of symptoms is 6 weeks - 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 2 weeks - 6 months.

Prior to the onset of symptoms, did the patient have other exposure to someone else's blood?

For Acute Hep B, the time period prior to onset of symptoms is 6 weeks - 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 2 weeks - 6 months.

Was the patient ever employed in a medical or dental field involving direct contact with human blood?
Prior to the onset of symptoms, was the patient employed in a medical or dental field involving direct contact with human blood?

For Acute Hep B, the time period prior to onset of symptoms is 6 weeks - 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 2 weeks - 6 months.

Subject's frequency of blood contact as an employee in a medical or dental field involving direct contact with human blood.

For Acute Hep B, the time period prior to onset of symptoms is 6 weeks - 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 2 weeks - 6 months.

Prior to the onset of symptoms, was the subject employed as a public safety worker (fire fighter, law enforcement, or correctional officer) having direct contact with human blood?

For Acute Hep B, the time period prior to onset of symptoms is 6 weeks - 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 2 weeks - 6 months.

Subject's frequency of blood contact as a public safety worker (fire fighter, law enforcement, or correctional officer) having direct contact with human blood.

For Acute Hep B, the time period prior to onset of symptoms is 6 weeks - 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 2 weeks - 6 months.

Prior to the onset of symptoms, did the patient receive a tattoo?

For Acute Hep B, the time period prior to onset of symptoms is 6 weeks - 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 2 weeks - 6 months.

Location(s) where the patient received a tattoo
Prior to the onset of symptoms, did the patient receive a piercing (other than ear)?

For Acute Hep B, the time period prior to onset of symptoms is 6 weeks - 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 2 weeks - 6 months.

Location(s) where the patient received a piercing (other than ear)
Prior to the onset of symptoms, did the patient have dental work or oral surgery?

For Acute Hep B, the time period prior to onset of symptoms is 6 weeks - 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 2 weeks - 6 months.

Prior to the onset of symptoms, did the patient have surgery (other than oral surgery)?

For Acute Hep B, the time period prior to onset of symptoms is 6 weeks - 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 2 weeks - 6 months.

Was the patient tested for Hepatitis D
Did patient have a co-infection with Hepatitis D?
Did the patient have a negative hepatitis-related test in the previous 6 months?

For Hep B: Did patient have a negative HBsAg test in the previous 6 months?

For Hep C: Did patient have a negative HCV antibody test in the previous 6 months?

If patient had a negative hepatitis-related test test in the previous 6 months, please enter the test date.
Prior to the onset of symptoms, was the patient hospitalized?

For Acute Hep B, the time period prior to onset of symptoms is 6 weeks - 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 2 weeks - 6 months.

Prior to the onset of symptoms, was the patient a resident of a long-term care facility?

For Acute Hep B, the time period prior to onset of symptoms is 6 weeks - 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 2 weeks - 6 months.

Was the patient ever incarcerated?
Prior to the onset of symptoms, was the patient incarcerated for longer than 24 hours?

For Acute Hep B, the time period prior to onset of symptoms is 6 weeks - 6 months.

For Acute Hep C, the time period prior to onset of symptoms is 2 weeks - 6 months.

Does subject have diabetes?
If subject has diabetes, date of diabetes diagnosis.
Type of facility where the patient was incarcerated for longer than 24 hours before symptom onset.

Was the patient ever incarcerated for longer than six months during his or her lifetime?
Year the patient was most recently incarcerated for longer than six months.
Length of time the patient was most recently incarcerated for longer than six months.

Has the subject ever received medication for the type of Hepatitis being reported?
What is the birth country of the mother?
Did the subject ever receive a hepatitis B vaccine?

Number of doses of hepatitis B vaccine the patient received.
Year the patient received the last dose of hepatitis B vaccine.
Was the patient tested for antibody to HBsAg (anti-HBs) within one to two months after the last dose?
Was the serum anti-HBs >= 10ml U/ml? (Answer 'Yes' if lab result reported as positive or reactive.)
Maternal HBeAg result, date
Maternal HBV DNA (or genotype), result, date

Maternal Alanine aminotransferase (ALT)

Maternal antiviral therapy, if any
Maternal Coinfection with human immunodeficiency virus or hepatitis C virus

Maternal State/Territory of residence at time of infant's diagnosis

Infant Birthweight
Infant Time of birth (military time)
Infant State/Territory of birth
HCV RNA (NAAT) test results and timing of test performance
HCV genotype test results and timing of test performance
HCV antigen test results and timing of test performance
Nucleic acid amplification test (NAAT; such as PCR or genotyping) for hepatitis A virus RNA
Date of hepatitis A RNA test
Total bilirubin levels
Date of bilirubin test
In the 2-6 weeks prior to symptom onset, was the patient homeless?
Did the patient meet the CSTE case definition(s) for any of the following in a previous reporting year? (*select all that apply*)
Source of Laboratory Test: (*select all that apply*)
Signs and symptoms associated with the illness being reported
Response for each of the signs and symptoms.
The date and time, if available, of the symptom onset (clinical manifestation)
What was the date of jaundice onset?
Was the patient employed as a healthcare worker during the TWO WEEKS prior to onset of symptoms to ONE WEEK after onset of JAUNDICE? (If no jaundice, use two weeks after onset of symptoms)
Exposed risk factors for the patient - Please provide a response for all risk factors in the value set with an associated indicator.
In the 15 to 50 days before symptom onset date for hepatitis A.
In the 60 to 150 days (2 to 5 months) before symptom onset date for hepatitis B.
In the 14 to 182 days (2 weeks to 6 months) before symptom onset date for hepatitis C.
Provide a response for each value in the patient epidemiological risk factors value set.

If the patient was a contact of a person with confirmed or suspected hepatitis virus infection, was the contact: (select all that apply)
Was the patient a man who reported sexual activity with men?
Did the patient report multiple sex partners?
Was the patient diagnosed with a sexually transmitted disease?
Did the gestational parent receive hepatitis B antiviral therapy during the third trimester of pregnancy?

The patient's birth weight units
Did the patient receive the hepatitis B vaccine within 12 hours of birth?

Did the patient receive the hepatitis B immune globulin within 12 hours of birth?

If hepatitis B case, did the patient meet the acute hepatitis B seroconversion criteria? (*i.e., documented negative HBsAg laboratory test result within 6 months prior to a positive test [HBsAg, HBeAg, or nucleic acid test for HBV DNA (including qualitative, quantitative, and genotype testing)] in someone without a prior diagnosis of HBV infection*)

If hepatitis C case, did the patient meet the acute hepatitis C seroconversion criteria? (e.g., documented negative anti-HCV followed within 12 months by a positive anti-HCV test; or documented negative anti-HCV or negative HCV detection test [in someone without a prior diagnosis of HCV infection] followed within 12 months by a positive HCV detection test; or, in the case of presumed reinfection, at least two sequential negative HCV detection tests [in someone with a prior diagnosis of HCV infection] followed by a positive HCV detection test).

Was the patient employed as a food handler or a healthcare worker during the TWO WEEKS prior to onset of symptoms to ONE WEEK after the onset of JAUNDICE? (If no jaundice, use two weeks after onset of symptoms)

Please indicate for each occupation:

Did the patient have two positive results at least 6 months apart from any of the following tests: (1) HBsAg; (2) nucleic acid test for HBV DNA (including qualitative, quantitative, and genotype testing); (3) HBeAg? (*Any combination of these positive tests performed at least 6 months apart is acceptable*)

Provide the local record ID used for reporting mother's case of hepatitis (DE Identifier "N/A: OBR-3"). This will be used for linking the reported perinatal case to the mother's reported hepatitis case.

For hepatitis B, perinatal, did the gestational parent receive nucleic acid testing for HBV DNA during pregnancy?

For hepatitis C, perinatal, did the gestational parent receive nucleic acid testing for HCV RNA (including qualitative or quantitative PCR, or genotype testing) during pregnancy?

For hepatitis B, perinatal, if the gestational parent received nucleic acid testing for HBV DNA during pregnancy, then indicate the result.

For hepatitis C, perinatal, if the gestational parent received nucleic acid testing for HCV RNA (including qualitative or quantitative PCR, or genotype testing) during pregnancy, then indicate the result.

If the gestational parent received nucleic acid testing for HBV DNA during pregnancy, then indicate the viral load:

Did the gestational parent receive HBeAg testing during pregnancy?

If the gestational parent received HBeAg testing during pregnancy, indicate the result.

Did the patient receive an HBsAg test between age 1–24 months (only if ≥4 weeks after the last dose of hepatitis B vaccine)?

If the patient received an HBsAg test between age 1–24 months (only if ≥4 weeks after the last dose of hepatitis B vaccine), indicate the result.

If positive, then indicate the date of the first positive HBsAg test between age 1-24 months.

Did the patient receive an HBeAg test between age 9–24 months?

If the patient received an HBeAg test between age 9–24 months, indicate the result.

If positive, then indicate the date of the first positive HBeAg test between age 9-24 months.
Did the patient receive an HBV DNA test between age 9–24 months?

If the patient received an HBV DNA test between age 9–24 months, indicate the result.

If detected/positive, then indicate the date of the first positive HBV DNA test between age 9-24 months.
Did the patient receive an anti-HCV test between age 18-36 months?

If the patient received an anti-HCV test between age 18-36 months, indicate the result.

If positive, then indicate the date of the first positive anti-HCV test between age 18-36 months.
Did the patient receive nucleic acid testing for HCV RNA (including qualitative or quantitative PCR, or genotype testing) between age 2-36 months?

If the patient received nucleic acid testing for HCV RNA (including qualitative or quantitative PCR, or genotype testing) between age 2-36 months, indicate the result.

If detected/positive, then indicate the date of the first positive nucleic acid test for HCV RNA between age 2-36 months.
Did the patient receive HCV antigen test between age 2-36 months?

If the patient received HCV antigen test between age 2-36 months, indicate the result.

If positive, then indicate the date of the first positive HCV antigen test between age 2-36 months.
Did the patient receive tissue or organ transplant(s)?

Did the patient use non-injection drugs not prescribed by a doctor or engage in nonmedical use of prescription drugs?

V1.0 only: During the 2-6 weeks prior to the onset of symptoms, did the subject inject drugs not prescribed by a doctor?
Is the specimen from the gestational parent or the infant?
Date(s) of organ transplant(s).

Indication to specify whether the Lab Test Performed was for the mother or infant.

Did the subject meet the case definition for a previous case investigation of this disease or condition?

If the subject previously met the case definition for the disease or illness, what was the previously submitted sending system-assigned local ID (case ID) of the case investigation with which the subject is associated?

Select all of the newly reported case(s) of the hepatitides confirmed within the current reporting year other than the primary condition reported for this case notification.

Description

Case patient's ID
How was patient's illness first identified by public health (state or local health department or EIP)?
Date case entered into data system (Complete if FIRST_IDENT=1)
Describe other way patient's illness first identified by public health (Complete if FIRST_IDENT=4).
Was this case captured through Hospital Discharge Data?
Date case entered into data system (Complete if HDD=1)
Date of HUS diagnosis
Is this case outbreak-related?
Did patient have diarrhea during the 3 weeks before HUS diagnosis?
Date of diarrhea (Complete if DIARRHEA=1)
Did stools contain visible blood at any time? (Complete if DIARRHEA=1)
Was diarrhea treated with antimicrobial medications/ (Complete if DIARRHEA=1)
Type of antimicrobial (Complete if DTREATED=1)
Did the patient have contact with another person with diarrhea or HUS during the 3 weeks before HUS diagnosis (include daycare, household, etc)? (Complete if DIARRHEA=2)
Was patient treated with an antimicrobial medication for any other reason than diarrhea during the 3 weeks before HUS diagnosis?
Type of antimicrobial (Complete if OTHREA=1)
Reason for antimicrobial (Complete if OTHREA=1)
Was other gastrointestinal illness present during 3 weeks before HUS diagnosis?
Did patient have a urinary tract infection during 3 weeks before HUS diagnosis?
Did patient have a respiratory tract infection during 3 weeks before HUS diagnosis?

Did patient have other acute illness during 3 weeks before HUS diagnosis?
Describe other acute illness (Complete if ACUTE=1)
Was patient pregnant during 3 weeks before HUS diagnosis?
Did patient have kidney disease during 3 weeks before HUS diagnosis?
Did patient have an ummunocompromising condition or was the patient taking medication during 3 weeks before HUS diagnosis?
Did patient have a malignancy during 3 weeks before HUS diagnosis? (Complete if IMMCOMP=1)
Did patient have transplanted organ or bone marrow during 3 weeks before HUS diagnosis? (Complete if IMMCOMP=1)
Did patient have HIV infection during 3 weeks before HUS diagnosis? (Complete if IMMCOMP=1)
Was patient using steroids (parenteral or oral) during 3 weeks before HUS diagnosis? (Complete if IMMCOMP=1)
Describe other immunocompromising condition during 3 weeks before HUS diagnosis? (Complete if IMMCOMP=1)
Laboratory values within 7 days before and 3 days after HUS diagnosis: Highest serum creatinine (expressed as mg/dL)
Laboratory values within 7 days before and 3 days after HUS diagnosis: Highest serum BUN (expressed as mg/dL)

Laboratory values within 7 days before and 3 days after HUS diagnosis: Highest serum WBC (expressed as K/mm3)
Laboratory values within 7 days before and 3 days after HUS diagnosis: Lowest hemoglobin (expressed as g/dL)
Laboratory values within 7 days before and 3 days after HUS diagnosis: Lowest hematocrit (expressed as %)
Laboratory values within 7 days before and 3 days after HUS diagnosis: Lowest platelet count (expressed as K/mm3)
Were there microangiopathic changes (i.e., schistocytes, helmet cells or red cell fragments) at any time within 7 days before HUS diagnosis to hospital discharge (if patient was not hospitalized or discharged within 3 days of HUS diagnosis, then outpatient lab results from 7 days before to 3 days after diagnosis should be used, if available)
Other laboratory findings within 7 days before and 3 days after HUS diagnosis: Blood (or heme) in urine
Other laboratory findings within 7 days before and 3 days after HUS diagnosis: Protein in urine
Other laboratory findings within 7 days before and 3 days after HUS diagnosis: RBC in urine by microscopy
Was a stool specimen obtained from this patient?
Was stool tested for Shiga toxin at any clinical laboratory?
Result of Shiga toxin testing (Complete if TESTSHIGA=1)
Collection date of first specimen tested (Complete if TESTSHIGA=1)
Collection date of first positive specimen (Complete if TESTSHIGA=1)
Was stool cultured for E. coli O157 (on selective or differential media e.g. SMAC, CHROMagar O157, CTSMAC) at any CLINICAL laboratory?
Date stool cultured for E. coli O157 (Complete if CULTO157=1)
Was E.coli O157 isolated? (Complete if CULTO157=1)
Collection date 1st positive specimen culture for O157 (Complete if O157POS=1)
Result of H antigen testing (Complete if O157ISOL=1)
Other H antigen (Complete if HANT=5)
Was a stool sample, or any type of specimen or isolate originating from stool sent to a public health laboratory (state or CDC)?
Date of specimen collection (Complete if STOOL_CDC_PHL=1)
Was E.coli or non-O157 STEC identified? (Complete if STOOL_CDC_PHL=1)
What was the O antigen for strain 1? (Complete if STEC_ISOL=1)
What was the H antigen for strain 1? (Complete if STEC_ISOL=1)
What was the O antigen for strain 2? (Complete if STEC_ISOL=1)
What was the H antigen for strain 2? (Complete if STEC_ISOL=1)
Was immunomagnetic separation (IMS) used to identify common STEC serogroups?

What serogroup(s) did the IMS procedure target? (Complete if IMS=1)
Was another pathogen isolated from stool (at PHL or clinical lab)?
Name pathogen isolated from stool (Complete if OTHERPATH=1)
Date other pathogen isolated from stool
Name of second pathogen isolated from stool (Complete if OTHERPATH=1)
Date second other pathogen isolated from stool
Was pathogen isolated from source other than stool (at PHL or clinical lab)?

Name pathogen isolated from source other than stool (Complete if PATHNOS=1)
Specimen source of pathogen isolated from source other than stool (Complete if PATHNOS=1)
First date of isolation of pathogen from source other than stool (Complete if PATHNOS=1)
If O157 or other STEC was isolated, was the isolate sent to state laboratory?
If isolate sent to state laboratory, what was the state laboratory ID (Complete if STATELAB=1)
If O157 or other STEC was isolated, was the isolate sent to CDC?
If isolate sent to CDC, what was the CDC laboratory ID (Complete if CDC=1)
If O157 or other STEC was isolated, was the isolate sent to another reference lab?
If isolate sent to reference lab, what was the name of the reference lab? (Complete if REFLAB=1)
Is the patient a resident of the FoodNet catchment area?
What is the FoodNet PERSONID? (Complete if FNCATCH=1)
Has patient serum or plasma been sent to CDC for testing for antibodies to O157 or other STEC?
What is the state laboratory ID or the serum? (Complete if ANTIO157=1)
Other laboratory ID numbers for serum sent to CDC (Complete if ANTIO157=1)

Second IgG titer
Interpretation of second IgG titer
Second IgM titer
Interpretation of second IgM titer
Third LPS type
Third IgG titer
Interpretation of third IgG titer
Third IgM titer
Interpretation of third IgM titer
Date of first hospital admission
Date of last hospital discharge
Did pneumonia occur as a complication during this hospital admission?
Date of onset of pneumonia (Complete if PNE=1)
Did seizure occur as a complication during this hospital admission?
Date of onset of seizure (Complete if SZR=1)
Did paralysis or hemiparesis occur as a complication during this hospital admission?

Date of onset of paralysis or hemiparesis (Complete if PAR=1)
Did blindness occur as a complication during this hospital admission?
Date of onset of blindness (Complete if BLN=1)
Did other major neurologic sequelae occur as a complication during this hospital admission?
Date of other major neurologic sequalae (Complete if NER=1)

Describe other major neurologic sequelae (Complete if NER=1)
Was peritoneal dialysis performed during hospital stay?
Was hemodialysis performed during hospital stay?
Was packed RBC or whole blood used in dialysis? (Complete if PDIAL=1 or HDIAL=1)

Were platelets used in dialysis? (Complete if PDIAL=1 or HDIAL=1)
Was fresh frozen plasma used in dialysis? (Complete if PDIAL=1 or HDIAL=1)
Was plasmapheresis performed during hospital stay?
Was laparotomy or other abdominal surgery performed during hospital stay? Do not include insertion of dialysis catheter.
Describe other abdominal surgery
Patient's condition at hospital discharge
Date of death (Complete if CONDDC=1)
Was patient discharged requiring dialysis? (Complete if CONDDC=2)
Was patient discharged with neurologic deficits? (Complete if CONDDC=2)

Susceptibility Test

Description

Does the patient reside in a long term care facility?
Date the first positive culture was obtained.
Types of infection(s) that are caused by the bacterial organism.
Sterile body site(s) from which the organism was isolated.
Did the subject have any pre-existing medical conditions before the start of the illness/condition?
Listing of pre-existing conditions as related to the condition/illness
Oxacillin zone size for cases of Streptococcus pneumoniae
Oxacillin interpretation for cases of Streptococcus pneumoniae
Antimicrobial agent tested
Antimicrobial susceptibility testing method used

S/I/R/U result, indicating whether the microorganism is susceptible or not susceptible (intermediate or resistant) to the antimicrobial being tested.
MIC (minimum inhibitory concentration) range.

Are serotyping results available for S pneumoniae isolate?
If Serotyping results are available for S pneumoniae isolate, please specify.
Serotyping Method Used
Has patient ≥2yrs received 23-valent pneumococcal polysaccharide vaccine (Pneumovax)?
If less than eighteen years of age, did the patient receive 7-valent pneumococcal conjugate vaccine (PCV7 or Prevnar)?
If less than eighteen years of age, did the patient receive 13-valent pneumococcal conjugate vaccine (PCV13)?
The type of vaccine administered
Manufacturer of the vaccine
The vaccine lot number of the vaccine administered
The date that the vaccine was administered
Clinical diagnoses associated with a case of IPD
Type of laboratory test used to diagnose pneumococcal infection from a sterile site isolate
Name of culture independent laboratory test used and manufacturer of the test

CLIA number of the laboratory that conducted the testing
Does this patient attend a day care facility?
Listing of underlying causes or prior illnesses
Underlying Conditions Indicator
Illness onset age
Illness onset age units
During any part of the hospitalization, did the subject stay in an Intensive Care Unit (ICU) or a Critical Care Unit (CCU)?
Where was the patient a resident at time of initial culture?
At the time of first positive culture, was the patient pregnant or postpartum? (The postpartum period is defined as the 30 days following a delivery or miscarriage)
If pregnant or postpartum, what was the outcome of fetus?

If patient <1 month of age, indicate gestational age (in weeks)
If patient <1 month of age, indicate birth Weight
Birth Weight Units
Premature at birth (for children ≤2 years old)
Insurance
Is this case Epi linked to a confirmed or probable case?

ABCs case?
ABCs State ID
Does this case have recurrent disease with the same pathogen? (For Streptococcus pneumoniae, the specimen from the current case must have been isolated 8 or more days after any previous case due to the same pathogen. For all other pathogens, the specimen from the current case must have been isolated 30 or more days after any previous case due to the same pathogen.)
StateID of 1st occurrence for this pathogen and person.
Was laboratory testing done to confirm the diagnosis?
Was the case laboratory confirmed?
Test Manufacturer
Lab Accession Number (including CDC Lab ID)
Did the subject ever receive a vaccine against this disease?

Date of last vaccine dose against this disease prior to illness onset

Number of vaccine doses against this disease prior to illness onset
Vaccine History Comments
The persons age at the time the vaccine was given
The age units of the person at the time the vaccine was given
What sources were used for vaccination history?
Vaccination History Information Source Indicator

Was any susceptibility data available?

Description

Disease caused by a Legionella species
Was patient hospitalized during treatment for legionellosis?
Date of admission to hospital
Name of hospital to which admitted
City and state of hospital
Outcome of illness
In the 10 days before onset, did the patient spend any nights away from home (excluding healthcare settings)?
Name of lodging where patient stayed other than usual resident
Address of lodging away from home
City of lodging away from home
State of lodging away from home
Zipcode of lodging away from home
Country of lodging away from home
Room number at lodging where patient stayed other than usual resident
Date of stay arrival
Date of stay departure
If yes, was this case reported to CDC at travellegionella@cdc.gov? 1
In the 10 days before onset, did the patient get in or spend time near a whirlpool spa (i.e., hot tub)?
In the 10 days before onset, did the patient use a nebulizer, CPAP, BiPAP or any other respiratory therapy equipment for the treatment of sleep apnea, COPD, asthma or for any other reason?
If yes, does this device use a humidifier?
If yes, what type of water is used in the device? This is a multi-select field.
In the 10 days before onset, did the patient visit or stay in a healthcare setting (e.g., hospital, long term care/rehab/skilled nursing facility, clinic)?
Type of healthcare setting/facility
Type of exposure in HC setting/facility
Name of healthcare facility
Is this a transplant center?
Reason for visit to HC facility
City of HC facility
State of HC facility
Start date of HC facility admission/visit
End date of HC facility admission/visit
Was this case associated with a healthcare exposure?
In the 10 days before onset, did the patient visit or stay in an assisted living facility or senior living facility?
Type of assisted living facility exposure
Type of assisted living facility
Name of AL facility
Name of city of AL facility
Name of state of AL facility
Start date of AL facility admission/visit
End date of AL facility admission/visit

Was the urine antigen positive?
Date urine antigen was collected
Was the culture positive?
Date culture was collected
Site of culture specimen
Species isolated from culture
Serogroup of species from culture
Was there a fourfold rise in Ab titer?
Initial Ab titer to L. pneumophila serogroup 1
Initial Ab titer specimen collection date
Convalescent Ab titer to L. pneumophila serogroup 1
Convalescent Ab specimen collection date
Was there a fourfold rise in Ab titer for other than L. pneumophila serogroup 1 or to multiple species or serogroups of Legionella using pooled antigen?
Initial Ab titer to other than L. pneumophila serogroup 1
Initial Ab titer specimen collection date for species other than L. pneumophila serogroup 1
Convalescent Ab titer to species other than L. pneumophila serogroup 1
Convalescent Ab specimen collection date for species other than L. pneumophila serogroup 1
Species identified for other than L. pneumophila serogroup 1
Serogroup identified for other than L. pneumophila serogroup 1
Was the DFA or IHC positive?
Date specimen for DFA/IHC collected
Site of DFA/IHC specimen
Species identified by DFA/IHC for other than L. pneumophila serogroup 1
Serogroup identified by DFA/IHC for other than L. pneumophila serogroup 1
Was a nucleic acid assay (e.g., PCR) performed?
Date nucleic acid assay specimen collected
Site of nucleic acid assay specimen
Species identified by nucleic acid assay for other than L. pneumophila serogroup 1
Serogroup identified by nucleic acid assay for other than L. pneumophila serogroup 1

Description

Date/time the notification was first sent to CDC. This value does not change after the original notification.

States use this field to link NEDSS investigations back to their own state investigations.

Health care provider name
Health care provider phone number
Status of the case/event as suspect, probable, confirmed, or not a case per CSTE/CDC/ surveillance case definitions.
State of residence of the subject
ZIP Code of residence of the subject
County of residence of the subject
Subject's current sex
Birth Date *(mm/yyyy)*
Subject age at time of case investigation
Subject age units at time of case investigation
Based on the self-identity of the subject as Hispanic or Latino
Field containing one or more codes that broadly refer to the subject's race(s).
Was the case-patient symptomatic?
If Symptomatic was "Yes", provide the Date of Onset of symptoms
Select symptoms and signs reported or identified, from "Fever", "Myalgia", "Headache", "Jaundice ", "Hepatitis", "Conjunctival suffusion", "Rash (Maculopapular or petechial)", "Aseptic meningitis", "Gastrointestinal involvement", "Pulmonary complications", "Cardiac involvement", "Renal insufficiency/failure ", "Hemorrhage", "Other (specify)"
Was the case-patient hospitalized (at least overnight) for this Did the case-patient die? Yes No Unk infection?
Subject's first admission date to the hospital for the condition covered by the investigation.
If hospitalized, number of days.
Clinical outcome of the patient ("Still hospitalized"; "Discharged"; "Died";"Other")
Subject's first discharge date from the hospital for the condition covered by the investigation.
If the subject died from this illness or complications associated with this illness, indicate the date of death
Were Antibiotics prescribed for this infection?
Date started taking antibiotics
Was doxycycline prescribed for this infection?
Was penicillin prescribed for this infection?
List other antibiotics prescribed for this infection
Name of Laboratory that reported test result.
Date Sample Received at Lab (accession date).
The date the specimen was collected.
Type of specimen collected ("Blood", "Urine", "Tissue", "CSF", "Other", "Unknown", "Serum")
The date the acute specimen was collected.

The date the convalscent specimen was collected.

The lab test that was run on the specimen ("Microscopic Agglutination Test (MAT)", "PCR", "Culture", "Immunofluorescence", "Darkfield microscopy", "ELISA (specify)", "IHC", "Other, specify")

Results expressed as numeric value/quantitative result.

The unit of measure for numeric result value.

Coded qualitative result value (e.g., Positive, Negative).

The Organism (i.e., species and serovar) name as a test result. This element is used when the result was reported as an organism.

Textual result value, used if result is neither numeric nor coded.

The Result Status is the degree of completion of the lab test.

Were specimens or isolates sent to CDC for testing?

Describe exposures to water, animals, or wet soil which the subject had in the 30 days prior to illness onset

Select which animals the subject has had contact with in the 30 days prior to illness onset, if any ("Farm livestock", "Wildlife", "Dogs", "Rodents", "Other", "No known contact", "Unknown")

If the subject had contact with livestock, specify the animal(s)

If the subject had contact with wildlife, specify the animal(s)

If animal contact is "Other", describe the animal(s) with which the subject has had contact

If the subject had contact with animals, specify the grographic location where the contact occurred

Select which water sources the subject has had contact with in the 30 days prior to illness onset, if any ("Standing fresh water (lake, pond, run-off)", "Flood water", "River", "Wet soil", "Sewage","Water sports", "Other", "No known contact", "Unknown")

If water contact is "Other", describe the water source(s) which the subject has had contact

If the subject had contact with water, specify the grographic location where the contact occurred

If subject had contact with animals, fresh water, or wet soil in the 30 days prior to illness onset, describe the type of contact ("Occupational", "Recreational", "Avocational", "Other")

If type of contact with animals or water is "Occupational", select the occupational group ("Farmer (land)", "Farmer (animals)", "Fish worker", "Other", "Unknown")

If the occupational group through which the subject had contact with animals or water is "Other", describe the occupation

If type of contact with animals or water is "Recreational", select the recreational activity ("Swimming", "Boating", "Outdoor competition", "Camping/hiking", "Hunting", "Other", "Unknown")

If the recreational activity through which the subject had contact with animals or water is "Other", describe the recreational activity

If type of contact with animals or water is "Avocational", select the activity ("Gardening", "Pet-ownership", "Other", "Unknown")

If the Avocational activity through which the subject had contact with animals or water is "Other", describe the avocational activity

If Contact Type is "Other", describe the type of contact with animals, wet soil, or standing water

Did the patient stay in housing with evidence of rodents in the 30 days prior to illness onset

Residence in rural area in the 30 days prior to illness onset

Does the subject have a hisotry of leptospirosis?

Did the subject travel out of the county, state, or country in the 30 days prior to symptom onset?

If the travel is "Yes", provide location(s) of travel in the 30 days prior to symptom onset

Was there heavy rainfall near the subjects place of residence, worksite, activities, or travel in the 30 days prior to symptom onset?

Was there flooding near the subjects place of residence, worksite, activities, or travel in the 30 days prior to symptom onset?

Did the patient have similar exposures as a contact diagnosed with leptospirosis in the 30 day period

Is this patient part of an outbreak?

A state-assigned name for an indentified outbreak.

Name of the person who is reporting the case to the CDC. This is the person that CDC should contract in a state if there are questions regarding this case notification.

Phone Number of the person who is reporting the case to the CDC. This is the person that CDC should contract in a state if there are questions regarding this case notification.

If subject was pregnant at time of illness onset, specify the number of weeks gestation at onset of illness (1-45 weeks)

If subject was pregnant at time of illness, did the subject have any adverse outcome to the pregnancy (e.g. miscarriage, stillbirth, neonatal illness or death) related to the illness?

For each clinical manifestation reported, indicate (YNU) whether the subject developed the specified manifestation as a result of the illness.

What antibiotics were prescribed/administered to the patient for treatment of this illness?

If subject was hospitalized, were any of the following procedures or treatments done?

Were any animals sick at the time of contact?

Specify the sick animal/s the patient had contact with at this location

Did the subject use well water or rainwater collected in cisterns, drums, or other containers for drinking or bathing?

If the subject used well water or collected rainwater for drinking or bathing, was the water boiled, chemically treated, or UV treated prior to use?

Flooding Location

Does the patient have any of the following pre-existing medical conditions?

Indicate the state where the subject’s workplace is located

Indicate the city where the subject’s workplace is located

Indicate the zip code where the subject’s workplace is located

Did the subject have any open wounds or cuts in the 30 days prior to illness onset?

If the subject saw rodents in the 30 days prior to illness onset, what type of rodent(s) were seen?
If the Microscopic Agglutination Test (MAT) was performed, specify the serovar(s) with the highest titer.
Did the subject have contact with sewage in the 30 days prior to illness onset?
Indicate the types of activity that led to the selected animal, water or mud contact. Multiple activities can be selected for the type of exposure.
Indicate the county where the selected exposure occurred
Indicate the state where the selected exposure occurred
Indicate the country where the selected exposure occurred
Indicate the specific location where exposure occurred (e.g. home, work, name of park, name of lake)
Patient Address City

If the patient has an immunosuppressive condition, specify the condition.

Number of days of work or school the patient missed due to this illness?
If the subject had contact with well water, cistern water, or rainwater collected in a drum or other container, did the well, cistern or other container have a lid?
Where did the subject see rodents or evidence of rodents?

Description	Value Set Code. Search in PHIN VADS using the following link (https://phinvads.cdc.gov/vads/SearchHome.action)
State case number for the case specific to TB investigations (4 digit report year + 2 letter state + 9 digit alphanumeric number)	N/A
City or county case number assigned to this case	N/A
What was the patient's sex at birth?	PHVS_Sex_MFU
Has this case already been counted by another reporting area?	PHVS_CaseCountStatus_TB
If case previously counted, provide the state case number from the other reporting area.	N/A
If the case was previously reported by another country, specify the country.	PHVS_BirthCountry_CDC
Patient address city	N/A
Is the patient's residence within city limits?	PHVS_YesNoUnknown_CDC
Census tract where the address is located is a unique identifier associated with a small statistical subdivision of a county. Census tract data allows a user to find population and housing statistics about a specific part of an urban area.	N/A
Provide the detailed race information for the patient.	PHVS_Race_CDC
If country of birth is NOT United States, regardless of citizenship, indicate the date when the patient first arrived in the US.	N/A
Was the patient eligible for US citizenship at birth?	PHVS_YesNoUnknown_CDC
Indicates the birth country of the primary guardian(s) of patient (pediatric [<15 years old] cases only)	PHVS_BirthCountry_CDC
If not US reporting area, did patient remain in the United States for >= 90 days after report date?	PHVS_YesNoUnknown_CDC
What was the initial reason the patient was evaluated for TB?	PHVS_PrimaryReasonForEvaluation_TB
Epidemiologic interpretation of the type of test(s) performed for this case. Please provide a response for each of the main test types (culture, smear, pathology/cytology, NAA, TST, IGRA, HIV, diabetes) If test was not done please indicate so.	PHVS_LabTestType_TB
Epidemiologic interpretation of the results of the test(s) performed for this case - This is a qualitative test result. (e.g., positive, detected, negative)	PHVS_LabTestInterpretation_TB
Date result sent from reporting laboratory. Time of result is an optional addition to date.	N/A
This indicates the anatomical source of the specimen tested.	PHVS_MicroscopicExamCultureSite_TB

Description

Indicates whether the patient had erythema migrans (physician diagnosed EM at least 5 cm in diameter).
Indicates whether the patient had arthritis characterized by brief attacks of joint swelling.
Indicates whether the patient had Bell's palsy or other cranial neuritis.
Indicates whether the patient had radiculoneuropathy.
Indicates whether the patient had lymphocytic meningitis.
Indicates whether the patient had encephalitis/encephalomyelitis.
Indicates whether the patient had 2nd or 3rd degree atrioventricular block.

Import Status
Vaccination Doses Prior to Illness Onset
Date of Last Dose Prior to Illness Onset
Vaccine History Comments

Description

Did the subject being reported in this investigation have a rash?
What was the onset date of the subject's rash?
How many days did the rash reported in this investigation last?
Was the rash generalized? (Occurring on more than one or two parts of the body?)

Did rash onset occur within 21 days of entering the USA, following any travel or living outside the USA?
Did the subject have a fever? I.E., a measured temperature >2 degrees above normal

What was the subject's highest measured temperature during this illness?
The units of measure of the highest measured temperature. This would be either Fahrenheit or Celsius.
Date of fever onset
Did the subject develop a cough during this illness?
Did the subject develop coryza (runny nose) during this illness?
Did the subject develop conjunctivitis during this illness?
Did the subject develop otitis media as a complication of this illness?
Did the subject develop diarrhea as a complication of this illness?
Did the subject develop pneumonia as a complication of this illness?
Did the subject develop encephalitis as a complication of this illness?
Did the subject develop thrombocytopenia as a complication of this illness?
Did the subject develop croup as a complication of this illness?
Did the subject develop hepatitis as a complication of this illness?
Did the subject develop other conditions as a complication of this illness?
Please specify the other complication the subject developed, during or as a result of this illness.
Was laboratory testing done to confirm a diagnosis of measles?

Epidemiologic interpretation of the type of test(s) performed for this case
Epidemiologic interpretation of the results of the tests performed for this case.
The date the specimen/isolate was tested.
The technique or method used to perform the test and obtain the test results.
Date of specimen collection
The medium from which the specimen originated.
Were clinical specimens sent to CDC laboratories for genotyping (molecular typing)?

Specimen type sent to CDC for genotyping

The date the specimens were sent to the CDC laboratories for genotyping.
Identifies whether the Measles virus was genotype sequenced.

Identifies the genotype sequence of the Measles virus
What was the transmission setting where the measles was acquired?
What was the source of the measles infection?

Does the age of the case match or make sense for the transmission setting listed (i.e. A subject aged 80 probably would not have a transmission setting of child day care center.)?
Specify if this case is Epidemiologically-linked to another confirmed or probable case of measles?
A "Yes" answer to this question denotes this case was infected by another subject who acquired infection while outside of the U.S.

List any international destinations of recent travel

Date the subject returned from all travel
Did the subject ever receive a measles-containing vaccine?

If the subject did not receive a measles-containing vaccine, what was the reason?

The number of doses of measles-containing vaccine the subject received before their first birthday.
The number of measles-containing vaccine doses the subject received on or after their first birthday.
If the subject was vaccinated with measles-containing vaccine BEFORE the first birthday, but did not receive a vaccine dose after their first birthday, state the reason.

If the subject received one dose of measles-containing vaccine ON or AFTER their first birthday, but did not receive a second dose after the first birthday, what was the reason?

Total doses measles-containing vaccine

The type of vaccine administered
Manufacturer of the vaccine
The vaccine lot number of the vaccine administered
The date that the vaccine was administered
Sub-classification of disease or condition acquired in the US

Age of patient at rash onset
Age units of patient at rash onset
Was a chest x-ray for pneumonia done?
Was the case patient a healthcare provider (HCP) at illness onset?
Was this case imported?
Number of vaccine doses against this disease prior to illness onset

Date of last vaccine dose against this disease prior to illness onset

Comments about the subject's vaccination history

Description

States use this field to link NEDSS investigations back to their own state investigations.

Date the case was first reported to the CDC
Status of the notification.
Condition or event that constitutes the reason the notification is being sent
Status of the case/event as suspect, probable, confirmed, or not a case per CSTE/CDC/ surveillance case definitions.
MMWR Week for which case information is to be counted for MMWR publication.
MMWR Year (YYYY) for which case information is to be counted for MMWR publication.
State reporting the notification.
County reporting the notification.
National jurisdiction reporting the notification to CDC.
Type of facility or provider associated with the source of information sent to Public Health.
ZIP Code of the reporting source for this case.
Earliest date the case was reported to the public health department whether at the local, county, or state public health level.
Name of the person who is reporting the case to the CDC. This is the person that CDC should contract in a state if there are questions regarding this case notification.

Phone Number of the person who is reporting the case to the CDC. This is the person that CDC should contract in a state if there are questions regarding this case notification.
Job title / description of the person reporting the case to the CDC. This is the person that CDC should contract in a state if there are questions regarding this case notification.
Affiliated Facility of the person reporting the case to the CDC. This is the person that CDC should contract in a state if there are questions regarding this case notification.

County of residence of the subject
State of residence of the subject
Subject age units at time of case investigation
Country of Birth
Length of time this subject has been living in the U.S. (if born out of the U.S.
Date entered U.S. in YYYYMM format (if born out of the U.S.)
Did the subject travel or live outside the U.S.A.?
Indicates the country in which the disease was potentially acquired.

Subject's current sex
Field containing one or more codes that broadly refer to the subject's race(s).
Based on the self-identity of the subject as Hispanic or Latino

Where does the person usually* live (defined as their residence)

*For the definition of 'usual residence' refer to CSTE position statement # 11-SI-04 titled "Revised Guidelines for Determining Residency for Disease Reporting" at http://www.cste.org/ps2011/11-SI-04.pdf .

Earliest date reported to county public health system

Earliest date reported to state public health system

Earliest date of diagnosis (clinical or laboratory) of condition being reported to public health system

Date of the beginning of the illness. Reported date of the onset of symptoms of the condition being reported to the public health system

Provide date test was performed in YYYYMM format

Provide date test was performed in YYYYMM format

Indicate the type of test performed to confirm case

Epidemiologic interpretation of the results of the tests performed for this case

Indicate whether subject was or is currently hospitalized due to this illness

Indicate whether subject died of this illness

Indicate all antimicrobial drugs used to treat subject

Indicate the date antimicrobial treatment started

Does subject have diabetes?

Does subject have chronic renal disease?

Does subject have chronic lung disease?

Does subject have liver disease or chronic alcohol abuse?

Does subject have thalassemia?

Does subject have non HIV-related immune suppression?

Has subject ever served overseas in in the military?

If yes, date of service in YYYYMM format.

Was subject ever exposed to burkolderia through lab work?

If yes, date of exposure in YYYYMM format.

Has subject ever been in contact with soil or water in melioidosis-endemic areas?

If yes, date of contact in YYYYMM format.

Did subject have contact with someone diagnosed with melioidosis?

Was subject present at any recent mass gathering?

Name of the laboratory person who is the lab POC for this investigation

Phone number of the laboratory person who is the lab POC for this investigation

Email address of person who is reporting cases to CDC

Affiliated Facility of the state LRN/lab POC

Is this a human or animal case?
Choose a country for each destination
Enter region (list multiple if applicable)
Enter dates of travel (multiple if applicable)
Was the subject contact with soil or water during this visit?

If yes to Question above, indicate specific location of exposure

If yes to Question above, indicate whether other close contacts also had the same soil/water exposure

If yes to Question above, list the total number of close contacts

If yes to Question above, select relationship to subject (select all that apply)
Were there any significant weather or environmental events during this visit?

If yes to Question above, select all weather/environmental events

Has subject ever been in contact with soil or water in melioidosis-endemic areas?

If yes, date of contact in YYYYMM format.

Did the subject travel 50 miles or more outside his or her normal residence but within the U.S. 30 days prior to onset?
Choose a state each destination
Please indicate city/town (list multiple if applicable)
Enter dates of travel
Was the subject contact with soil or water during this visits?

If yes to Question above, indicate specific location of exposure
If yes to Question above, were there other close contacts also had the same soil/water exposure
If yes to Question above, list the total number of close contacts
If yes to Question above, select relationship to subject (select all that apply)
Were there any significant weather or environmental events during this visit?

If yes to Question above, select all weather/environmental events

In the 10 years before symptoms onset, did the patient travel outside of the continental U.S. or to an area in the U.S. where the endemicity is possible

Choose a country for each destination

Enter region (list multiple if applicable)
Enter dates of travel

Was the subject contact with soil or water during this visit?

If yes to Question above, indicate specific location of exposure

If yes to Question above, indicate whether other close contacts also had the same soil/water exposure

If yes to Question above list the total number of close contacts

If yes to Question above, select relationship to subject (select all that apply)
Were there any significant weather or environmental events during this visit?

If yes to Question above, select all weather/environmental events

If abscess or other specimen selected, please specify

Enter Date of Confirmation by LRN

Is the jurisdiction requesting AST on the isolate
Give reporting jurisdiction ability to enter multiple hospitalizations if needed
Did the subject have pneumonia/pleural effusion
Did the subject have skin/soft tissue infection
Did the subject have genitourinary infection
Did the subject have neurologic infection
Did the subject have pericardial effusion
Did the subject have bone/joint infection
Did the patient have internal abscesses
If yes, for internal abscesses, please select all that apply

If yes for internal abscesses, additional notes (number, location of abscesses)

Did the subject have septic shock
Did the subject have bacteremia
Indicate the date antimicrobial treatment ended

Does subject have liver disease
Does subject have history chronic alcohol abuse?
Does the subject have chronic granulomatous disease?
Does the subject have malignancy?
Does the subject have systemic lupus erythematous?
Does the subject have a history of prior splenectomy
Is the subject on any immunosuppressing medication

Does the patient have any other immunocompromising conditions

What is the patient's occupation
Is the patient a recreational gardener?
Is this case part of a cluster?
In the 30 days prior to symptoms onset did the patient own or have direct contact with an iguana?
Indicate type of iguana if yes to previous question
Indicate type of exposure if yes to exposure to iguana
If owned an iguana, indicate how case patient acquired
Location of purchase/where acquired (name of river, lake, park, or location of pet store, for example)
In the 30 days prior to symptoms onset did the patient own or have direct contact with pet fish?
Indicate type of pet fish if yes to previous question
Indicate type of exposure if yes to exposure to pet fish
If owned a pet fish, indicate how case patient acquired
Location of purchase/where acquired (name of river, lake, park, or location of pet store, for example)
In the 30 days prior to symptoms onset did the patient own or have direct contact with aquatic plants?
Indicate type of aquatic plant if yes to previous question
Indicate type of exposure if yes to exposure to aquatic plants
If owned aquatic plant, indicate how case patient acquired
Location of purchase/where acquired (name of river, lake, park, or location of pet store, for example)
In the 30 days prior to symptoms onset did the patient own or have direct contact with other animals
Indicate type of other animal if yes to previous question
Indicate type of exposure if yes to exposure to "other animal"
If owned "other animal", indicate how case patient acquired
Location of purchase/where acquired (name of river, lake, park, or location of pet store, for example)
Were potential laboratory exposures identified in this investigation
Name of facility/hospital where exposures were identified
City of facility where exposures were identified
State where the facility where the exposures were identified
Total number of laboratory personnel exposures
Number of laboratory personnel with high-risk exposures
Number of laboratory personnel with low-risk exposures
Number of laboratory personnel with minimal exposures
For each laboratory personnel, date of exposures
Does the laboratory personnel have risk factors for melioidosis
Select activity that resulted in exposure
For each laboratory personnel and each activity, select risk category
Did the laboratory personnel undergo serologic monitoring
Did the laboratory personnel receive post-exposure prophylaxis

Did the laboratory personnel report symptoms within 21 days of exposure

If the laboratory personnel reported symptoms, please provide onset date
If the laboratory personnel reported symptoms, describe

Label/Short Name	Description
MIS ID	Multisystem inflammatory syndrome identifier.
Health Department ID	Health Department identifier.
NCOV ID	COVID-19 identifier (if available)
Abstractor name	Name of person compiling medical records and/or interviews.
Date of abstraction	Date of abstraction
Temperature if fever	Fever >38.0°C for ≥24 hours, or report of subjective fever lasting ≥24 hours
Inflammation laboratory markers	Laboratory markers of inflammation (including, but not limited to one or more; an elevated C-reactive protein (CRP), erythrocyte sedimentation rate (ESR), fibrinogen, procalcitonin, d-dimer, ferritin, lactic acid dehydrogenase (LDH), or interleukin 6 (IL-6), elevated neutrophils, reduced lymphocytes and low albumin),
Signs and symptoms	Evidence of clinically severe illness requiring hospitalization, with multisystem (>2) organ involvement.
Signs and symptoms indicator	Indicator for associated sign and symptom
No alternative plausible diagnosis	Is there no alternative plausible diagnosis?
SARS-COV-2 test	Positive for current or recent SARS-COV-2 infection (select all applicable tests)
Symptom onset within 4 weeks of exposure	COVID-19 exposure within the 4 weeks prior to the onset of symptoms
Date of symptom onset	If yes, date of first exposure within the 4 weeks prior
Height	Height specified in inches
Weight	Weight in pounds
Body Mass Index	Body Mass Index
Patient Epidemiological Risk Factors	Underlying medical conditions or risk behaviors for the case patient.
Patient Epidemiological Risk Factors Indicator	Provide a response for each value in the risk factors value set.
Type of complication	Complications associated with the illness being reported
Type of complication indicator	Provide a response for each complication.
ICU Admission Date	If admitted to the ICU, ICU admission date
Days in ICU	Number of days in ICU
Patient outcome	Patient outcome
Preceding COVID-like illness	Did the patient have preceding COVID-like illness?
Date of onset of preceding COVID-like illness	If yes, date of onset of preceding illness
Fever	Fever ≥ 38.0°C

Date of fever onset	Date of fever onset
Highest temperature	Highest temperature ©
Number of days febrile	Number of days febrile
Clinical finding	Clinical finding
Clinical finding indicator	Provide a response for each clinical finding.
Treatment Type	Listing of treatment or medical intervention the subject received for this illness
Treatment type indicator	Provide a response for each treatment type.
Vasoactive medications	Specify vasoactive medications
Immune modulators	Specify immune modulators treatment
Antiplatelets	Specify antiplatelets treatment
Anticoagulation	Specify anticoagulation treatment
Echocardiogram	Select any echocardiogram that apply.
Max coronary artery Z-score	If coronary artery aneurysms, state max coronary artery Z-score.
Cardiac dysfunction	If cardiac ventricular dysfunction, specify type.
Mitral regurgitation	Specify type of mitral regurgitation.
Date of coronary artery aneurysm	Date of first test showing coronary artery aneurysm or dilatation.
Abdominal imaging type	Type of abdominal imaging (ultrasound, CT)
Chest imaging type	Type of chest imaging (chest x-ray, CT)

MIS Inclusion	**Did the patient meet all inclusion criteria associated with MIS illness case definition**
MIS Inclusion Criteria	**Inclusion criteria associated with the illness being reported**
MIS Inclusion Criteria indicator	**Indicator for associated inclusion criteria**
Patient outcome date	**Date of hospital discharge or death**
Medical history	**Does the patient have a history of the following illnesses prior to developing MIS-C symptoms?**
Medical history indicator	**Indicator for associated medical history diagnosis**
Date of medical history	**Date of past medical history diagnosis**
Imaging Study	**Listing of imaging studies the subject received for this illness**
Imaging Study indicator	**Provide a response for normal or abnormal results for each imaging study received**
Left ventricular ejection fraction (LVEF) level	**Specify left ventricular ejection fraction (LVEF)**

NDC Brand Name/Bar Code information

Vaccination Record ID

Reason immunizaton not given, regardless of the schedule used

Description

Did the subject have a measured temperature greater than two degrees above normal?
Date of fever onset
What was the subject's highest measured temperature during this illness?
The units of measure of the highest measured temperature. This would be either Fahrenheit or Celsius.
Did the subject have parotitis as a symptom of this illness?

Indicates if the parotitis is unilateral or bilateral

Did the subject have jaw pain as a symptom of this illness?
Date of subject's salivary gland swelling (including parotitis) onset.
The length of time that the subject exhibited swelling of the salivary gland.
The length of time units that the subject exhibited swelling of the salivary gland

Did the subject have submandibular swelling as a symptom of this illness?

Did the subject have sublingual swelling as a symptom of this illness?
Did symptom onset occur within 12-25 days of entering the U.S., following any travel or living outside the U.S.?
List any international destinations of recent travel

Date the subject returned from all travel
Did the subject develop encephalitis as a complication of this illness?
Did the subject develop meningitis as a complication of this illness?
Did the subject become deaf as a complication of this illness?
Was the type of deafness permanent or temporary?
Did the subject develop orchitis as a complication of this illness?
Did the subject develop an other condition as a complication of this illness?
Please specify the other complication the subject developed, during or as a result of this illness.
Was laboratory testing done to confirm a diagnosis of mumps?

Epidemiologic interpretation of the type of test(s) performed for this case.
Epidemiologic interpretation of the results of the tests performed for this case
Numeric quantitative result of the test(s) performed for this case
Numeric quantitative result unit of the test(s) performed for this case
The date the specimen/isolate was tested.
The technique or method used to perform the test and obtain the test results.
Date of specimen collection
The medium from which the specimen originated
Were clinical specimens sent to CDC laboratories for genotyping (molecular typing)?

The date the specimens were sent to the CDC laboratories for genotyping
What was the transmission setting where the mumps was acquired?

Does the age of the case match or make sense for the transmission setting listed (e.g., a subject aged 80 probably would not have a transmission setting of child day care center)?
What was the source of the mumps infection?
If this is a case aquired in the U.S., how should the case be classified by source?
Specify if this case is Epidemiologically-linked to another confirmed or probable case of mumps?
Did the subject ever receive a mumps-containing vaccine?

Specifies reason the subject did not receive a mumps-containing vaccine

The number of measles-containing vaccine doses the subject received on or after their first birthday
Comments about the subject's vaccination history.
The type of vaccine administered.
Manufacturer of the vaccine.
The vaccine lot number of the vaccine administered.
The date that the vaccine was administered.
Sub-classification of disease or condition acquired in the US

Length of time in the US, from NBS MM
Length of time in the US Units
Patient address city, from NBS MM
Case Investigation Status Code, from NBS MM
Detection Method, from NBS MM
If Other, Specify Transmission Setting
Was the case laboratory confirmed?
Was a specimen sent to CDC for testing?
What type of testing was done at CDC for this subject?
If other, specify testing done at CDC
Date specimen sent to CDC
VPD Lab Message Patient Identifier
VPD Lab Message Observation Identifier

VPD Lab Message Observation Value

If other, specify lab test
Performing laboratory type
If other, specify performing laboratory type

Date of last disease-containing vaccination dose prior to illness onset

Number of disease-containing vaccination doses prior to illness onset
Was subject vaccinated as recommended by ACIP?

Reason subject not vaccinated as recommended by ACIP

If other, specify reason not vaccinated per ACIP

If other, specify type of vaccine administered

If other, specify vaccine manufacturer

NDC from the vaccine's bar code. With the NDC code, vaccine brand name and manufacturer can be obtained.
Vaccination Record ID, from NBS MM
Reason subject was not vaccinated, regardless of the immunization schedule used

Description

If <6 years of age, is the patient in daycare?
Name of the daycare facility.
Does the patient reside in a nursing home or other chronic care facility?
Name of the nursing home or chronic care facility.
Types of infection that are caused by the organism. This is a multi-select field.
Other infection that is caused by the organism.
Bacterial species that was isolated from any normally sterile site.
Other bacterial species that was isolated from any normally sterile site.
Sterile sites from which the organism was isolated. This is a multi-select field.
Other sterile site from which the organism was isolated.
Date the first positive culture was obtained. (This is considered diagnosis date.)
Nonsterile sites from which the organism was isolated. This is a multi-select field.
Did the patient have any underlying conditions?
Underlying conditions that the subject has. This is a multi-select field.
Other malignancy that the subject had as an underlying condition.
Detail of the organ transplant that the subject had as an underlying condition.
Other prior illness that the subject had as an underlying condition.
Another Bacterial Species not listed in the Other Bacterial Species drop-down list.
Internal Body Site where the organism was located.
Other prior illness that the subject had as an underlying condition.
Other prior illness that the subject had as an underlying condition.
Other nonsterile site from which the organism was isolated.
Patient's type of insurance (multi-selection).
Patient's other type of insurance.
Weight of the patient in pounds.
Weight of the patient in ounces.
Weight of the patient in kilograms.
Height of the patient in feet.
Height of the patient in inches.
Height of the patient in centimeters.
Indicator that the weight of the patient is unknown.
Indicator that the height of the patient is unknown.
Serogroup of the culture.
Other serogroup of the culture.
Is patient currently attending college? This question is only applicable if the patient is 15-24 years of age.
How was the case identified?
Other sterile site from which species was isolated.
Other case identification method.
Patient's year in college. (freshman, sophomore, etc.)
Patient's status in college as defined by the university.
Patient's current living situation.
Other housing option.
Full name of the college or university the patient is currently attending.
Has patient received the polysaccharide meningococcal vaccine?
Is this case of Neiserria meningitidis a secondary case?

Type of secondary contact for a case of Neisseria meningitidis.
Other field available if the secondary case type selected is other.
Neisseria meningitidis resistance to Sulfa.
Neisseria meningitidis resistance to Rifampin.
Date the sample was collected for diagnostic testing if a culture was not done.
Specifies the PCR source for how the case was identified.
Specifies the first IHC specimen.
Specifies the second IHC specimen.
Specifies the third IHC specimen.
Specifies whether the patient has received a meningococcal vaccine.
Types of infection caused by organism
If patient <1 month of age, indicate gestational age (in weeks)
If patient <1 month of age, indicate birth weight (grams)
Birth Weight Units
Is this a secondary case?
Does this case have recurrent disease with the same pathogen? (For Streptococcus pneumoniae, the specimen from the current case must have been isolated 8 or more days after any previous case due to the same pathogen. For all other pathogens, the specimen from the current case must have been isolated 30 or more days after any previous case due to the same pathogen.)
StateID of 1st occurrence for this pathogen and person.
Case Report Form Status
Had sex with a male within the past 12 months?

Had sex with a female within the past 12 months?

In the 3 months prior to the onset of symptoms, number of male sex partners the person had?
Documented or self-reported HIV status at the time of event
Was the patient homeless at time of symptom onset?
Indicate what symptoms of interest the patient had during the course of the illness

Indicator for associated sign and symptom
Was the patient taking eculizumab/Soliris at the time of disease onset?
Illness onset age
Illness onset age units
Where was the patient a resident at time of initial culture?
Is this case epi-linked to a laboratory-confirmed case?

ABCs Case?
ABCS State ID
Was laboratory testing done to confirm the diagnosis?
Was the case laboratory confirmed?
Serogroup method
Test Manufacturer
Lab Accession Number (including CDC Lab ID)
Was any susceptibility data available?

Did the subject ever receive a vaccine against this disease?

Date of last vaccine dose against this disease prior to illness onset

Number of vaccine doses against this disease prior to illness onset
Vaccine History Comments
Vaccine Name
The persons age at the time the vaccine was given
The age units of the person at the time the vaccine was given
What sources were used for vaccination history?
Vaccination History Information Source Indicator

Was the patient taking Ravulizumab (Ultomiris) at the time of disease onset?

CDC Priority (New)

Label/Short Name	Description
COVID-19 ID	ID to link all case information on patient
Interviewer Last Name	Last name of interviewer
Interviewer First Name	First name of interviewer
Interviewer Organization	The affiliation or organization of the interviewer.
Interviewer Telephone	Telephone number of interviewer
Interviewer Email	Email of interviewer
Probable Classification Reason	If probable case classification status, provide reason for classification.
Process for Case Identification	Under what process was the case first identified?
DGMQID	If EpiX notification of traveler, provide the DGMQID.
Positive Collection Date	Date of first positive specimen collection.
Hospital Translator	If hospitalized, was a translator required?
Translator Language	If translator required in the hospital, specify which language?
Intensive Care Unit Admittance	Was patient admitted to an intensive care unit (ICU)?
ICU Admission Date	If patient was admitted to an ICU, provide the admission date.
ICU Discharge Date	If patient was admitted to an ICU, provide the discharge date.
Housing Type	Select the best description of where the patient lived at the time of illness onset.
Health Care Worker	Is the patient a health care worker in the U.S.?
Health Care Worker Job Type	If patient is a health care worker, select their occupation. If other, specify in text.
Health Care Worker Job Setting	If patient is a health care worker, select their job setting. If other, specify in text.
Exposure of Interest	In the 14 days prior to illness onset, did the patient have any of the following exposures? Select all that apply.

State of Travel Exposure	If domestic travel outside of state of normal residence, specify the state.
Country of Travel Exposure	If patient traveled internationally, specify country.
Cruise Ship or Vessel	If exposed on a cruise ship or vessel, specify the name of the cruise ship.
Workplace Critical Infrastructure	If the patient was exposed at their workplace, is the workplace critical infrastructure?
Workplace Exposure	If workplace exposure, specify the workplace setting (e.g., long term healthcare setting, hospital, grocery store)
Animal Case	If an animal with confirmed or suspected COVID-19, specify the animal.
Type of Contact with COVID-19 Case	If the patient had contact with a known COVID-19 case, specify the type of contact.
Contact with U.S. COVID-19 Case	Was this person a U.S. case?
COVID-19 Case Identifier	If patient had contact with a known COVID-19 case, specify the COVID-19 ID(s).
Clinical History Collection Mechanism	Select which mechanisms were used for the collection of the clinical course, symptoms, past medical history and social history.
Symptomatic	Symptoms present during course of illness.
Symptoms Resolved	Did the patient's symptoms resolve?
Clinical Symptoms	Indicate the symptoms associated with this illness.
Clinical Symptoms Indicator	Indicator for each symptom.
Diagnostic	Select the diagnostic tests that were performed.
Diagnostic Result	Indicator for each diagnostic test result.
Treatment	Indicate the treatment received.
Treatment Indicator	Indicator for each treatment.
Days of Mechanical Ventilation	If patient received mechanical ventilation intubation, specify the total days of treatment.

Underlying Risk Factors	Specify any of the underlying medical conditions and/or risk behaviors.
Underlying Risk Factors Indicator	Indicator for each medical condition and risk behaviors.
Chronic Disease	If other chronic diseases, please specify.
Underlying Condition	If other underlying condition, please specify.
Risk Behavior	If other underlying risk behavior, please specify
Disability	If disability (neurologic, neurodevelopmental, intellectual, physical, vision or hearing impairment, please specify.
Psychological or Psychiatric Condition	If psychological or psychiatric condition, please specify.
Tribe Affiliation	Does this case have any tribal affiliation?
Tribe Name	If case has tribal affiliation, provide tribe name.
Tribe Enrolled Member	If case has tribal affiliation, indicate if case is an enrolled member.
Trimester at Onset of Illness	If the case-patient was pregnant at time of illness onset, indicate trimester of gestation at time of disease.
Number of Weeks Gestation at Onset of Illness	If the case-patient was pregnant at time of illness onset, specify the number of weeks gestation at onset of illness (1-45 weeks).
Exposure Indicator	Exposure indicator
Reason for Testing	Listing of the reason(s) the subject was tested for COVID-19
Secondary Diagnosis	Did the patient have another diagnosis/etiology for their illness?
Secondary Diagnosis Description	If patient had another diagnosis/etiology for their illness, specify the diagnosis or etiology
Clinical Finding	Clinical findings associated with the illness being reported
Clinical Finding Indicator	Indicator for associated clinical findings

Did the Subject Ever Receive a Vaccine Against This Disease	Did the subject ever receive a vaccine against this disease?
Vaccination Doses Prior to Onset	Number of vaccine doses against this disease prior to illness onset
Date of Last Dose Prior to Illness Onset	Date of last vaccine dose against this disease prior to illness onset
Vaccine History Comments	Comments about the subject's vaccination history
Date Left For Travel	Date left for travel
Date of Return from Travel	Date of return from travel
Primary Language	What's case's primary language?
	Please indicate for both hospitalized and not hospitalized cases.
Information Source for Data	Clinical information collected from which source(s)? Check all that apply
Did Underlying Condition(s) Exist	Did they have any underlying medical conditions and/or risk behaviors?
Previously Infected Individual	Did the subject meet the case definition for a previous case investigation of this disease or condition?
Previously Reported Jurisdiction Case Number	If the subject previously met the case definition for the disease or illness, what was the previously submitted sending system-assigned local ID (case ID) of the case investigation with which the subject is associated?
WGS_ID	Genomic sequencing ID number.

Description

Did/does the patient have a fever (specify max temp)?
Did/does the patient have a fever but temperature not taken?
Was cough a symptom?
Did/does the patient have a headache?
Did/does the patient have seizures?
Did/does the patient have a sore throat?
Did/does the patient have conjunctivitis?
Did/does the patient have shortness of breath?
Did/does the patient have shortness of breath?
Did/does the patient have any other symptoms (specify)?
Was the patient vaccinated against human influenza in the past year?
If yes, date of vaccination
If yes, type of vaccine received?
Did the patient receive antiviral medications?
What was the date that oseltamivir was intiated?
What was the date that oseltamivir was discontinued?
What was the dosage of oseltamivir?
What was the date that zanamivir was intiated?
What was the date that zanamivir was discontinued?
What was the dosage of zanamivir?
What was the date that rimantidine was intiated?
What was the date that rimantidine was discontinued?
What was the dosage of rimantidine?
What was the date that amantidine was intiated?
What was the date that amantidine was discontinued?
What was the dosage of amantidine?
What was the date that an other antiviral was intiated?
What was the date that an other antiviral was discontinued?
What was the dosage of an other antiviral?
Was leukopenia a lab finding?
Was lymphopenia a lab finding?
Was thrombocytopenia a lab finding?
Does the patient have any underlying medical conditions?
Does the patient have compromised immune function such as HIV infection, cancer, chronic corticosteroid therapy, diabetes, or organ transplant recipient?
If yes, specify function.

Did the patient require mechanical ventilation?
Did the patient have a chest x-ray or CAT scan performed?
If abnormal, was there evidence of pneumonia?
If abnormal, did the patient have acute respiratory distress syndrome??
Did the patient die a s a result of this illness?
What was the specimen type for diagnostic test 1?
Date of collection of specimen for test 1?
What is the test type for diagnostic test 1?
What was the specimen type for diagnostic test 2?

Date of collection of specimen for test 2?
What is the test type for diagnostic test 2?
Indicate when and what type of specimens (including sera) were sent to CDC
In the 10 days prior to illness onset, did the patient travel?
If yes, fill in the arrival and departure dates for all countries visited.
Did the patient have close contact with a person who is a suspected, probable,, or confirmed novel human influenza A case?
Did the patient touch animals or their remains in an area where influenza infection in animals or novel influenza in humans has been suspected or confirmed in the last month?
Was the patient exposed to animal remains in an area where influenza infection in animals or novel influenza in humans has been suspected or confirmed in the last month?
Was the patient exposed to environments contaminated by animal feces in an area where influenza infection in animals or novel influenza in humans has been suspected or confirmed in the last month?
Did the patient consume raw or undercooked animals in an area where influenza infection in animals or novel influenza in humans has been suspected or confirmed in the last month?
Did the patient have any animal contact (specify)?
Did the patient handle samples suspected of containing influenza virus in a laboratory or other setting?
Does the patient work in a healthcare facility or setting?
Did the patient visit or stay in the same household with anyone with pneumonia or severe influenza-like illness?
Did the patient visit or stay in the same household with anyone who died following thevisit?
Did the patient visit an agricultural event, farm, petting zoo, or place where pigs live or were exhibited in the last month?
Did the patient have direct contact with pigs at an agricultural event, farm, petting zoo, or place where pigs were exhibited in the last month?
If this patient has a diagnosis of novel influenza A virus infection that has not been serologically confirmed, is there an epidemiologic link between this patient and a lab-confirmed or probable novel influenza A case?

Description

Was an autopsy performed on the patient?
Did the patient experience cardiac/respiratory arrest outside the hospital?
What was the location of the patient's death?
If patient's death occurrred in a hospital, what was the date of admission?
Were pathology specimens sent to CDC's Infectious Diseases Pathology Branch?
Provide the lab ID number(if known) for pathology specimen(s) sent to CDC.
Were influenza isolates or original clinical material sent to CDC Influenza Division?
Provide the lab ID number(if known) for isolates/clinical specimen(s) sent to CDC.

Were staph aureus isolates sent to CDC's Healthcare Quality Promotion?
Provide the lab ID number(if known) for isolate(s) sent to CDC.
Indicate if commercial rapid test used.
What is the result of the rapid test?
What is the specimen collection date for the rapid test?

Indicate if viral culture used.
What is the result of the viral culture?
What is the specimen collection date for the viral culture?

Indicate if fluorescent antibody test used.
What is the result of the IFA/DFA?
What is the specimen collection date for the IFA/DFA?
Indicate if enzyme immunoassay used.
What is the result of the EIA?
What is the specimen collection date for the EIA?
Indicate if an RT-PCR test was used.
What is the result of the RT-PCR?
What is the specimen collection date for the RT-PCR?
Indicate if an immunohistochemistry test was used.
What is the result of the IHC?
What is the specimen collection date for the IHC?
Was a specimen collected for bacterial culture from a normally sterile site?
What was the specimen type obtained for the bacterial culture? This is a multi-select field.
What was the collection date for the bacterial culture?
What was the result of the bacterial culture?
If bacterial culture positive, check the organism cultured. This is a multi-select field.

Were other respiratory specimens from non-sterile site(s) collected for bacterial culture (e.g., sputum, ET tube aspirate)?
If yes, indicate the site from which the specimen was obtained. This is a multi-select field.
If yes, indicate the date collected of the specimen.
If yes, indicate the date collected of the specimen.

If yes, indicate the result for the specimen culture.

If positve, what was the organism cultured?
Was a specimen (e.g., fixed lung tissue) collected from an autopsy for bacterial pathogen testing?
If autopsy specimen was taken, what were the results (indicate in the comments section)?
Was the patient placed on mechanical ventilation?
Did complications occur during the acute illness?
If yes, check all complications that occurred during the acute illness. This is a multi-select field.
Did the child have any medical conditions that existed before the start of the acute illness?
If yes,check all medical conditions that exised before the start of the acute illness. This is a multi-select field
Was the patient receiving any of the listed therapies prior to illness onset?
Check all medications/therapies patient was receiving before the acute illness. This is a multi-select field.
Did the patient receive any of the following after illness onset? This is a multi-select field.
Did the patient receive any seasonal influenza vaccine during the current season (before illness)?
If yes, specify the seasonal vaccine received before illness onset.
If yes, did patient receive 1 dose of vaccine <14 days prior to illness onset (date given)?
If yes, did patient receive1 dose of vaccine ≥14 days prior to illness onset (date given)?

If yes, did patient receive vaccines <14 days prior to illness onset (dates given)?
If yes, did patient receive 2 doses of vaccines ≥14 days prior to illness onset (dates given)?
Did the patient receive any seasonal influenza vaccine in previous seasons?
If yes, and patient was between 6 months and ≤8 years of age at the time of death, was the 2009-2010 influenza season the first time the patient received seasonal influenza vaccine?
If yes, did patient receive 2 doses of seasonal influenza vaccine during the 2009-2010 influenza season?
If the patient was between 6 months and ≤8 years of age at the time of death, did they receive at least 1 dose of 2009 influenza A (H1N1) vaccine during the previous season?

Value Set Code. Search in PHIN VADS using the following link (https://phinvads.cdc.gov/vads/SearchHome.action)

Label/Short Name

Did the patient have a cough?
Cough Onset Date
Paroxysmal Cough
Whoop
Post-tussive Vomiting
Apnea
Date of Final Interview
Did the patient have a cough at final interview?
Total Cough Duration
Result of chest X-ray for pneumonia

Did the patient have generalized or focal seizures due to pertussis?
Did the patient have acute encephalopathy due to pertussis?
Were antibiotics given?
Antibiotic Name
Antibiotic Start Date
Number of days antibiotic actually taken.
Second antibiotic patient received?
Date second antibiotic started
Number of days second antibiotic actually taken
Was laboratory testing done for pertussis?
Test Type
Test Result
Date Collected
Did the subject ever receive a disease-containing vaccine?
Vaccine Administered
Vaccine Manufacturer
Vaccine Lot Number
Vaccine Administered Date
Is this case epi-linked to a laboratory-confirmed case?
Is this case part of a cluster or outbreak (e.g. total is 2 or more cases)?
Transmission Setting
Was there documented transmission from this case of pertussis to a new setting? (not in household)

Number of contacts of this case recommended to receive antibiotic prophylaxis
Age of person contracted patient contracted pertussis from
Age Type
Setting where patient contracted pertussis
Specify In which setting was pertussis acquired.
Specify In which setting was there secondary spread
Name Of Contacts
Birth Date of contacts
Contact Relationship to Subject

Case?
Contact Case ID

Cough Onset Date(If Present
Number of PCVs*
Date of Last PCV
Parent’s Name (If Applicable)
Parent’s Phone # (If Applicable)
Cyanosis
Treatment Drug, Other
Case patient a healthcare worker
Mother’s age at infant’s birth
Gestational age in weeks
Birth Weight
Birth Weight Units
Did mother receive Tdap?
Timing of mother's Tdap administration
Date of mother's Tdap administration
One or more suspected sources?
Number of suspected sources?
Suspected source sex
Suspected source relationship to case (other)
Patient Address City
Case Investigation Status Code
Detection Method
Age at cough onset
Age type at cough onset
Laboratory Confirmed

Vaccinated per ACIP recommendations
Reason not vaccinated per ACIP recommendations
Reason not vaccinated per ACIP, Other
Vaccine Administered Product Type, Other
NDC Brand Name/Bar Code information
Vaccine Product Manufacturer, Other
Vaccine Lot Expiration Date
Vaccination Record ID
Reason immunizaton not given, regardless of the schedule used
Other transmission setting
Setting of further spread
Suspected source relation to case
Estimated cough onset date of suspected source

Description

Did the patient's illness include the symptom of cough?
Cough onset date
Did the patient's illness include the symptom of paroxysmal cough?
Did the patient's illness include the symptom of whoop?
Did the patient's illness include the symptom of post-tussive vomiting?
Did the patient's illness include the symptom of apnea?
Date of the patient's final interview
Was there a cough at the patient's final interview?

What was the duration (in days) of the patient's cough?
Result of chest x-ray for pneumonia

Did the patient have generalized or focal seizures due to pertussis?

Did the patient have acute encephalopathy due to pertussis?

Were antibiotics given to the patient?
What antibiotic did the patient receive?
Date the patient first started taking the antibiotic
Number of days the patient actually took the antibiotic referenced

If Other, please specify antibiotic
Date second antibiotic started
Number of days second antibiotic actually taken

Was laboratory testing done for pertussis?

Epidemiologic interpretation of the type of test(s) performed for this case
Epidemiologic interpretation of the results of the tests performed for this case.
Date of specimen collection
Did the patient ever receive a pertussis-containing vaccine?

The type of vaccine administered.
Manufacturer of the vaccine.
The vaccine lot number of the vaccine administered.
The date that the vaccine was administered.
Is this case epi-linked to a laboratory-confirmed case?

Is this case part of a cluster or outbreak (e.g. total is 2 or more cases)?

Transmission setting (Where did this case acquire pertussis?)
Was there documented transmission (outside of the household) for transmission from this case?

Number of contacts of this case recommended to receive antibiotic prophylaxis

Age of the person from whom this patient contracted pertussis

Age Type
Transmission setting (Where did this patient acquire pertussis?)

setting in which pertussis was acquired

In which setting was there secondary spread

Name Of Contacts
Birth Date of contacts
Relationship of contact

Case
Unique case identifier of the contact. This would be the same as INV168 (Case Local ID)
Cough Onset Date(If Present
Number of PCVs*
Date of Last PCV
Parent's Name (If Applicable)
Parent's Phone # (If Applicable)
Did patient have cyanosis during his/her illness?
If other, specify antibiotic used
Was case patient healthcare personnel (HCP) (at illness onset)?
Mother's age at infant's birth (used only if patient under 12 months old)
Gestational age (if case-patient < 1 year of age at illness onset)
Infant's birth weight (used only if patient under 12 months old)
Infant's birth weight units
Did mother receive Tdap (if case-patient < 1 year of age at illness onset)?
If mother received Tdap, when was it administered?

If mother received Tdap, what date was it administered? *(if available)

Was there one or more suspected sources of infection? (from NBS MM)
Number of suspected sources? (from NBS MM)
Suspected source sex (from NBS MM)
Suspected source relationship to case (other)

Patient Address City, from NBS MM
Case Investigation Status Code, from NBS MM
Detection Method, from NBS MM
Age of patient at cough onset
Age units at cough onset
Was the case laboratory confirmed?
Was a specimen sent to CDC for testing?

What type of testing was done at CDC for this subject?
If other, specify testing done at CDC
Date specimen sent to CDC
VPD Lab Message Patient Identifier
VPD Lab Message Observation Identifier

VPD Lab Message Observation Value

If other, specify lab test
Specimen ID Placer Assigned Identifier

Specimen ID Filler Assigned Identifier

Performing Laboratory Type
If other, specify performing laboratory type
Numeric Result Value
The unit of measure for numeric result value.
Was subject vaccinated as recommended by ACIP?

Reason subject not vaccinated as recommended by ACIP

If other, specify reason not vaccinated per ACIP

If other, specify type of vaccine administered

NDC from the vaccine's bar code. With the NDC code, vaccine brand name and manufacturer can be obtained.
If other, specify vaccine manufacturer

Vaccine expiration date
Vaccination Record ID, from NBS MM
Reason subject was not vaccinated, regardless of the immunization schedule used

If other, specify the other transmission setting
If other, specify transmission setting of further spread
Suspexcted source of infection relationship to case

Estimated cough onset date of suspected source of infection

Label/Short Name	Description
Primary plague type	Classification of primary clinical manifestation of infection
Animal Contact	Contact with sick or dead animals
Flea bite	Flea bite
Immuncompromised	If patient has any immunocompromising conditions, specify
Date first medical	Date that the patient was first seen by medical person.
Fever/sweats/chills	Did the patient's illness include the symptom of fever/sweats/chills?
Confusion/delirium	Did the patient's illness include the symptom of confusion/delirium?
Vomiting/diarrhea/abdominal pain	Did the patient's illness include the symptom of vomiting/diarrhea/abdominal pain?
Sore throat	Did the patient's illness include the symptom of sore throat?
Cough	Did the patient's illness include the symptom of cough?
Chest Pain	Did the patient's illness include the symptom of chest pain?
Shortness of breath	Did the patient's illness include the symptom of shortness of breath?
Other_symptoms	Did the patient's illness include other symptoms of not listed?
Other_symptoms_specify	Which other symptoms did the patient's illness include?
Bubo	Did patient have bubo?
Type of Bubo	Specify type of bubo
Location/description Bubo	Describe location and appearance of bubo
Insect bites/skin ulcer	Did patient have any insect bites/skin ulcer
Location/description insect bites/skin ulcer	Describe location and appearance of insect bites/skin ulcer
Chest X-ray	Results of chest x-ray
Antibiotic	Did patient receive an effective antibiotic for illness?
Antibiotic start date	Date each antibiotic started
Illness outcome	Outcome of illness
Primary plague type	Classification of primary clinical manifestation of infection
Secondary pneumonic plague	Did patient have secondary pneumonic plague?
Y. pestis cultured	Was *Y. pestis* cultured?
Specimen source	Source of culture
Date specimen collected	Date specimen was collected
Y. pestis detected	Was *Y. pestis* detected by other tests?
Test performed	Test used to detect *Y. pestis*
Specimen source	Specimen source in which *Y. pestis* was detected
Date specimen collected	Date of specimen collection
Serology	Serology results
First Serum titer	Titer of first serum specimen
Second Serum titer	Titer of second serum specimen
Date first serum drawn	Date first serum drawn
Date second serum drawn	Date second serum drawn

Epi-linked to any other plague cases	Was this illness epi-linked to any other plague cases?
Likely location of exposure	Most likely location of exposure
Animal contact	Did patient have any animal contact in the 2 weeks preceding illness?
Nature of contact	Nature of animal contact in the 2 weeks preceding illness
Type of animal contact	Was animal domestic or wild
Flea bite or insect bites	Did patient have flea or insect bites in the 2 weeks preceding illness?
Wild animal	Specify wild animal that patient had contact with in the 2 weeks preceding illness
Domestic animal	Specify domestic animal that patient had contact with in the 2 weeks preceding illness
Evidence of infected animals or fleas	Evidence of infected animals or fleas in the likely exposure location
Specify infected animals or fleas	Describe evidnece of *Y. pestis* infected animals or fleas in likely exposure location
Other exposure	Specify any other exposures in the two weeks preceding illness
Comments	Additional comments
Person to person transmission	Evidence of person to person transmission from a known plague patient

Did case/household member travel to endemic/epidemic area(s)?

Locations of exposure of case/household member
Date of travel departure
Date of travel return
Was case/household members exposed to persons from or returning to endemic areas?
Locations of exposure to case/household member who traveled/is from endemic area

Date of travel departure of person to whom exposed
Date of travel return of person to whom exposed
Did case/household member have contact with known case?
Name of case contact (last, first)
Location of exposure to case?
Date of contact with known case
Did case have contact with OPV vaccine recipient
If yes, date of contact with household OVP vaccine
Relationship of household OVP vaccine recipient to case
Age of the OVP vaccine recipient
Agetype of the OVP vaccine recipient
Date contact received OVP vaccine
Number of doses of OVP vaccine received by contact
Lot number of OVP vaccine received by contact
Name of state or local laboratory which received serum specimens
Indicate whether P1, P2, or P3
Test type (neut/CSF)
Test result for serum 1
Date drawn/obtained for serum1
Indicate whether P1, P2, or P3
Test type (neut/CSF)
Test result for serum 2
Date drawn/obtained for serum 2
Results of specimen 1 sent for viral isolation
Name of laboratory which received specimens for viral isolation
Type specimen 1 submitted for viral isolation
Date drawn/obtained for specimen 1
Results of specimen 2 sent for viral isolation
Name of laboratory which received specimens for viral isolation
Type specimen 2 submitted for viral isolation
Date drawn/obtained for specimen 2
Indicate whether P1, P2, or P3 (serum sent to CDC lab)
Test type (neut/CSF for serum sent to CDC lab)
Test result for serum 1 (sent to CDC lab)
Date drawn/obtained for serum 1 (sent to CDC)
Indicate whether P1, P2, or P3
Test type (neut/CSF for serum sent to CDC lab))

Test result for serum 2 (sent to CDC lab)
Date drawn/obtained for serum 2 (sent to CDC lab)
Type specimen 1 submitted for viral isolation (to CDC lab)
Results of specimen 1 sent for viral isolation (to CDC lab)
Strain characterization results for specimen 1
Date specimen 1 received by CDC lab
Date specimen 1 obtained for CDC testing
Type specimen 2 submitted for viral isolation (to CDC lab)
Results of specimen 2 sent for viral isolation (to CDC lab)
Strain characterization results for specimen 2
Date specimen 2 received by CDC lab
Date specimen 2 obtained for CDC testing
Was an EMG performed?
What were the results of the EMG?
Indicate date of EMG.
Was a nerve conduction performed?
What were the results of the nerve conduction?
Indicate date of the nerve conduction.
Was an immune deficiency diagnosed prior to OPV exposure?
What was thespecific diagnosi?s
Indicate any immune studies performed
Wehat is the HIV status of the patient?

Description

Check all signs and symptoms listed below (note maximum temperature). Thi is a multi-select field.
Specify products, dosage, and duration.
What was the outcome of this illness?
If patient died, date of death.
What was the acute-phase serum test method?
What was the acute-phase serum collection date?
What was the acute-phase serum IgM result?
What was the acute-phase serum IgG result?
What was the laboratory name?
What was the convalescent-phase serum test method?
What was the convalescent-phase serum collection date?

What was the convalescent-phase serum IgM result?

What was the convalescent-phase serum IgG result?

What was the laboratory name?
What was the PCR test specimen type?
What was the PCR specimen collection date?
What was the PCR test result?
What was the laboratory name?
What was the sputum specimen collection date?
What was the sputum specimen test result?
What was the laboratory name?
Was a chest x-ray done?
When was the chest x-ray done?
What was the chest x-ray result?
What was the patient's occupation at date of onset?
What are/were the patient's specific duties?
Indicate which of the following contacts the patient had during the 5 weeks prior to onset.
If exposure to birds, did the patient have contact with psittacines (species, approx number and were birds healthy)?
If exposure to birds, did the patient have contact with pigeons (species, approx number and were birds healthy)?
If exposure to birds, did the patient have contact with domestic fowl (species, approx number and were birds healthy)?
If exposure to birds, did the patient have contact with any other birds (species, approx number and were birds healthy)?
If birds were not healthy, please elaborate.
Indicate the owner of the private home
Indicate the address of the private home
Indicate the species to which exposed
Indicate the exposure setting (indoor, outdoor)
Indicate the date of exposure

Indicate the owner of the aviary
Indicate the address of the aviary
Indicate the species to which exposed
Indicate the exposure setting (indoor, outdoor)
Indicate the date of exposure
Indicate the owner of the aviary
Indicate the address of the aviary
Indicate the species to which exposed
Indicate the exposure setting (indoor, outdoor)
Indicate the date of exposure
Indicate the owner of the pet shop
Indicate the address of the pet shop
Indicate the species to which exposed
Indicate the exposure setting (indoor, outdoor)
Indicate the date of exposure
Indicate the owner of the bird loft
Indicate the address of the bird loft
Indicate the species to which exposed
Indicate the exposure setting (indoor, outdoor)
Indicate the date of exposure
Indicate the owner of the establishment
Indicate the address of the establishment
Indicate the species to which exposed
Indicate the exposure setting (indoor, outdoor)
Indicate the date of exposure
Indicate the owner of the 'other'
Indicate the address of the 'other'
Indicate the species to which exposed
Indicate the exposure setting (indoor, outdoor)
Indicate the date of exposure
Indicate the owner unknown
Indicate the address unknown
Indicate if species to which exposed unknown
Indicate if exposure setting (indoor, outdoor) is unknown
Indicate if the date of exposure is unknown
Indicate if any other epi linkage (specify)
If pet birds, domestic pigeons, or fowl are implicated as the source of the human psittacosis, list address of every known place where the birds were harbored and approx dates.
Indicate any additional revelant information
Indicate what symptoms of interest the patient had during the course of the illness

Indicator for associated sign and symptom
What was the subject's highest measured temperature during this illness?
Units for highest measured temperature
Did the subject take antibiotics as treatment for this illness?
Start date of antibiotic
Stop date of antibiotic

Number of days the patient actually took the antibiotic
During any part of the hospitalization, did the subject stay in an Intensive Care Unit (ICU) or a Critical Care Unit (CCU)?
Was laboratory testing done to confirm the diagnosis?
Was the case laboratory confirmed?
Test Manufacturer
Type of autopsy specimen
Autopsy result
Date of autopsy (date autopsy specimen collected)
Autopsy Laboratory Name
Industry at date of onset
At the time of exposure, which of the following personal protective equipment was used by the patient?
If respiratory protective equipment was used at the time of exposure, specify what kind
Does the patient get annual respirator fit testing and training?

If gloves were used, specify glove material
Indicate which of the following contacts patient had during 5 weeks prior to onset
What type of bird did the patient have contact with during the 5 weeks prior to onset?

Bird species
Approximate number of birds
Illness onset age
Illness onset age units

Description

Did the case work in a wool or felt plant
Did the case work in a tannery or rendering plant
Did the case work in a dairy
Did the case work as a veterinarian
Did the case work as a medical researcher
Did the case work as an animal researcher
Did the case work in a slaughterhouse
Did the case work in a laboratory
Did the case work as a rancher
Did the case live in a household with someone who may have one of the above occupational exposures
Did the case work in the military
Indicate the case's occupation if none of the above
Did the case have contact with cattle within two months of illness onset
Did the case have contact with sheep within two months of illness onset
Did the case have contact with goats within two months of illness onset
Did the case have contact with pigeons within two months of illness onset
Did the case have contact with cats within two months of illness onset
Did the case have contact with rabbits within two months of illness onset
Indicate any other animals the case had contact within within two months of illness onset
Was the case exposed to birthing animals within two months of illness onset
Was the case exposed to unpasteurized milk within two months of illness onset
If the case was exposed to unpasteurized milk, what animal was the milk from
Was another family member ill with a similar illness within the last year
Did the case report a fever of at least 100.5 during this illness
Did the case report myalgia during this illness
Did the case report retro orbital pain during this illness
Did the case report malaise during this illness
Did the case report a rash during this illness
Did the case report a coughduring this illness
Did the case report a headache during this illness
Did the case report splenomegaly during this illness
Did the case report hepatomegaly during this illness
Did the case report pneumonia during this illness
Did the case report hepatitis during this illness
Did the case report endocarditis during this illness
If there were other signs or symptoms reported, the indicate them here
Did the case report a pre-existing immunocompromised system
Was the case pregnant during this illness
Did the case have a pre-existing valvular heart disease or graft
If the case had nother pre-existing medical conditions, then list them here

Indicate the name of the laboratory which supplied results supporting the current CSTE case definitions.
Indicate the state where the laboratory is located

If acute phase I serology was performed, then list the date of collection

If performed, was the acute phase I IFA IgG positive
If performed, what was the reciprocal titer of the acute phase I IFA IgG
If performed, was the acute phase I IFA IgM positive
If performed, what was the reciprocal titer of the acute phase I IFA IgM
If performed, was the acute phase I compliment fixation positive

If performed, what was the reciprocal titer of the acute phase I compliment fixation

If performed, what was the name of another phase I acute serologic test
If performed, was the other phase I acute serologic test positive
If performed, what was the numeric result of the other phase I acute serologic test

If acute phase II serology was performed, then list the date of collection

If performed, was the acute phase II IFA IgG positive
If performed, what was the reciprocal titer of the acute phase II IFA IgG
If performed, was the acute phase II IFA IgM positive
If performed, what was the reciprocal titer of the acute phase II IFA IgM
If performed, was the acute phase II compliment fixation positive

If performed, what was the reciprocal titer of the acute phase II compliment fixation

If performed, what was the name of another phase II acute serologic test
If performed, was the other phase II acute serologic test positive
If performed, what was the numeric result of the other phase II acute serologic test

If convalescent phase I serology was performed, then list the date of collection

If performed, was the convalescent phase I IFA IgG positive
If performed, what was the reciprocal titer of the convalescent phase I IFA IgG
If performed, was the convalescent phase I IFA IgM positive

If performed, what was the reciprocal titer of the convalescent phase I IFA IgM
If performed, was the convalescent phase I compliment fixation positive

If performed, what was the reciprocal titer of the convalescent phase I compliment fixation
If performed, what was the name of another phase I convalescent serologic test

If performed, was the other phase I convalescent serologic test positive

If performed, what was the numeric result of the other phase I convalescent serologic test
If convalescent phase II serology was performed, then list the date of collection

If performed, was the convalescent phase II IFA IgG positive

If performed, what was the reciprocal titer of the convalescent phase II IFA IgG
If performed, was the convalescent phase II IFA IgM positive

If performed, what was the reciprocal titer of the convalescent phase II IFA IgM
If performed, was the convalescent phase II compliment fixation positive

If performed, what was the reciprocal titer of the convalescent phase II compliment fixation
If performed, what was the name of another phase II convalescent serologic test

If performed, was the other phase II convalescent serologic test positive

If performed, what was the numeric result of the other phase II convalescent serologic test
If paired sera were collected, was there a fourfold change in titer between acute and convalescent of the same phase
If performed, was the polymerase chain reaction assay positive
If performed, were antibodies detected using immunohistochemistry during microscopy
If performed, was the etiologic agent isolated from culture

Description

If <6 years of age, is the patient in daycare?
Name of the daycare facility.
Does the patient reside in a nursing home or other chronic care facility?
Name of the nursing home or chronic care facility.
Types of infection that are caused by the organism. This is a multi-select field.
Other infection that is caused by the organism.
Bacterial species that was isolated from any normally sterile site.
Other bacterial species that was isolated from any normally sterile site.
Sterile sites from which the organism was isolated. This is a multi-select field.
Other sterile site from which the organism was isolated.
Date the first positive culture was obtained. (This is considered diagnosis date.)
Nonsterile sites from which the organism was isolated. This is a multi-select field.
Did the patient have any underlying conditions?
Underlying conditions that the subject has. This is a multi-select field.
Other malignancy that the subject had as an underlying condition.
Detail of the organ transplant that the subject had as an underlying condition.
Other prior illness that the subject had as an underlying condition.
Another Bacterial Species not listed in the Other Bacterial Species drop-down list.
Internal Body Site where the organism was located.
Other prior illness that the subject had as an underlying condition.
Other prior illness that the subject had as an underlying condition.
Other nonsterile site from which the organism was isolated.
Patient's type of insurance (multi-selection).
Patient's other type of insurance.
Weight of the patient in pounds.
Weight of the patient in ounces.
Weight of the patient in kilograms.
Height of the patient in feet.
Height of the patient in inches.
Height of the patient in centimeters.
Indicator that the weight of the patient is unknown.
Indicator that the height of the patient is unknown.
Did the patient have surgery?
Date of the surgery
Did the patient have a baby (vaginal or C-section)?
Date of the baby's delivery
Did the patient have other prior conditions? This is a multi-select field.

Description

Did the subject being reported in this investigation have a rash?
What was the rash onset date?
How many days did the rash last?
Did rash onset occur 14-23 days after entering USA, following any travel or living outside the USA?
Did the subject have a fever? i.e., a measured temperature >2 degrees above normal

What was the person's highest measured temperature during this illness?
The units of measure of the highest measured temperature. This would be either Fahrenheit or Celsius.
Date of fever onset
Did the Subject have arthralgia/arthritis (symptom)?
Did the Subject have lymphadenopathy (symptom)?
Did the Subject have conjunctivitis (symptom)?
Did the person develop encephalitis as a complication of this illness?

Did the person develop thrombocytopenia as a complication of this illness?

Did Subject have arthralgia/arthritis (complication)?
Did the person develop an other condition(s) as a complication of this illness?
Please specify the other complication(s) the person developed, during or as a result of this illness.
Cause of subject's death
Was laboratory testing done for rubella?

Epidemiologic interpretation of the type of test(s) performed for this case
Epidemiologic interpretation of the results of the tests performed for this case
The date the specimen/isolate was tested
The technique or method used to perform the test and obtain the test results
Date of specimen collection
The medium from which the specimen originated
Were clinical specimens sent to CDC laboratories for genotyping (molecular typing)?

Specimen type sent to CDC for genotyping

The date the specimens were sent to the CDC laboratories for genotyping
Identifies whether the Rubella virus was genotype sequenced.
Identifies the genotype sequence of the Rubella virus
What was the transmission setting where the Rubella was acquired?
Does the age of the case match or make sense for the transmission setting listed (i.e.) a person aged 80 probably would not have a transmission setting of child day care center?
What was the source of the Rubella infection?
Specify if this case is Epidemiologically-linked to another confirmed or probable case of Rubella?

Identifies whether the Rubella case was traceable (linked) to an international import.

What is the expected delivery date of this pregnancy?
Expected place of delivery
Number of weeks gestation at time of rubella disease

Trimester of gestation at time of rubella disease

Is there documentation of previous rubella immunity testing?

Result of previous immunity testing

Year of previous immunity testing
Age of Subject at time of immunity testing

Did the Subject ever have rubella disease prior to this pregnancy?

Was previous rubella disease serologically confirmed?

If previous rubella was serologically confirmed, what was the year of previous disease?

If previous rubella was serologically confirmed, what was the age of the Subject at time of previous disease?
What was the outcome of the current pregnancy?
If applicable, at the time of cessation of pregnancy, what was the age of the fetus (in weeks)?

Was an autopsy performed on the subject's body?
The final anatomical cause of subject's death

Did the Subject ever receive rubella-containing vaccine?

If the subject did not receive a rubella-containing vaccine, what was the reason?

Number of rubella-containing vaccine doses Subject received ON or AFTER first birthday
The type of vaccine administered, (e.g., Varivax, MMRV). First question of a repeating group of vaccine questions.
Manufacturer of the vaccine. Second question of a repeating group of vaccine questions.
The vaccine lot number of the vaccine administered. Third question of a repeating group of vaccine questions.
The date that the vaccine was administered. Fourth question of a repeating group of vaccine questions.
Sub-classification of disease or condition acquired in the US

Is this case part of an outbreak of 3 or more

Date of return from most recent travel
Was the case patient a healthcare provider (HCP) at illness onset?
Who diagnosed previous case?
Number of vaccine doses against this disease prior to illness onset
Date of last vaccine dose against this disease prior to illness onset

Comments about the subject's vaccination history
Age at rash onset
Age units at rash onset
Age units at previous diagnosis
Length of time in U.S.
Length of time in U.S. Units
List any international destinations of recent travel.

Reason for travel related to current illness

Description

What was the result of specimen testing using an antigen-based test (e.g. EIA or lateral flow) at a clinical laboratory?
Name of antigen-based test used at clinical laboratory
Age of case-patient in months if patient is <1yr
Age of case-patient in years
What was the result of specimen testing using an antigen-based test (e.g. EIA or lateral flow) at a state public health laboratory?
Name of antigen-based test used at state public health laboratory
Was the pathogen identified by culture?
Did the case-patient have bloody diarrhea (self reported) during this illness?
Did the case-patient have diarrhea (self-reported) during this illness?
Date of hospital admission for second hospitalization for this illness
Date of hospital discharge for second hospitalization for this illness
Date case was entered into site's database
Date case-pateint's specimen was received in laboratory for initial testing
Date case report form was completed
Case-patient's specimen collection date
If case-patient patient traveled internationally, date of departure from the U.S.
If case-patient traveled internationally, date of return to the U.S.
CDC FDOSS outbreak ID number
Did the case-patient have fever (self-reported) during this illness?
If case-patient was hospitalized, was s/he transferred to another hospital?
Did case-patient immigrate to the U.S.? (within 7 days of illness onset)
Was the case-patient interviewed by public health (i.e. state or local health department) ?
Name of submitting laboratory
Ccase-patient's medical record number
What was the result of specimen testing using another test at CDC?
What was the result of specimen testing using another test at a clinical laboratory?

Name of other test used at a clinical laboratory
What was the result of specimen testing using another test at a state public health laboratory?
Name of other test used at a state public health laboratory
Type of outbreak that the case-patient was part of
Case-patient identification number
What was the result of specimen testing for diagnosis using PCR at CDC? (Do not enter PCR results if PCR was performed for speciation or subtyping).
What was the result of specimen testing using PCR at a clinical laboratory? (where goal of testing is primary detection not subtyping or speciation)
Name of PCR assay used
What was the result of specimen testing for diagnosis using PCR at the state public health laboratory? (Do not enter PCR results if PCR was performed for speciation or subtyping).
Unique identification number for person or patient

Unique identifier for laboratory result
Is all of the information for this case complete?
Salmonella serogroup
Was specimen or isolate forwarded to CDC for testing or confirmation?
Serotype/species of pathogen
State lab identification number
Case patient's specimen collection source
Was the isolate sent to a state public health laboratory? (Answer 'Yes' if it was sent to any state lab, even if it was sent to a lab outside of the case's state of residence)

If case-patient traveled internationally, to where did they travel?
Did the case patient travel internationally? (within 7 days of onset)
In the 7 days before illness, would you/your child have traveled within the US but outside of the area where you live or work?
How many times would you/your child have eaten out (deli, fast food, or other restaurant)?
Would you/your child, or anyone in your household, have handled raw chicken in the home?
How many times would you/your child have eaten chicken or any foods containing chicken?
In the 7 days before illness, would you/your child have eaten any chicken that was raw or undercooked?
In the 7 days before illness, would you/your child have eaten any ground chicken?
In the 7 days before illness, would you/your child have eaten any whole or cut chicken parts (e.g., rotisserie, chicken breasts, wings, etc.)?
In the 7 days before illness, would you/your child have eaten any processed chicken (e.g., deli meat, chicken nuggets, pre-made dinners, etc.)?
In the 7 days before illness, would you/your child have eaten any chicken made outside of home (deli, fast food, take-out, or restaurant)?**
In the 7 days before illness, would you/your child have eaten any chicken made at home?
Was the chicken bought fresh (refrigerated)? (Answer if Yes to Q56)
Was the chicken bought frozen? (Answer if Yes to Q56)
Would you/your child, or anyone in your household, have handled raw turkey in the home?
In the 7 days before illness, would you/your child have eaten any turkey or any foods containing turkey?
In the 7 days before illness, would you/your child have eaten any turkey that was undercooked or raw?
In the 7 days before illness, would you/your child have eaten any ground turkey?
In the 7 days before illness, would you/your child have eaten any whole or cut turkey parts?
In the 7 days before illness, would you/your child have eaten any processed turkey (e.g., deli meat, bacon, sausage, pre-made dinners, etc.)?**
In the 7 days before illness, would you/your child have eaten any turkey made outside of home (deli, fast food, take-out, or restaurant)?
In the 7 days before illness, would you/your child have eaten any turkey made at home?

In the 7 days before illness, would you/your child have eaten any poultry other than chicken or turkey (e.g., duck, cornish hens, quail, etc.)?
Would you/your child, or anyone in household, have handled raw beef in the home?

In the 7 days before illness, would you/your child have eaten beef or any foods containing beef?
In the 7 days before illness, would you/your child have eaten any beef that was undercooked or raw?
In the 7 days before illness, would you/your child have eaten any ground beef?
In the 7 days before illness, would you/your child have eaten any whole or cut beef parts (e.g., steaks, roasts, etc.)?
In the 7 days before illness, would you/your child have eaten any processed beef (e.g., deli meat, sausage, jerky, pre-made dinners, etc.)?
In the 7 days before illness, would you/your child have eaten any beef made outside of home (deli, fast food, take-out, or restaurant)?
In the 7 days before illness, would you/your child have eaten any beef made at home?

Was the beef bought fresh (refrigerated)? (Answer if Yes to Q75)
Was the beef bought frozen? (Answer if Yes to Q75)
Would you/your child, or anyone in your household, have handled raw pork in the home?
In the 7 days before illness, would you/your child have eaten pork or any foods containing pork?
In the 7 days before illness, would you/your child have eaten any undercooked or raw pork?
In the 7 days before illness, would you/your child have eaten any whole or cut pork parts (e.g., ham shank, pork chops, chitlins, etc.)?
In the 7 days before illness, would you/your child have eaten any processed pork (e.g., deli meat [like ham slices], bacon, sausage, etc.)?**
In the 7 days before illness, would you/your child have eaten any lamb?
In the 7 days before illness, would you/your child have eaten any non-fish seafood (e.g., crab, shrimp, oysters, clams, etc.) that was not from a can?
In the 7 days before illness, would you/your child have eaten any non-fish seafood that was undercooked or raw (e.g., raw oysters, clams, etc.)?
In the 7 days before illness, would you/your child have eaten any fish or fish products (processed or unprocessed) that was not from a can?
In the 7 days before illness, would you/your child have eaten any fish that was undercooked or raw (e.g., sushi, etc.)?
In the 7 days before illness, would you/your child have eaten any whole fish or fish filets (unprocessed fish)?
In the 7 days before illness, would you/your child have eaten eggs or any foods containing eggs?
In the 7 days before illness, would you/your child have eaten any eggs made away outside of home (deli, fast food, take-out, or restaurant)?**
In the 7 days before illness, would you/your child have eaten any eggs made at home?

In the 7 days before illness, would you/your child have eaten any eggs that were runny or raw, or uncooked foods made with raw eggs?

In the 7 days before illness, would you/your child have eaten or drank any dairy products (e.g., milk, yogurt, cheese, ice cream, etc.)?

In the 7 days before illness, would you/your child have eaten any queso fresco, queso blanco, or other type of Mexican-style soft cheese?

...eaten or drank any dairy products that were raw or unpasteurized (e.g., raw milk, or cheeses, yogurts, and ice cream made from raw milk)?

In the 7 days before illness, would you/your child have eaten any fresh cantaloupe?

In the 7 days before illness, would you/your child have eaten any fresh (unfrozen) strawberries?

In the 7 days before illness, would you/your child have eaten any other fresh (unfrozen) berries?

In the 7 days before illness, would you/your child have eaten any fresh watermelon?

In the 7 days before illness, would you/your child have eaten any fresh apples?

In the 7 days before illness, would you/your child have eaten any fresh honeydew melon?

In the 7 days before illness, would you/your child have eaten any fresh pineapple?

In the 7 days before illness, would you/your child have drank any unpasteurized juice or cider?

In the 7 days before illness, would you/your child have eaten any other fruit (fresh or frozen) or drank other fruit juices?

In the 7 days before illness, would you/your child have eaten any raw or uncooked nuts?

In the 7 days before illness, would you/your child have eaten any fresh, raw lettuce?

In the 7 days before illness, would you/your child have eaten any fresh, raw cabbage?

In the 7 days before illness, would you/your child have eaten any fresh (unfrozen), raw spinach?

In the 7 days before illness, would you/your child have eaten any fresh (unfrozen), raw broccoli?

In the 7 days before illness, would you/your child have eaten any fresh, raw tomatoes?

In the 7 days before illness, would you/your child have eaten any fresh (unfrozen), raw onions?

In the 7 days before illness, would you/your child have eaten any fresh (unfrozen), raw carrots?

In the 7 days before illness, would you/your child have eaten any fresh, raw sprouts?

In the 7 days before illness, would you/your child have eaten any fresh (not dried) herbs?

In the 7 days before illness, would you/your child have eaten any other vegetables (fresh or frozen) or drank any vegetable juices?

If you are answering for an ill infant aged 1 year or younger, are they drinking infant formula?

If you are answering for an ill infant aged 1 year or younger, are they drinking breast milk?

If you are answering for an ill infant aged 1 year or younger, are they drinking any other milk?
In the 7 days before illness, would you/your child have drank any water from a well?

In the 7 days before illness, would you/your child have swallowed or drank any water directly from a natural spring, lake, pond, stream, or river?
In the 7 days before illness, would you/your child have swam in, waded in, or entered an ocean, lake, pond, river, stream, or natural spring?
Was there a household member or a close contact with diarrhea?
In the 7 days before illness, would you/your child have had contact with dirty diapers?

In the 7 days before illness, would you/your child have lived, worked, or volunteered in a shared living facility (e.g., dorm, nursing home, etc.)?
Would you/your child, or anyone in your house, have attended, worked, or volunteered at a day care?
In the 7 days before illness, would you/your child have had any contact with a pet that had diarrhea?
In the 7 days before illness, would you/your child have had any contact with a reptile or amphibian (e.g., frog, snake, turtle, etc.)?
In the 7 days before illness, would you/your child have done any hiking, camping, gardening, or yard work?
In the 7 days before illness, would you/your child have had any contact with animal manure, pet feces, or compost?
In the 7 days before illness, would you/your child have visited, worked, or lived on farm, ranch, petting zoo, or other setting that has farm animals?
Were there any live poultry (e.g., chickens, turkeys, hens, etc.)? (Answer if Yes to Q130)
Were there any cattle, goats, or sheep? (Answer if Yes to Q130)
Were there any other farm animals (e.g., pigs, horses, etc.)? (Answer if Yes to Q130)

Notes

Description

Did the patient have a fever (subjective or objective)?
If yas, date of fever onest
Was the measured temperature >38°C?
Did the patient have any lower respiratory symptoms (e.g., a cough, shortness of breath, difficulty breathing?)?
Was a chest x-ray or CAT scan performed?
If yes, did the patient have radiographic evidence of pneumonia or respiratory distress syndrome?
Indicate date of the first evaluation for this illness.
Was patient hospitalized for >24 hours during the course?
If yes, indicate the name of the hospital
If yes, indicate the city of the hospital
If yes, indicate the state of the hospital
Indicate date of hospitalization
Indicate date of hospital discharge
Was trhe patient ever admitted to the intensive care unit (ICU)?
Was the patient ever placed on mechanical ventilation?
Did the patient die as a result of his /her illness?
Indicate date of death
Was an autopsy performed?
Was pathology consistent with pneumonia or RDS?
Is the patient a healthcare worker?
If so, indicate type of HCW (physician, nurse/PA, lab, other [specify])
Does patient have DIRECT patient care responsibilities?
If not a HCW, list occupation.
In the 10 days prior to symptom onset did the patient have close contact with a confirmed or probable SARS-CoV case?
In the 10 days prior to symptom onset did the patient have close contact with a person considered an RUI-2 or RUI-3?
In the 10 days prior to symptom onset did the patient have travel to foreign or domestic area with documented or suspected recent local transmissionof SARS cases?

If yes, list travel destinations (departure and arrival dates).
Classification of contact (RUI-2w, RUI-3, probable SARS-CoV, confirmed SARS-CoV).
Nature of contact (same household, coworker, HC environment, other).
Date contact started
Date contact ended
Did the ill contact recently travel to an area with SARS transmission (specify where)?

Contact CDC ID
Contact State ID
If CDC ID or State ID unavailable ((first, middle initial, last)
If recent foreign travel, did the patient recive a health Alert or other SARS educational information on arrival in the U.S?
Was the patient symptomatic during the travel from a SARS affected area within 24 hours of return to the U.S or local area?

If yes, provide to the CDC the name of the SARS suspect who has traveled (enter name)

If yes, indicate public conveyance departure date
If yes, indicate public conveyance departure city

If yes, indicate public conveyance arrival city

Public conveyance transport type (airline, train, cruise, bus, auto, tour grp, other)
Name of transport company
Indicate transport number

Patient's intial classification by state of municipality (RUI-1, RUI-2, RUI-3, RUI-4, or probable SARS-CoV, confirmed SARS-CoV)
Patient's updated classification(RUI-1, RUI-2, RUI-3, RUI-4, probable SARS-CoV, confirmed SARS-CoV, not a case: negative serology, not a case: alternative diagnosis accounts for illness)
Most recent updated classification
Enter specimen for each test (whole blood, serum [acute and/or convalescent],NP swab, NP aspirate, broncheoalveolar lavage, OP swab, urine, stool, tissue [specify tissue type])

Description

The unique identifier for the notification record
CDC's PHIN Common Data Store (CDS) is the Receiving Application for this message.

First instance is the reference to the structural specification used to validate the message.

Second instance is the reference to the PHIN Message Mapping Guide from which the content is derived.
The local ID of the subject/entity.
Name is not requested by the program, but the Patient Name field is required to be populated for the HL7 message to be valid. Have adopted the HL7 convention for processing a field where the name has been removed for de-identification purposes.

Sending system-assigned local ID of the case investigation with which the subject is associated.

Note: The local record ID should be the unique identifier for the case being reported.

Type of subject for the notification. "Person," "Place/Location," or "Non-Person Living Subject" are the appropriate subject types for Notifications to CDC.
Type of notification. Notification types are "Individual Case," "Environmental," "Summary," and "Laboratory Report".
Date/time the notification was first sent to CDC. This value does not change after the original notification.
Date/time this version of the notification was sent. It will be the same value as NOT103 for the original notification. For updates, this is the update/send date/time.

Status of the notification.
Does this case meet the criteria for immediate (extremely urgent or urgent) notification to CDC?
State reporting the notification.
County reporting the notification.
National jurisdiction reporting the notification to CDC.
Condition or event that constitutes the reason the notification is being sent
Date of birth in YYYYMMDD format
Subject's current sex
Field containing one or more codes that broadly refer to the subject's race(s).
County of residence of the subject
State of residence of the subject
ZIP Code of residence of the subject
Based on the self-identity of the subject as Hispanic or Latino
Country of Birth

Census tract where the address is located is a unique identifier associated with a small statistical subdivision of a county. Census tract data allows a user to find population and housing statistics about a specific part of an urban area. A single community may be composed of several census tracts.
Where does the person usually* live (defined as their residence)

*For the definition of 'usual residence' refer to CSTE position statement # 11-SI-04 titled "Revised Guidelines for Determining Residency for Disease Reporting" at http://www.cste.org/ps2011/11-SI-04.pdf .
Identifier for the physical site from which the notification is being submitted.
Status of the investigation
Date the investigator was assigned to this investigation.
Date the event or illness was first reported by the reporting source (physician or lab reported to the local/county/state health department).
Type of facility or provider associated with the source of information sent to Public Health.
ZIP Code of the reporting source for this case.
Earliest date reported to county public health system
Earliest date reported to state public health system
Was subject hospitalized because of this event?
Subject's admission date to the hospital for the condition covered by the investigation.

Subject's discharge date from the hospital for the condition covered by the investigation.
Subject's duration of stay at the hospital for the condition covered by the investigation.

Date of diagnosis of condition being reported to public health system
Date of the beginning of the illness. Reported date of the onset of symptoms of the condition being reported to the public health system
Time at which the disease or condition ends.
Length of time this subject had this disease or condition.
Unit of time used to describe the length of the illness or condition.
Did the subject die from this illness or complications of this illness?

If the subject died from this illness or complications associated with this illness, indicate the date of death
The date the case investigation was initiated.
Denotes whether the reported case was associated with an identified outbreak.
A state-assigned name for an indentified outbreak.
Indication of where the disease/condition was likely acquired.
If the disease or condition was imported, indicates the country in which the disease was likely acquired.
If the disease or condition was imported, indicates the state in which the disease was likely acquired.
If the disease or condition was imported, indicates the city in which the disease was likely acquired.
If the disease or condition was imported, contains the county of origin of the disease or condition.

Code for the mechanism by which disease or condition was acquired by the subject of the investigation.
Status of the case/event as suspect, probable, confirmed, or not a case per CSTE/CDC/ surveillance case definitions.
MMWR Week for which case information is to be counted for MMWR publication.
MMWR Year (YYYY) for which case information is to be counted for MMWR publication.
States use this field to link NEDSS investigations back to their own state investigations.

Note: This may be any state-assigned ID number for the case; may be different than INV168, which is the system-assigned unique identified for the 'case' of disease being reported.

Date the case was first reported to the CDC
Earliest date the case was reported to the public health department whether at the local, county, or state public health level.
Indicates whether the subject was pregnant at the time of the event.
Name of the person who is reporting the case to the CDC
Phone Number of the person who is reporting the case to the CDC

Job title / description of the person reporting the case to the CDC
Affiliated Facility of the person reporting the case to the CDC

CDC uses this field to link current case notifications to case notifications submitted by a previous system (NETSS, STD-MIS, etc.)
Subject age at time of case investigation
Subject age units at time of case investigation
Indicates the country in which the disease was potentially acquired.

Indicates the state in which the disease was potentially acquired.

Business Rule: If Country of exposure was US, populate with US State. If Country of exposure was Mexico, populate with Mexican State. If country of exposure was Canada, populated with Canadian Province. For all other countries, leave null.
Indicates the city in which the disease was potentially acquired.

Business Rule: If country of exposure is US, populate with US city. For all other cities, can be populated but not required.
Note: Since value set only includes US cities, would allow states to populate the CWE 9th component with another city.
Indicates the county in which the disease was potentially acquired.

Business Rule: If country of exposure is US, populate with US county. Otherwise, leave null.

For cases meeting the binational criteria, select all the criteria which are met
Date of earliest healthcare encounter/visit /exam associated with this event/case report. May equate with date of exam or date of diagnosis.

If event = some stage of syphilis, does the patient have neurologic involvement based on current case definition?
Date treatment initiated for the condition that is the subject of this case report.
Documented or self-reported HIV status at the time of event.

Had sex with a male within past 12 months?

Had sex with a female within past 12 months?

Had sex with an anonymous partner within past 12 months?

Had sex with a person known to him/her to be an IDU within past 12 months?

Had sex while intoxicated and/or high on drugs within past 12 months?

Exchanged drugs/money for sex within past 12 months?

Had sex with a person who is known to her to be an MSM within past 12 months?
NOTE: For women only.

Engaged in injection drug use within past 12 months?

During the past 12 months, which of the following injection or non-injection drugs have been used?

Does the patient have a history of ever having had an STD prior to the condition reported in this case report?
Been incarcerated within past 12 months?

Did the patient use an online computer site to exchange messages by typing them onscreen to engage in conversation with other visitors to the site for the purpose of having sex?
Total number of sex partners that the case patient has had in the last 12 months. Total partners equal the sum of all male, female, and transgender partners during the period.
If condition = any stage of syphilis, report anatomic site(s) of clinician-observed lesion(s) (e.g., chancre, rash, condyloma lata) at time of initial exam or specimen collection. Mark all that apply.
What type of non-treponemal serologic test for syphilis was performed on specimen collected to support case patient's diagnosis of syphilis?

If the test performed provides a quantifiable result, provide quantitative result (e.g. if RPR is positive, provide titer, e.g. 1:64)
Example: If titer is 1:64, enter 64; if titer is 1:1024, enter 1024.
Patient refused to answer questions regarding number of sex partners

Unknown number of sex partners in last 12 months

Date of collection of initial laboratory specimen used for diagnosis of health event reported in this case report. PREFERRED date for assignment of MMWR week. First date in hierarchy of date types associated with case report/event.
Anatomic site or specimen type from which positive lab specimen was collected.

Date result sent from Reporting Laboratory.
Was the HIV status of this case investigated through search of eHARS?

Stateno from eHARS registry for HIV+ cases.
Mode of exposure from eHARS for HIV+ cases.

Was this case selected by reporting jurisdiction for enhanced investigarion?

How case patient first came to the attention of the health department for this condition
What type of treponemal serologic test for syphilis was performed on specimen collected to support case patient's diagnosis of syphilis?
represents # of cases reported in this ‘record’; supports aggregate-(when >1) or case-specific (when=1) reporting.
date of disease in YYMMDD format. This date depends upon how case dates are assigned in the STD program. i.e., date could be the onset of symptoms date, diagnosis date, laboratory result date, date case first recognized and/or reported to STD program, or date case reported to CDC.
describes the type of date provided in Event date

What version of the NETSS record layout are you providing?
STD-Associated Lab Tests
STD-Associated Lab Results

Injection or non-injection drug use indicator

If the test performed provides a quantifiable result, provide quantitative result (e.g. if RPR is positive, provide titer, e.g. 1:64)
Example: If titer is 1:64, enter 64; if titer is 1:1024, enter 1024.
Qualitative test result of STD123 Nontreponemal serologic syphilis test result (quantitative)
If the test performed provides a qualitative result, provide qualitative result, e.g. weakly reactive.
Neurological manifestations of disease

Infection of any eye structure with T. pallidum, as evidenced by manifestations including posterior uveitis, panuveitis, anterior uveitis, optic neuropathy, and retinal vasculitis.

Infection of the cochleovestibular system with T. pallidum, as evidenced by manifestations including sensorineural hearing loss, tinnitus, and vertigo.

Late clinical manifestations of syphilis (tertiary syphilis) may include inflammatory lesions of the cardiovascular system, skin, bone, or other tissue. Certain neurologic manifestations (e.g., general paresis and tabes dorsalis) are late clinical manifestations of syphilis.

Patient identified as transgender (i.e., an individual’s personal sense of being male, female, or transgender).

Patient identified sexual orientation (i.e., an individual's physical and/or emotional attraction to another individual of the same gender, opposite gender, or both genders).

Date treatment associated with the condition was prescribed

Date treatment associated with the condition was administered

Name of the antibiotic administered

Dose of the antibiotic administered

Prescribed duration of antibiotic

Complications associated with the illness being reported

Indicator for associated complication

Dose of the treatment associated with the condition

Unit of measure for the treatment associated with the condition

Route of delivery of treatment

Frequency of treatment drug

Unit of measure for the frequency of treatment associated with the condition

Unit of measure for the duration of treatment associated with the condition

Route of delivery of drug(s) used

Reason for travel related to current illness

Description

For possible E. coli cases: What was the result of specimen testing for Shiga toxin using an antigen-based test (e.g.EIA or lateral flow) at a clinical laboratory?
Name of antigen-based test used at clinical laboratory
Age of case-patient in months if patient is <1yr
Age of case-patient in years
For possible E. coli cases: What was the result of specimen testing for Shiga toxin using an antigen-based test (e.g.EIA or lateral flow) at a state public health laboratory?

Name of antigen-based test used at state public health laboratory
Was the pathogen identified by culture?
Did the case-patient have bloody diarrhea (self reported) during this illness?
Did the case-patient have diarrhea (self-reported) during this illness?
Date of hospital admission for second hospitalization for this illness
Date of hospital discharge for second hospitalization for this illness
Date case was entered into site's database
Date case-pateint's specimen was received in laboratory for initial testing
Date case report form was completed
Case-patient's specimen collection date
If case-patient patient traveled internationally, date of departure from the U.S.
If case-patient traveled internationally, date of return to the U.S.
CDC FDOSS outbreak ID number
Did the case-patient have fever (self-reported) during this illness?
If case-patient was hospitalized, was s/he transferred to another hospital?
Did case patient have a diagnosis of HUS?
Did case-patient immigrate to the U.S.? (within 7 days of illness onset)
Was the case-patient interviewed by public health (i.e. state or local health department) ?
Name of submitting laboratory
Ccase-patient's medical record number
What was the result of specimen testing for Shiga toxin using another test at the CDC?

What was the result of specimen testing for Shiga toxin using another test at a clinical laboratory
Name of other test used at a clinical laboratory
What was the result of specimen testing for Shiga toxin using another test at a state public health laboratory?
Name of other test used at a state public health laboratory
Type of outbreak that the case-patient was part of
Case-patient identification number
What was the result of specimen testing for Shiga toxin using PCR at CDC?
What was the result of specimen testing for Shiga toxin using PCR at a clincal laboratory?
Name of PCR assay used
What was the result of specimen testing for Shiga toxin using PCR at a state public health laboratory?
Unique identification number for person or patient

Unique identifier for laboratory result
Is all of the information for this case complete?
Was specimen or isolate forwarded to CDC for testing or confirmation?
State lab identification number
Case patient's specimen collection source
Was it H7 antigen positive?
What was the H-antigen number?
Was the isolate non-motile?
Was it O157 positive?
What was the O-antigen number?
Was E. coli Shiga toxin-producing?
Was the isolate sent to a state public health laboratory? (Answer 'Yes' if it was sent to any state lab, even if it was sent to a lab outside of the case's state of residence)

If case-patient traveled internationally, to where did they travel?
Did the case patient travel internationally? (within 7 days of onset)
Identification tag in PulseNet database
Date questionnaire administered to case
Individual who was interviewed
If case, parent, or spouse not interviewed, then who was?
City where patient resides
Month when patient was born
Year when patient was born
Is the patient of Hispanic or Latino origin
Length of patient's illness in days
Is the patient still ill
Patient experienced 3 or more loose stools in 24-hour period
Date patient first expierenced 3 or more loose stools
Patient experienced blood in stool
Is the patient still hospitalizaed
Patient diagnosed by doctor with HUS or kidney failure
Patient works as a food handler at dining establishment
Patient works in a daycare facility
List of locations where foods eaten at home were purchased
List of locations where foods were eaten outside of the home
Patient handled raw ground beed (even if not consumed) in 7 days prior to illness onset
Patient consumed ground beef in 7 days prior to illness onset
Patient consumed ground beef at home in 7 days prior to illness onset
Patient consumed red or pink ground beef at home in 7 days prior to illness onset
Location(s) where ground beef consumed at home in 7 days prior to illness onset was purchased
Date(s) when ground beef consumed at home in 7 days prior to illness onset was purchased
Brand(s) of ground beef eaten at home in 7 days prior to illness onset
Ground beef eaten at home was purchased in bulk
Ground beef eaten at home was purchased in pre-formed patties
Ground beef eaten at home was purchased in other form

Patient unable to recall form in which ground beef eaten at home was purchased

Size in which ground beef consumed at home was purchased
Percentage lean of ground beef eaten at home
Ground beef eaten at home was purchased fresh
Ground beef eaten at home was purchased frozen
Patient unable to recall if ground beef consumed at home was purchased fresh or frozen
Patient consumed ground beef away from home in 7 days prior to illness onset
Location(s) where ground beef consumed away from home

Patient consumed red or pink ground beef away from home
Ground beef eaten outside the home as hamburger
Ground beef eaten outside the home as meatball
Ground beef eaten outside the home as meatloaf
Ground beef eaten outside the home in a taco
Ground beef eaten in a dish (ex. casserole) outside the home
Ground beef eaten outside the home in form other than hamburger, meatball, meatloaf, taco, or in a dish
Other type of ground beef eaten outside the home
Patient consumed steak in 7 days prior to illness onset
Patient consumed steak at home in 7 days prior to illness onset
Steak consumed at home was pink or read
Location(s) where steak consumed at home was purchased
Date(s) when steak consumed at home was purchased
Brand(s) of steak eaten at home
Steak was consumed as steak
Steak was consumed in a stew
Steak was consumed as a roast
Patient unable to recall how steak was consumed
Steak was consumed in form other than steak, stew, roast
If steak was consumed in other form, then specify
Patient consumed steak away from home in 7 days prior to illness onset
Location(s) where steak was consumed away from home
Date(s) when steak was consumed away from home
Patient consumed red or pink steak away from home
Patient consumed red or pink steak away from home as steak
Patient consumed red or pink steak away from home as stew
Patient consumed red or pink steak away from home as a roast
Patient consumed red or pink steak away from home in form other than steak, stew, or roast
Specify if 'Other' red or pink steak was reported

Patient consumed bison in the 7 days prior to illness onset
Patient consumed bison at home in the 7 days prior to illness onset
Patient consumed red or pink bison at home
Location(s) where ground beef consumed at home was purchased
Date(s) when bison consumed at home was purchased

Brand of bison purchased for home consumption
Patient consumed bison away from home in 7 days prior to illness onset
Location(s) where bison was consumed outside the home
Date(s) when bison was consumed outside the home
Bison eaten outside the home was red or pink
Patient consumed wild game in the 7 days before illness onset
Patient consumed dried meat in the 7 days before illness onset
Patient consumed dried meat that was pepperoni
Patient consumed dried meat that was salami
Patient consumed dried meat that was sausage
Patient consumed dried meat that was not pepperoni, salami, or sausage
Specify other type of dried meat consumed
Patient consumed jerkey of any type in the 7 days before illness onset
Patient consumed raw milk in the 7 days before illness onset
Patient consumed cheese made with raw milk in the 7 days before illness onset
Type of raw milk cheese consumed
Location(s) where raw milk cheese was purchased
Date(s) when raw milk cheese was purchased
Patient consumed ice cream made with raw milk in the 7 days before illness onset
Patient consumed raw or unpasteurized juice or cide in the 7 dayse before illness onset

Patient consumed lettuce of any kind in the 7 days before illness onset
Patient consumed lettuce of any kind at home in the 7 days before illness onset
Location(s) where lettuce consumed at home was purchased
Date(s) when lettuce consumed at home was purchased
Brand(s) of lettuce purchased for home consumption
Patient consumed loose lettuce of any kind in the 7 days before illness onset
Patient consumed prepackaged lettuce of any kind in the 7 days before illness onset

Patient unable to recall how lettuce consumed at home was packaged

Patient consumed lettuce of any kind away from home in the 7 days before illness onset
Location(s) where the lettuce was consumed away from home
Patient consumed mesclun lettuce in the 7 days before illness onset
Patient consumed mesclun lettuce at home in the 7 days before illness onset
Location(s) where mesclun lettuce consumed at home was purchased

Date(s) when mesclun lettuce consumed at home was purchased

Brand(s) of mesclun lettuce consumed at home
Patient consumed loose mesclun lettuce at home
Patient consumed prepackaged mesclun lettuce at home

Patient unable to recall how mesclun lettuce consumed at home was purchased

Patient consumed mesclun lettuce away from home in the 7 days before illness onset

Location(s) where the mesclun lettuce was consumed away from home

Patient consumed iceberg lettuce in the 7 days before illness onset
Patient consumed iceberg lettuce at home in the 7 days before illness onset
Location(s) where iceberg lettuce consumed at home was purchased

Date(s) when iceberg lettuce consumed at home was purchased

Brand(s) of iceberg lettuce consumed at home
Patient consumed iceberg mesclun lettuce at home
Patient consumed prepackaged iceberg lettuce at home

Patient unable to recall how iceberg lettuce consumed at home was purchased

Patient consumed iceberg lettuce away from home in the 7 days before illness onset

Location(s) where the iceberg lettuce was consumed away from home

Patient consumed romaine lettuce in the 7 days before illness onset
Patient consumed romaine lettuce at home in the 7 days before illness onset
Location(s) where romaine lettuce consumed at home was purchased

Date(s) when romaine lettuce consumed at home was purchased

Brand(s) of romaine lettuce consumed at home
Patient consumed loose romaine lettuce at home
Patient consumed prepackaged romaine lettuce at home

Patient unable to recall how romaine lettuce consumed at home was purchased

Patient consumed romaine lettuce away from home in the 7 days before illness onset

Location(s) where the romaine lettuce was consumed away from home

Patient consumed red leaf lettuce in the 7 days before illness onset
Patient consumed red leaf lettuce at home in the 7 days before illness onset
Location(s) where red leaf lettuce consumed at home was purchased

Date(s) when red leaf lettuce consumed at home was purchased

Brand(s) of red leaf lettuce consumed at home
Patient consumed loose red leaf lettuce at home
Patient consumed prepackaged red leaf lettuce at home

Patient unable to recall how red leaf lettuce consumed at home was purchased

Patient consumed red leaf lettuce away from home in the 7 days before illness onset

Location(s) where the red leaf lettuce was consumed away from home

Patient consumed spinach in the 7 days before illness onset
Patient consumed spinach at home in the 7 days before illness onset
Location(s) where spinach consumed at home was purchased
Date(s) when spinach consumed at home was purchased
Brand(s) of spinach consumed at home
Patient consumed spinach at home
Patient consumed prepackaged spinach at home
Patient unable to recall how spinach consumed at home was purchased

Patient consumed spinach away from home in the 7 days before illness onset
Location(s) where the spinach was consumed away from home
Patient consumed other leafy greens in the 7 days before illness onset
Patient consumed other leafy greens at home in the 7 days before illness onset
Location(s) where other leafy greens consumed at home was purchased

Date(s) when other leafy greens consumed at home was purchased

Brand(s) of other leafy greens consumed at home
Patient consumed other leafy greens at home
Patient consumed prepackaged other leafy greens at home

Patient unable to recall how other leafy greens consumed at home was purchased

Patient consumed other leafy greens away from home in the 7 days before illness onset
Location(s) where the other leafy greens was consumed away from home

Patient consumed sprouts of any kind in the 7 days before illness onset
Patient consumed sprouts of any kind at home in the 7 days before illness onset
Location(s) where sprouts consumed at home were purchased

Date(s) when sprouts consumed at home were purchased
Brand(s) of sprouts consumed at home
Patient consumed sprouts of any kind away from home in the 7 days before illness onset
Location(s) where sprouts were consumed away from home
Type of sprouts consumed outside the home
Patient visited a petting zoo in the 7 days before illness onset
Patient visited, worked, or lived on a farm with livestock in the 7 days before illness onset
Patient visited an agricultural 'Farm and Feed' store in the 7 days before illness onset

Patient visited a pet store, swap meets, or other places where animals/birds are sold or shown in the 7 dayse before illness onset
Patient visited a county or state fair, 4-H event, or similar even with animals in the 7 days before illness onset

Patient had contact with pet treats or chews in the 7 days before illness onset
Patient had contact with dried animal droppings or pellets in the 7 days before illness onset
Patient attended or had contact with a daycare facility in the 7 days before illness onset
Patient spent all or some of the 7 days before illness onset outside of their state of residence
Postal code abbreviation of state(s) where patient traveled
Domestic travel start date
Domestic travel end date
Countries visited in the 7 days before illness onset
International travel start date
International travel end date
Patient attended a group meal in the 7 days before illness onset
Patient visited, lives, or works in an institutional home (jail, nursing home, etc.)
Location of institution where patient visits, lives, or works
Main source of drinking water for patient during the 7 days before illness onset
Site ID assigned by CDC.
Foodborne Disease.
Identification of Isolate
Date isolate taken from patient
Date of Last Modification
Is isolate confirmed
Source of isolate
Serotype/Species/Test Result
Probable case is laboratory-diagnosed
Probable case is epidemiologically linked
Patient had a diagnosis of TTP (Thrombotic thrombocytopenic purpura)
Patient had close contact with anyone with diarrhea or vomiting in the 7 days prior to illness onset
Patient consumed artisanal or gourmet cheese in the 7 days before illness onset
Specify other leafy greens
Purchase location of sprouts
Brand and variety of sprouts
Visit or swim in any treated recreational water facilities in 7 days prior to illness onset

Visit or swim in any untreated recreational water facilities in 7 days prior to illness onset
Location of treated recreational water facilities

Location of untreated recreational water facilities

Other related diagnosis
Specify other related diagnosis
Consent to retrieve purchases based on shopper card information
Brand and variety of ground beef consumed at home
Brand and variety of steak consumed at home
Steak consumed at home was purchased frozen

Steak consumed at home was purchased fresh
Brand and variety of bison
Brand and variety of wild game
Brand and variety of dried or fermented meat
Brand and variety of other dried or fermented meat
Patient consumed pork in 7 days prior to illness onset
Patient consumed pork at home in 7 days prior to illness onset
Purchase location of pork consumed at home
Brand and variety of pork consumed at home
Pork consumed at home was ground
Pork consumed at home was whole pig
Pork consumed at home was other form
Specify other type of pork consumed at home
Patient consumed pork away from home in 7 days prior to illness onset
Purchase location of pork consumed away from home
Dish in which pork was consumed away from home
Purchase location of raw milk
Brand and variety of raw milk
Purchase location of cheese made from raw milk
Brand and variety of cheese made from raw milk
Cheese made from raw milk was aged for 60 days
Purchase location of artisanal or gourmet cheese
Brand and variety of artisanal or gourmet cheese
Purchase location of unpasteurized juice or cider
Brand and variety of unpasteurized juice or cider
Patient consumed any other unpasteurized dairy product in 7 days prior to illness onset
Specify other unpasteurized dairy product
Purchase location of other unpasteurized dairy product
Brand and variety of other unpasteurized dairy product
Patient ate, tasted, or licked uncooked or unbaked dough or batter
Patient consumed fresh, uncooked leafy greens in 7 days prior to illness onset
Purchase location of fresh, uncooked leafy greens
Brand and variety of fresh, uncooked leafy greens
Patient consumed loose fresh, uncooked leafy greens
Patient consumed prepackaged fresh, uncooked leafy greens
Patient consumed cabbage in 7 days prior to illness onset
Purchase location of cabbage
Brand and variety of cabbage
Patient consumed arugula in 7 days prior to illness onset
Purchase location of arugula
Brand and variety of arugula
Patient consumed kale in 7 days prior to illness onset
Purchase location of kale
Brand and variety of kale
Patient consumed pre-made, single-serving salads in 7 days prior to illness onset
Purchase location of pre-made, single-serving salads
Brand and variety of pre-made, single-serving salads

Patient consumed other pre-packaged leafy greens or salad kits
Purchase location of other pre-packaged leafy greens or salad kits

Brand and variety of other pre-packaged leafy greens or salad kits

Purchase location of other leafy greens
Brand and variety of other leafy greens
Patient consumed fresh herbs in 7 days prior to illness onset
Specify fresh herbs
Purchase location of fresh herbs
Brand and variety of fresh herbs
Specify petting zoo
Specify type of livestock
Specify fair or event with animals
Patient has a pet of their own
Specify pet
Specify institution
Types of treated recreational water facilities
Types of untreated recreational water facilities
Patient's occupation
Does the patient have a food allergy?
Is the patient on a special diet?

Description

Did this case have a clinically compatible illness as defined by the latest CSTE case definitions?
Was there a history of a tick bite within 14 days of onset?
Was there an eschar, or tache noire, present?
If the case reports an immunosuppressive condition, then indicate condition here
Did the case report adult respiratory distress syndrome during the course of this illness?
Did the case report disseminated intravascular coagulation during the course of this illness?
Did the case report meningitis during the course of this illness?
Did the case report encephalitis during the course of this illness?
Did the case report renal failure during the course of this illness?
If the case reported another life threatening complication during the course of this illness, then list it here
Indicate the name of the laboratory which supplied results supporting the current CSTE case definitions.
Indicate the state where the laboratory is located
If an acute serology was collected, then list the date of collection
If performed, was the acute IFA IgG positive
If performed, what was the reciprocal titer of the acute IFA IgG
If performed, was the acute IFA IgM positive
If performed, what was the reciprocal titer of the acute IFA IgM
If performed, what was the name of another acute serology test
If performed, was this other acute serology test positive
If performed, what was the numeric result of the other serology test

If an convalescent serology was collected, then list the date of collection

If performed, was the convalescent IFA IgG positive
If performed, what was the reciprocal titer of the convalescent IFA IgG
If performed, was the convalescent IFA IgM positive
If performed, what was the reciprocal titer of the convalescent IFA IgM
If performed, what was the name of another convalescent serology test
If performed, was this other convalescent serology test positive

If performed, what was the numeric result of the other serology test

If performed, was the polymerase chain reaction assay positive
If performed, were morulae visualized during microscopy
If performed, were antibodies detected using immunohistochemistry during microscopy
If performed, was the etiologic agent isolated from culture
If paired sera were collected, was there a fourfold change in titer between acute and convalescent
If etiologic agent was unusual, then indicate the species here (for example, R. africae)

Name of subject's clinician/provider of care,Provide the name in the following format:,<last name>, <first name>

Phone number of subject's clinician/provider of care

Clinical manifestation of TBRD

For each clinical manifestation reported, indicate (YNU) whether the subject developed the specified manifestation as a result of the illness.

Did the subject experience any complications due to this episode?

If the subject experienced complications due to this episode, what was the complication?

At the time of diagnosis, was the subject immunocompromised?

Did the subject receive antimicrobial treatment for this infection?

What antibiotic did the patient receive for this episode?

Date the treatment was initiated

Number of days the patient actually took the antibiotic referenced

Is the subject's current occupation related to the exposure?

In the two weeks before symptom onset or diagnosis (use earlier date), did the subject travel out of their county, state, or country of residence?

International destination, countries traveled to

Domestic destination, state(s) traveled to

Intrastate destination, counties traveled to

If the subject traveled, when did they arrive to their travel destination?

If the subject traveled, when did they depart from their travel destination?

If subject noticed tick bite, where did the bite occur (geographic location)?

If subject noticed tick bite, when did the bite occur?

In the year before symptom onset or diagnosis (use earlier date), did the subject receive a blood transfusion?

Date(s) of blood transfusion(s)

Was the subject’s infection transfusion associated?

If a transfused blood product was implicated in an investigation, specify which type(s) of product.

In the year before symptom onset or diagnosis (use earlier date), did the subject receive an organ transplant(s)?

If the subject received an organ transplant, what was the organ?

Date(s) of organ transplant(s)

Was the subject's infection transplant-related?

Did the subject donate blood in the 30 days prior to symptom onset?

Date(s) of blood donation(s)

Was the subject a blood donor identified during a transfusion investigation (i.e., had positive test results and was linked to an infected recipient)?

If a donated blood product was implicated in an investigation, specify which type(s) of product.

Was the blood bank/hospital/transplant service notified?

Was the subject diagnosed with a co-infection?

Specify coinfection

Label/Short Name

Date of Illness Onset

Primary occupation
Military Service
Military Service Year
Tetanus Toxoid Vaccination

Year of last tetanus dose
Acute wound
Acute wound date
Acute wound anatomic site
Acute wound work related
Acute wound environment
Acute wound circumstances
Acute wound type
Wound Contaminated
Depth of Wound

Acute wound signs of infection
Denervated Tissue Present
Acute wound medical care

Acute wound tetanus toxiod administered
If Yes, tetanus toxiod administered, How Soon after Injury?
Wound Debrided
If Yes, Debrided How Soon after Injury?
TIG given before symptom onset

If Yes, TIG Given How Soon after Injury?
TIG given before symptom onset dosage
Tetanus Associated Condition
Diabetes
Insulin dependents
Parenteral Drug Abuse?
Tetanus type

TIG given after symptom onset

If Yes, How Soon after Injury?
TIG given after symptom onset dosage
Intensive Care Unit
Mechanical Ventilation Days
Final outcome
Mother's Age
Mother's DOB
Date mother first resided in the U.S.

Mother tetanus vacc number of known doses
Last time mother received tetanus vacc
Infant's birth place location

Birth attendees

Description

Date of the beginning of the illness. Reported date of the onset of symptoms of the condition being reported to the public health system
Specifies patient's primary occupation.
History of Military (Active or Reserve)?
Year of Entry into Militart Service
Tetanus Toxoid (TT) History Prior to
Tetanus Disease
(Exclude Doses Received Since Acute Injury)

Specifies the year of patients' last tetanus dose.
Did the patient have an acute wound or injury?
This field indicates the date an acute wound or injury occurred.
Specifies the anatomic site of acute wound or injury.
If there was an acute wound or injury, was it work related?
Specifies the environment where the acute wound or injury was work related.
Specifies the circumstances under which the acute wound or injury occurred.
Specifies the principle acute wound or injury type.
Wound Contaminated
Depth of Wound

Were there signs of infection at the time of care for the acute wound or injury?
Devitalized, Ischemic, or Denervated Tissue Present?
Did the patient obtain medical care for the acute wound or injury before tetanus symptom onset?
Was patient administered tetanus toxiod (Td, TT, DT, DTaP) for the acute wound or injury before tetanus symptom onset?
If Yes, How Soon after Injury?

Wound Debrided before Tetanus Onset
If Yes, Debrided How Soon after Injury?

Indicates whether tetanus immune globulin (TIG) prophylaxis was given as a part of the wound care before tetanus symptom onset.
If Yes, TIG Given How Soon after Injury?

Specifies the date the tetanus immune globulin (TIG) prophylaxis units given.

Tetanus Associated Conditions Prior to Onset(If no Acute Injury)
Indicates whether patient have diabetes.
Indicates whether the patient is insulin dependent.
Pranteral Drug Abuse?
Type of tetanus.

Indicates whether the tetanus immune globulin (TIG) therapy was given after symptom onset.
If Yes, How Soon after Injury?
Specifies the total therapeutic TIG dosage.

Was the patient in the Intensive Care Unit (ICU)?
Number of days the patient received mechanically ventilation.
Final outcome (e.g. Recovered, Died, Unknown)
Specifies mothers age.
Specifies mothers DOB.
Date mother first resided in the U.S.

Specifies number of known tetanus vaccination doses mother received prior to the infant's (case's) birth.
Specifies number of years or months since mother received last tetanus vaccination.

Specifies infant's (case) birth place location (e.g. Hospital, Home, Other, Unknown).

Specifies birth attendees (e.g. Physician, Nurse, Licensed midwife, Unlicensed midwife, Family, EMS technician(s)).

Description

Did patient have Eosinophilia?
If "Yes," please specify absolute number or percentage:
Specify percent or numeric
Did patient have a fever?
If "Yes," please specify temperature:
Specify fahrenheit or celsius
Did patient have any of the following signs or symptoms of Trichinellosis?

If "Other," please specify other signs or symptoms of Trichinellosis:

What suspect foods did the patient eat?
Please specify type of pork:
If “Other,” please specify other type of pork:
Date suspect food was consumed:
Was larvae found in suspect food?
Where was the suspect meat obtained?
If “Other,” please specify where suspect meat was obtained:
How was suspect food prepared or further processed after purchase?
If “Other,” please specify other type of processing:
What was the method of cooking the suspect food?
If “Other,” please specify other type of cooking method:
Please specify type of non-pork:
If “Other,” please specify other type of non-pork:
Date suspect food was consumed:
Was larvae found in suspect food?
Where was the suspect meat obtained?
If “Other,” please specify where suspect meat was obtained:
How was suspect food prepared or further processed after purchase?
If “Other,” please specify other type of processing:
What was the method of cooking the suspect food?
If “Other,” please specify other type of cooking method:
Name of Laboratory that reported test result.
CLIA (Clinical Laboratory Improvement Act) identifier for the laboratory that performed the test.
Sending system-assigned local ID of the case investigation with which the subject is associated. This field has been added to provide the mapping to the case/investigation to which this lab result is associated. This field should appear exactly as it appears in OBR-3 of the Case Notification.
A laboratory generated number that identifies the test/order instance.
Ordered Test Name is the lab test ordered by the physician. It will always be included in an ELR, but there are many instances in which the user entering manual reports will not have access to this information.
The date the specimen was collected.
This indicates the physical location, of the subject, where the specimen originated. Examples include: Right Internal Jugular, Left Arm, Buttock, Right Eye, etc.
A laboratory generated number that identifies the specimen related to this test.

The medium from which the specimen originated. Examples include whole blood, saliva, urine, etc.
Specimen details if specimen information entered as text.
Date Sample Received at Lab (accession date).
The date and time the sample was analyzed by the laboratory.
Date result sent from Reporting Laboratory.
The status of the lab report.
The lab test that was run on the specimen.
Results expressed as numeric value/quantitative result.
The unit of measure for numeric result value.
Coded qualitative result value (e.g., Positive, Negative).
The organism name as a test result. This element is used when the result was reported as an organism.
Textual result value, used if result is neither numeric nor coded.
The Result Status is the degree of completion of the lab test.
The interpretation flag identifies a result that is not typical as well as how it's not typical. Examples: Susceptible, Resistant, Normal, Above upper panic limits, below absolute low.
The reference range from value allows the user to enter the value on one end of a expected range of results for the test. This is used mostly for quantitative results.
The reference range to value allows the user to enter the value on the other end of a valid range of results for the test. This is used mostly for quantitative results.
The technique or method used to perform the test and obtain the test results. Examples: Serum Neutralization, Titration, dipstick, test strip, anaerobic culture.
Comments having to do specifically with the lab result test. These are the comments from the NTE segment if the result was originally an Electronic Laboratory Report.

Date the isolate was received in state public health laboratory.

Explanation for missing result (e.g., clotting, quantity not sufficient, etc.)
Indicate whether the specimens were sent to CDC for genotyping.
If the specimen was sent to the CDC for genotyping, date on which the specimens were sent.
Indicate whether the specimen was sent for strain identification.
If the specimen was sent for strain identification, indicate the strain.
Track Isolate functionality indicator
Patient status at specimen collection

Isolate received in state public health lab

Reason isolate not received
Reason isolate not received (Other)
Date received in state public health lab

State public health lab isolate id number

Case confirmed at state public health lab

In the 8 weeks before onset of illness, did the subject travel out of their state or country of residence?

International destination or countries the case-patient traveled to in the 8 weeks before onset of illness

Domestic destination or state(s) the case-patient traveled to in the 8 weeks before onset of illness

Date of arrival to travel destination

Date of departure from travel destination

Is this case epi-linked to another confirmed or probable case?

Where was the suspected meat tested?

Use this field, if needed, to communicate anything unusual about the suspect meat, which is not already covered with the other data elements (e.g., additional details about where eaten, if consumed while traveling outside of the U.S., where wild game was hunted, etc.).

Label/Short Name	Description	Value Set Code. Search in PHIN VADS using the following link (https://phinvads.cdc.gov/vads/SearchHome.action)	CDC Priority
TB State Case Number	State case number for the case specific to TB investigations (4 digit report year + 2 letter state + 9 digit alphanumeric number)	N/A	P
City or County Case Number	City or county case number assigned to this case	N/A	P
Birth Sex	What was the patient's sex at birth?	PHVS_Sex_MFU	P
Previously Counted Case	Has this case already been counted by another reporting area?	PHVS_CaseCountStatus_TB	P
Previously Reported State Case Number	If case previously counted, provide the state case number from the other reporting area.	N/A	P
Country of Verified Case	If the case was previously reported by another country, specify the country.	PHVS_BirthCountry_CDC	P
Patient Address City	Patient address city	N/A	P
Inside City Limits	Is the patient's residence within city limits?	PHVS_YesNoUnknown_CDC	P

Census Tract of Case-Patient Residence	Census tract where the address is located is a unique identifier associated with a small statistical subdivision of a county. Census tract data allows a user to find population and housing statistics about a specific part of an urban area.	N/A	P
Detailed Race	Provide the detailed race information for the patient.	PHVS_Race_CDC	P
Date Arrived in US	If country of birth is NOT United States, regardless of citizenship, indicate the date when the patient first arrived in the US.	N/A	P
US Born	Was the patient eligible for US citizenship at birth?	PHVS_YesNoUnknown_CDC	P
Primary Guardian(s) Country of Birth	Indicates the birth country of the primary guardian(s) of patient (pediatric [<15 years old] cases only)	PHVS_BirthCountry_CDC	P
Remain in US After Report	If not US reporting area, did patient remain in the United States for >= 90 days after report date?	PHVS_YesNoUnknown_CDC	P
Initial Reason for Evaluation	What was the initial reason the patient was evaluated for TB?	PHVS_PrimaryReasonForEvaluation_TB	P

Test Type	Epidemiologic interpretation of the type of test(s) performed for this case. Please provide a response for each of the main test types (culture, smear, pathology/cytology, NAA, TST, IGRA, HIV, diabetes) If test was not done please indicate so.	PHVS_LabTestType_TB	P
Test Result	Epidemiologic interpretation of the results of the test(s) performed for this case - This is a qualitative test result. (e.g., positive, detected, negative)	PHVS_LabTestInterpretation_TB	P
Date/Time of Lab Result	Date result sent from reporting laboratory. Time of result is an optional addition to date.	N/A	P
Specimen Source Site	This indicates the anatomical source of the specimen tested.	PHVS_MicroscopicExamCultureSite_TB	P
Specimen Collection Date/Time	Date of collection of laboratory specimen used for diagnosis of health event reported in this case report. Time of collection is an optional addition to date.	N/A	P
Test Result Quantitative	Quantitative test result value	N/A	P
Result Units	Units of measure for the Quantitative Test Result Value	PHVS_UnitofMeasure_TB	P

Type of Chest Study	Indicate the type of chest study performed. Please provide a response for each of the main test types (plain chest radiograph, chest CT Scan) and if test was not done please indicate so.	PHVS_TypeofRadiologyStudy_CDC	P
Result of Chest Study	Result of chest diagnostic testing	PHVS_ResultofRadiologyStudy_TB	P
Evidence of Cavity	Did test show evidence of cavity?	PHVS_YesNoUnknown_CDC	P
Evidence of Miliary TB	Did test show evidence of miliary TB?	PHVS_YesNoUnknown_CDC	P
Date of Chest Study	Date of the chest diagnostic study	N/A	P
Patient Epidemiological Risk Factors	Exposed risk factors for the patient - Please provide a response for all risk factors in the value set with an associated indicator	PHVS_EpidemiologicalRiskFactors_TB	P
Patient Epidemiological Risk Factors Indicator	Provide a response for each value in the patient epidemiological risk factors value set	PHVS_YesNoUnknown_CDC	P
Type of Correctional Facility	If patient was a Resident of Correctional Facility at Diagnostic Evaluation, indicate the type of correctional facility.	PHVS_CorrectionalFacilityType_NND	P

Type of Long-Term Care Facility	If patient was a Resident of Long Term Care Facility at Diagnostic Evaluation, indicate the type of long term care facility.	PHVS_LongTermCareFacilityType_NND	P
Smoking Status	What is the patient's current tobacco smoking status?	PHVS_SmokingStatus_CDC	P
Patient lived outside of US for more than 2 months	Residence or Travel in countries other than the United States, Canada, Australia, New Zealand, or countries in northern or western Europe for >60 consecutive days at any point in the patient's lifetime.	PHVS_YesNoUnknown_CDC	P
Identified During Contact Investigation	Was the patient identified during the contact investigation around the likely source case?	PHVS_YesNoUnknown_CDC	P
Evaluation During Contact Investigation	If patient was identified during contact investigation, was the patient evaluated for TB during the contact investigation?	PHVS_YesNoUnknown_CDC	P
Linked Case Number	State case numbers for epidemiologically linked cases	N/A	P
Date Treatment or Therapy Started	Date the initial treatment regimen was started	N/A	P

Treatment Administration Type	Choose all treatment administration types that apply to the case, such as DOT, eDOT, or SAT.	PHVS_TreatmentAdministrationType_TB	P
Date Treatment or Therapy Stopped	Date treatment stopped	N/A	P
Case Verification Category	Indicates case verification criteria result based on factors such as culture results, smear results, major and additional sites of the disease, x-ray results, TST, IDR, reason therapy was stopped.	PHVS_CaseVerification_TB	P
Status at Diagnosis of TB	Was the patient alive or dead at the time of diagnostic evaluation?	PHVS_GeneralConditionStatus_TB	P
Site of Disease	What was the site of the patient's TB disease?	PHVS_AdditionalDiseaseSite_TB	P
Contact Investigation	Was a contact investigation conducted around this case?	PHVS_YesNoUnknown_CDC	P
Diagnosis Type	Previous TB or LTBI Diagnosis - Provide only 1 response for LTBI, multiple responses for TB are allowed	PHVS_DiagnosisType_TB	P
History of Previous Illness	Did the subject have a history of TB or LTBI?	PHVS_YesNoUnknown_CDC	P
Date of Previous Illness	Date of previous diagnosis	N/A	P
Previous State Case Number	Previous TB or LTBI State Case Number	N/A	P

Completed Treatment for Previous Diagnosis	Completed Treatment for Previous Diagnosis	PHVS_YesNoUnknown_CDC	P
Initially Treated with RIPE	Was the patient initially treated with the recommended four-drug therapy (RIPE)?	PHVS_YesNoUnknown_CDC	P
Reason Not Treated with RIPE	If not initially treated with RIPE, why not?	PHVS_ReasonNotTreatedwithRIPE_TB	P
Reason Therapy Stopped	Indicate the primary reason that therapy was stopped or never started; specify this data when the case is closed.	PHVS_ReasonTherapyStopped_TB	P
Reason Therapy Extended	Select the reason the therapy extended beyond 12 months.	PHVS_TherapyExtendedReason_TB	P
Final Disease Outcome	Final TB disease case outcome	PHVS_FinalTreatmentOutcome_TB	P
Initial Drug Regimen	Initial drug regimen for the patient: Please provide a response for each of the values in the value set using the associated indicator.	PHVS_Medications_TB	P
Initial Drug Regimen Indicator	Indicator response for the initial drug regimen question	PHVS_YesNoUnknown_CDC	P
Isolate Submitted for Genotyping	Was an isolate submitted for genotyping?	PHVS_YesNoUnknown_CDC	P
Accession Number for Genotyping	If an isolate was submitted for genotyping to a CDC laboratory only, list the accession number for genotyping.	N/A	P

Phenotypic Drug Susceptibility Completed	Was phenotypic/growth-based drug susceptibility testing done?	PHVS_YesNoUnknown_CDC	P
Molecular Drug Susceptibility Completed	Was genotypic/molecular drug susceptibility testing done?	PHVS_YesNoUnknown_CDC	P
Antimicrobial Susceptibility Test Type	Antimicrobial Susceptibility Test Type of TB drugs. For the initial susceptibility testing please send a response for each values in the value set. Changes in susceptibility should be reported for each individual drug when change is identified.	PHVS_SusceptibilityTestType_TB	P
Antimicrobial Susceptibility Specimen Collection Date	Antimicrobial Susceptibility Specimen Collection Date	N/A	P
Antimicrobial Susceptibility Result Reported Date	Antimicrobial susceptibility result reported date	N/A	P
Antimicrobial Susceptibility Specimen Type	Antimicrobial Susceptibility Specimen Type (e.g. Exudate, Blood, Serum, Urine)	PHVS_MicroscopicExamCultureSite_TB	P
Antimicrobial Susceptibility Test Interpretation	Antimicrobial Susceptibility Test Interpretation (e.g. Susceptible, Resistant, Intermediate, Not tested)	PHVS_SusceptibilityTestResultQuantitative_TB	P

Antimicrobial Susceptibility Test Method	Antimicrobial Susceptibility Test Method (e.g. E-Test, MIC, Disk Diffusion)	PHVS_SusceptibilityTestMethod_TB	P
Gene Identifier	Gene identifier - Please report the full test results for the samples that have unique features, such as specimen type (sputum or another anatomic site), test type (sequencing or non-sequencing) or mutation (detected or not detected). There is no need to report test results that differ only by date or laboratory and where all other aspects are identical in regards to specimen type, test type, and/or the results of mutation.	PHVS_GeneName_TB	P
Molecular Susceptibility Specimen Collection Date	Molecular Susceptibility Specimen Collection Date	N/A	P
Molecular Susceptibility Date Reported	Molecular Susceptibility Date Reported	N/A	P
Molecular Susceptibility Specimen Type	Molecular Susceptibility Specimen Type	PHVS_MicroscopicExamCultureSite_TB	P
Molecular Susceptibility Test Result	Molecular Susceptibility Test Result	PHVS_MolecularTestResults_TB	P
Molecular Susceptibility Nucleic Acid Change	Molecular Susceptibility Nucleic Acid Change	N/A	P

Molecular Susceptibility Amino Acid Change	Molecular Susceptibility Amino Acid Change	N/A	P
Molecular Susceptibility Indel	Molecular Susceptibility Indel	PHVS_MolecularIndel_TB	P
Molecular Susceptibility Test Method	Molecular Susceptibility Test Method	PHVS_MolecularTestMethods_TB	P
Culture Conversion Documented	Did the patient's sputum become culture negative?	PHVS_YesNoUnknown_CDC	P
Date of First Consistently Negative Culture	Date the first consistently negative sputum culture was collected.	N/A	P
Reason for Not Documenting Sputum Culture Conversion	Indicate the one reason for not documenting the sputum culture conversion.	PHVS_SputumCultureConversionNotDocumentedReason_TB	P
Patient Move During TB Therapy	Did the patient move during therapy?	PHVS_YesNoUnknown_CDC	P
Moved to Where	If the patient moved to a different reporting area during TB therapy, select all that apply to where the patient moved.	PHVS_MovedWhereDuringTherapy_TB	P
Out of State Move	If moved out of state, then specify the new state jurisdiction.	PHVS_State_FIPS_5-2	P
Out of Country Move	If moved out of country, then specify the new country jurisdiction.	PHVS_Country_ISO_3166-1	P
Transnational Referral	If moved out of the US, indicate whether a transnational referral was made.	PHVS_YesNoUnknown_CDC	P

History of Treatment	History of treatment before current episode with second-line TB drugs for the treatment of TB disease (not LTBI)	PHVS_YesNoUnknown_CDC	P
Date MDR Treatment Started	Date MDR TB therapy started for current episode	N/A	P
Drug Used to Treat MDR TB	Drugs ever used for MDR TB treatment, from MDR start date: Please provide a response for each medication in the value set with an associated indicator. Medications should be recorded as part of the regimen beginning with the MDR TB therapy start date.	PHVS_Medications_TB	P
Length of Time Drug Was Administered	Indicate length of time drug was taken or if it was not taken	PHVS_LengthofTimeDrugTaken_TB	P
Date Injectable Medication Stopped	Date injectable medication stopped. If no injectable drugs were used leave blank.	N/A	P
Surgery to Treat MDR TB	Surgery to Treat MDR TB	PHVS_YesNoUnknown_CDC	P
Surgery to Treat MDR TB Date	Surgery to Treat MDR TB Date	N/A	P

Adverse Event Description	Did patient experience any of the following side effects during treatment that resulted in a permanent discontinuation of medication or at the end of treatment were there any of the following side effects related to MDR-TB treatment present? Please provide a response for all side effects in the value set with an associated indicator.	PHVS_SideEffectofTreatment_TB	P
Adverse Event Indicator	Side Effects of Treatment Indicator	PHVS_YesNoUnknown_CDC	P
Adverse Event Manifestation Time	Did the side effect manifest during treatment or at the end of treatment?	PHVS_SideEffectTimetoOnset_TB	P
Usual Occupation and Industry	Usual occupation and industry	TBD	P
Meets Binational Reporting Criteria	Does case meet binational reporting criteria?	PHVS_YesNoUnknown_CDC	P
Patient Treated as MDR Case	Was the Patient Treated as an MDR TB Case (Regardless of DST Results?	PHVS_YesNoUnknown_CDC	P

Label/Short Name	Description
Immuncompromised	If patient has any immunocompromising conditions, specify
Date first medical	Date that the patient was first seen by medical person.
Fever/sweats/chills	Did the patient's illness include the symptom of fever/sweats/chills?
Confusion/delirium	Did the patient's illness include the symptom of confusion/delirium?
Vomiting/diarrhea/abdominal pain	Did the patient's illness include the symptom of vomiting/diarrhea/abdominal pain?
Sore throat	Did the patient's illness include the symptom of sore throat?
Cough	Did the patient's illness include the symptom of cough?
Chest Pain	Did the patient's illness include the symptom of chest pain?
Shortness of breath	Did the patient's illness include the symptom of shortness of breath?
Other_symptoms	Did the patient's illness include other symptoms of not listed?
Other_symptoms_specify	Which other symptoms did the patient's illness include?
Lymphadenopathy	Did the patient have lymphadenopathy?
Describe lympadenopathy	If lymphadenopathy present, provide location and description.
Skin lesions	Did the patient have skin lesion?
Describe skin lesions	If skin lesion present, provide location and description.
Conjunctivitis	Did the patient have conjunctivitis?
Pharyngitis/tonsilitis	Did the patient have pharyngitis/tonsilitis?
Chest X-ray	Results of chest x-ray
Antibiotic	Did patient receive an effective antibiotic for illness?
Antibiotic start date	Date each antibiotic started
Illness outcome	Outcome of illness
Primary clinical syndrome	Classification of primary clinical manifestation of infection
F. tularensis cultured	Was *F. tularensis* cultured?
Specimen source	Source of culture
Date specimen collected	Date specimen was collected
F. tularensis detected	Was F. tularensis detected by other tests?
Test performed	Test used to detect *F. tularensis*
Specimen source	Specimen source in which *F. tularenisis* was detected

Date specimen collected	Date of specimen collection
F. tularensis subspecies	Subspecies of *F. tularensis* detected
Serology	Serology results
First Serum titer	Titer results
Second Serum titer	Titer results
Date first serum drawn	Date first serum drawn
Date second serum drawn	Date second serum drawn
Epi-linked to other cases	Was this illness epi-linked to any other tularemia cases?
Epi-link specify	Describe epi-linked case
Travel associated	Was this illness associated with travel?
Travel specify	Describe travel
Animal contact	Did patient have any animal contact in the 2 weeks preceding illness?
Domestic animal	Indicate if domestic animal contact occurred and specify domestic animals that patient had contact with in the 2 weeks preceding illness
Type of animal contact	Was animal domestic or wild
Wild animal	Indicate if wild animal contact occurred and specify wild animals that patient had contact with in the 2 weeks preceding illness
Nature of contact	Nature of animal contact
Tick or deerfly bite	Did patient have tick or deerfly bite in the two weeks preceding illness?
Contact with or ingestion of untreated water	Did patient have contact with or ingestion of untreated water in the two weeks preceding illness?
Environmental aerosol generating activities	Did patient participate in any environmental aerosol generating activities in the two weeks preceding illness
Specify environmental aerosol generating activities	Specify environmental aerosol generating activities
Other exposure	Specify any other exposures in the two weeks preceding illness
Comments	Additional comments

Label/Short Name	Description	Value Set Code. Search in PHIN VADS using the following link (https://phinvads.cdc.gov/vads/SearchHome.action)
Number of lesions in total	Choose the numeric range within which a count of the patient's lesions falls. Note that if "Unknown" is sent, the HL7 Flavor of Null UNK value is sent.	PHVS_NumberOfLesions_VZ
Number of lesions if less than 50	Number of lesions if less than 50	
Did the patient receive Varicella-containing vaccine	Indicate whether the patient received varicella-containing vaccine; a value of Yes or No enables other fields in this section, allowing for answers to their questions.	PHVS_YesNoUnknown_CDC
Reason why patient did not receive Varicella-containing vaccine	If the value in Did the patient receive varicella-containing vaccine? is No, choose the reason why the patient did not receive the vaccine; If none of the specific choices in the list apply, choose Other.	PHVS_VaccineNotGivenReasons_CDC
Other reason why patient did not receive Varicella-containing vaccine	If the value specified in Reason why patient did not receive varicella-containing vaccine is Other, indicate the reason (a reason other than those provided in the list).	
Number of doses received on or after first birthday	If the value in Did the patient receive varicella-containing vaccine? is Yes, indicate the number of doses received on or after the patient's first birthday.	
Reason patient is >= 6 years old and received one dose on or after 6th birthday but never received second dose	Reason patient is >= 6 years old and received one dose on or after 6th birthday but never received second dose. Choose from the list the reason the patient never received the second dose; If none of the specific choices in the list apply, choose Other."	PHVS_VaccineNotGivenReasons_CDC
Other reason patient did not receive second dose	If the value specified in Reason patient is >= 6 years old and received one dose on or after 6th birthday but never received second dose is Other, indicate the reason (a reason other than those provided in the list).	
Rash Onset Date	Date on which the physical manifestations of the illness—the rash—appeared	
Rash Location	The distribution of the rash on the body	PHVS_RashDistribution_VZ
Dermatome	If a value of Focal is specified in the Rash Location field, enter the nerve where the rash occurred (lumbar or thoracic, with a number).	
Location First Noted	If a value of Generalized is specified for the Rash Location field, choose location where rash was first noted (if any); If none of the specific choices in the list apply, choose Other.	PHVS_RashLocationFirstNoted_VZ
Other Generalized rash location	If a value of Other is specified in the Location First Noted, enter the location (i.e., the location where the rash was first noted is other than one of the values provided in the Location First Noted list)	
Macules Present	If the value specified in Total Number of Lesions is < 50, indicate whether macules were present.	PHVS_YesNoUnknown_CDC
Number of Macules	If the value specified in Macules Present is Yes, indicate how many macules were present.	
Papules Present	If the value specified in Total Number of Lesions is < 50, indicate whether papules were present.	PHVS_YesNoUnknown_CDC
Number of Papules	If the value specified in Papules Present is Yes, indicate how many papules were present.	
Vesicles Present	If the value specified in Total Number of Lesions is < 50, indicate whether vesicles were present.	PHVS_YesNoUnknown_CDC
Number of Vesicles	If the value specified in Vesicles Present is Yes, indicate how many vesicles were present.	
Mostly macular/papular	Indicate whether the lesions were mostly macular/papular.	PHVS_YesNoUnknown_CDC
Mostly vesicular	Indicate whether the lesions were mostly vesicular.	PHVS_YesNoUnknown_CDC
Hemorrhagic	Indicate whether the rash was hemorrhagic.	PHVS_YesNoUnknown_CDC
Itchy	Indicate whether the patient complained of itchiness.	PHVS_YesNoUnknown_CDC
Scabs	Indicate whether there were scabs.	PHVS_YesNoUnknown_CDC
Crops/Waves	Indicate whether the lesions appeared in crops or waves.	PHVS_YesNoUnknown_CDC
Did rash crust	Indicate whether the rash crusted.	PHVS_YesNoUnknown_CDC
Number of Days until lesions crusted over	If the value specified in Did the rash crust? is Yes, enter the number of days that transpired for all of the lesions to crust over.	
Number of Days rash lasted	If the value specified in Did the rash crust? is No, enter the number of days that the rash was present.	
Fever	Indicate whether the patient had a fever during the course of the illness.	PHVS_YesNoUnknown_CDC
Fever Onset Date	If the value specified in Did patient have fever? is Yes, indicate the date when the fever began.	
Highest measured temperature	If the value specified in Did patient have fever? is Yes, indicate the highest temperature that was measured.	
Temperature Units	Temperature Units (Fahrenheit or Celsius).	PHVS_TemperatureUnit_UCUM
Fever Duration in Days	If the value specified in Did patient have fever? is Yes, indicate the number of days for which the patient had a fever.	
Is patient immunocompromised due to medical condition or treatment	Indicate whether the patient was immunocompromised (anergic).	PHVS_YesNoUnknown_CDC
Medical Condition or Treatment	If Yes, indicate the medical condition or treatment associated with the patient being immunocompromised	
Did patient visit a healthcare provider during this illness	Indicate whether the patient visited a healthcare provider during the course of this illness.	PHVS_YesNoUnknown_CDC
Did patient develop any complications that were diagnosed by a healthcare provider?	If the value specified in Did patient visit a healthcare provider during this illness? is Yes, indicate whether the patient developed complications (as described).	PHVS_YesNoUnknown_CDC
Skin/soft tissue infection	If the value specified in Did patient develop any complications that were diagnosed by a healthcare provider? is Yes, indicate whether there was skin or soft tissue infection.	PHVS_YesNoUnknown_CDC
Cerebellitis/ ataxia	If the value specified in Did patient develop any complications that were diagnosed by a healthcare provider? is Yes, indicate whether there was cerebellitis/ataxia.	PHVS_YesNoUnknown_CDC
Encephalitis	If the value specified in Did patient develop any complications that were diagnosed by a healthcare provider? is Yes, indicate whether there was encephalitis.	PHVS_YesNoUnknown_CDC
Dehydration	If the value specified in Did patient develop any complications that were diagnosed by a healthcare provider? is Yes, indicate whether the patient was diagnosed as being dehydrated.	PHVS_YesNoUnknown_CDC
Hemorrhagic condition	If the value specified in Did patient develop any complications that were diagnosed by a healthcare provider? is Yes, indicate whether there was hemorrhagic condition.	PHVS_YesNoUnknown_CDC
Pneumonia	If the value specified in Did patient develop any complications that were diagnosed by a healthcare provider? is Yes, indicate whether pneumonia was a complication.	PHVS_YesNoUnknown_CDC
How was pneumonia diagnosed	If the value in Pneumonia? is Yes, indicate how the pneumonia was diagnosed.	PHVS_DiagnosedPneumoniaBy_VZ
Other complications	If the value specified in Did patient develop any complications that were diagnosed by a healthcare provider? is Yes, indicate whether there were other complications not cited here.	PHVS_YesNoUnknown_CDC
Other complication details	If the value specified in Other Complications? is Yes, list the other complication(s)	
Antiviral treatment	Indicate whether the patient was treated with acyclovir, famvir, or any licensed antiviral.	PHVS_YesNoUnknown_CDC
Name of medication	If the value specified in Antiviral? is yes, list the name of the medication.	PHVS_MedicationReceived _VZ
Name of the Medication if 'Other'	If Name of Medication is 'other', indicate name of medication	
Start Date of Medication	Start date of medication.	
Stop Date of medication	Stop date of medication.	
Autopsy performed	If a value of Yes is specified in Did the patient die from this illness or complications associated with this illness?, indicate whether an autopsy was performed for the death.	PHVS_YesNoUnknown_CDC
Cause of death	If a value of Yes is specified in Did the patient die from this illness or complications associated with this illness?, indicate the official cause of death.	
Diagnosed with Varicella before	Indicate whether the patient has a prior diagnosis of varicella.	PHVS_YesNoUnknown_CDC
Age at diagnosis	Age at diagnosis	
Age at diagnosis units	Age at diagnosis units	PHVS_AgeUnit_UCUM
Previous Case Diagnosed by	Indicate who diagnosed the illness; If none of the choices apply choose Other.	PHVS_Diagnosed_By_VZ
Previous Case Diagnosed by Other	If the value specified in Previous Case Diagnosed by is Other, indicate who diagnosed the case	
Is this case epi-linked to another confirmed or probable case	Indicate whether this case is epi-linked to another case (confirmed or probable).	PHVS_YesNoUnknown_CDC
Type of case this case is epi-linked to	If the value specified in Is this case epi-linked to another confirmed or probable case? is Yes, indicate the kind of case with which the current case is epi-linked.	PHVS_EpiLinkedCaseType_VZ
Transmission setting (setting of exposure)	Location where the patient was exposed to the illness; If none of the specific choices in the list apply, choose Other.	PHVS_TransmissionSettting_NND
Other transmission setting	If the value specified in Transmission Setting? is Other, describe the other transmission setting.	
Is this case a healthcare worker	Indicate whether the patient who is the subject of the current case is a healthcare worker.	PHVS_YesNoUnknown_CDC
Number of weeks gestation	If the patient was pregnant during the illness, indicate the number of weeks of gestation at the onset of the illness.	
Trimester	If the patient was pregnant during the illness, indicate the trimester at the onset of the illness.	PHVS_PregnancyTrimester_CDC
Was laboratory testing done for varicella?	Was laboratory testing done for varicella?	PHVS_YesNoUnknown_CDC
Direct fluorescent antibody (DFA)?	Was direct fluorescent antibody (DFA) testing performed?	PHVS_YesNoUnknown_CDC
Date of DFA	Date of DFA	
DFA Result	DFA Result	PHVS_LabTestInterpretation_CDC
PCR specimen?	PCR specimen?	PHVS_YesNoUnknown_CDC
Date of PCR specimen	Date of PCR specimen	
Source of PCR specimen	Source of PCR specimen	PHVS_PCRSpecimenSource_VZ
Specify other PCR source	Specify other PCR source	
PCR Result	PCR Result	PHVS_LabTestInterpretation_CDC
Specify other PCR result	Specify other PCR result	
Culture performed?	Culture performed?	PHVS_YesNoUnknown_CDC
Date of Culture Specimen	Date of Culture Specimen	
Culture Result	Culture Result	PHVS_LabTestInterpretation_CDC
Was other laboratory testing done?	Was other laboratory testing done?	PHVS_YesNoUnknown_CDC
Specify Other Test	Specify Other Test	PHVS_LabTestMethod_VZ
Date of Other test	Date of Other test	
Other Lab Test Result	Other Lab Test Result	PHVS_LabTestInterpretation_CDC
Other Test Result Value	Other Test Result Value	
Serology performed?	Serology performed?	PHVS_YesNoUnknown_CDC
IgM performed?	IgM performed?	PHVS_YesNoUnknown_CDC
Type of IgM Test	Type of IgM Test	PHVS_IgMTestType_VZ
Specify Other IgM Test	Specify Other IgM Test	
Date IgM Specimen Taken	Date IgM Specimen Taken	
IgM Test Result	IgM Test Result	PHVS_LabTestInterpretation_CDC
IgM Test Result Value	IgM Test Result Value	
IgG performed?	IgG performed?	PHVS_YesNoUnknown_CDC
Type of IgG Test	Type of IgG Test	PHVS_IgGTestType_VZ
If "Whole Cell ELISA," specify manufacturer	If "Whole Cell ELISA," specify manufacturer	PHVS_WholeCellELISAManufacturer_VZ
If "gp ELISA" specify manufacturer	If "gp ELISA" specify manufacturer	PHVS_gpELISAManufacturer_VZ
Specify Other IgG Test	Specify Other IgG Test	
Date of IgG - Acute	Date of IgG - Acute	
IgG - Acute Result	IgG - Acute Result	PHVS_LabTestInterpretation_CDC
IgG - Acute Test Result Value	IgG - Acute Test Result Value	
Date of IgG - Convalescent	Date of IgG - Convalescent	
IgG - Convalescent Result	IgG - Convalescent Result	PHVS_LabTestInterpretation_CDC
IgG - Convalescent Test Result Value	IgG - Convalescent Test Result Value	
Were the specimens sent to the CDC for genotyping (molecular typing)?	Were the specimens sent to the CDC for genotyping (molecular typing)?	PHVS_YesNoUnknown_CDC
Date sent for genotyping	Date sent for genotyping	
Was specimen sent for strain (wild- or vaccine-type) identification?	Was specimen sent for strain (wild- or vaccine-type) identification?	PHVS_YesNoUnknown_CDC
Strain Type	Strain Type	PHVS_StrainType_VZ
Vaccine Administered	The type of vaccine administered.	PHVS_VaccinesAdministeredCVX_CDC_NIP
Vaccine Manufacturer	Manufacturer of the vaccine.	PHVS_ManufacturersOfVaccinesMVX_CDC_NIP
Vaccine Lot Number	The vaccine lot number of the vaccine administered.	
Vaccine Administered Date	The date that the vaccine was administered.	
Case Investigation Status Code	Case Investigation Status Code, from NBS MM	
Vaccinated per ACIP recommendations	Was subject vaccinated as recommended by ACIP?	
Reason not vaccinated per ACIP recommendations	Reason subject not vaccinated as recommended by ACIP	
Reason not vaccinated per ACIP, Other	If other, specify reason not vaccinated per ACIP	
Treatment duration	Number of days antiviral taken	
Specimen Description	Text description of the specimen	
Test Type, other	If other, specify lab test	
Specimen sent to CDC	Was a specimen sent to CDC for testing?	
Type of testing at CDC	What type of testing was done at CDC for this subject?	
Type of testing at CDC, other	If other, specify testing done at CDC	
Date specimen sent to CDC	Date specimen sent to CDC	
Patient Address City	Patient address city, from NBS MM	
Vaccine Administered Product Type, Other	If other, specify type of vaccine administered	
Vaccine Product Manufacturer, Other	If other, specify vaccine manufacturer	
Date of last dose prior to illness onset	Date of last disease-containing vaccination dose prior to illness onset	
Vaccination doses prior to onset	Number of disease-containing vaccination doses prior to illness onset	
Vaccination Record ID	Vaccination Record ID, from NBS MM	
Vaccine Expiration Date	Vaccine expiration date	
NDC Brand Name/Bar Code Information	NDC from the vaccine's bar code. With the NDC code, vaccine brand name and manufacturer can be obtained.	
Vaccine dose number	Indicates the dose number in a series	
Vaccine Event Information source	Indicates whether the vaccine was administered by the provider organization recording the immunization or obtained from a historical record	
Immunization Schedule used	Identifies the schedule used for immunization evaluation and forecast.	
Exemption/refusal reason	Indicates the reason the patient is either exempt from the immunization or refuses the immunization	
Laboratory Confirmed	Was the case laboratory confirmed?	
Performing Laboratory Type	Performing laboratory type	
Performing Laboratory Type, Other	If other, specify performing laboratory type	
VPD Lab Message Patient Identifier	VPD Lab Message Patient Identifier	
VPD Lab Message Observation Identifier	VPD Lab Message Observation Identifier	
VPD Lab Message Observation Value	VPD Lab Message Observation Value	
Specimen Collection Date	Date of specimen collection	
Specimen Source	The medium from which the specimen originated	
Numeric Test Result	Numeric quantitative result of the test(s) performed for this case	
Numeric Test Result Units	Numeric quantitative result unit of the test(s) performed for this case	
Chest X-ray result	Chest X-ray result	
Was the rash generalized	Was the rash generalized	
Reason for Hospitalization	If the subject was hospitalized because of this event, indicate the reason(s).

If previously treated with Antibiotics, specifiy
If previously treated with chemotherapy, specifiy

If previously treated with immunosuppressants, specifiy
If previously treated with radiotherapy, specifiy
If previously treated with steroids, specifiy
If treated with ulcer meds, specifiy
Date specimen collected
Species
If other source, specify site from which Vibrio was isolated
Was Species confirmed at State PH Lab?
Specimen source
Other organism isolated from specimen?
Specify other organism isolated
Seafood Investigation: Maximum ambient temp units - F or C
Seafood Investigation: Amount of shellfish consumed
Seafood Investigation: Shellfish consumed in am or pm
Seafood investigation: Date ambient temp measured
Seafood Investigation: Date of fecal count
Seafood Investigation: Date water temp measured
Seafood Investigation: Date of harvest #1
Seafood Investigation: Date of harvest #2
Seafood Investigation: Date total rain fall recorded
Seafood Investigation: Date salinity measured
Seafood Investigation: Date restaurant rec'd seafood
Seafood Investigation: Fecal Coliform Count
Seafood Investigation: Results of Salinity test
Seafood Investigation: Harvest Site #1
Seafood Investigation: Harvest Site #2
Seafood Investigation: Status of Harvest Site #1
Seafood Investigation: Status of Harvest Site #2
Seafood Investigation: Specify if Status for Harvest Site #1 = other
Seafood Investigation: Specify if Status for Harvest Site #2 = other
Seafood Investigation: Hour of seafood consumption
Seafood Investigtaion: Improper Storage?
Seafood Investigation: Maximum ambient temp
Seafood Investigation: Minute of seafood consumption
Seafood Investigation: Total rainfall in Inches
Seafood Investigation: Investigation of Restaurant?
Seafood Investigation: Specify how shellfish distributed
Seafood Investigation: How is shellfish distributed?
Seafood Investigation: Was shellfish harvested by patient or friend?
Seafood Investigation: Was seafood imported?
Seafood Investigation: Specify country of Import
Seafood Investigation: where was seafood obtained?
Seafood Investigation: Specify from where seafood was obtained
Seafood Investigation: How was seafood prepared?
Seafood Investigation: Specify how seafood was prepared (if other)
Seafood Investigation: Surface water temperature
Surface water temp units in F or C?
Sources of seafood

Shippers who handled suspected seafood (certification numbers)
Seafood investigation: Are tags available from suspect lot?
Seafood investigation: Type of shellfish consumed
State in which seafood was harvested
Region in which seafood was harvested
Cholera, reason for travel: specify if other
Seafood Investigation: Exposure to seawater in am or pm
Exposure: handing/cleaning seafood
Exposure: Swimming/diving/wading
Exposure: Walking on beach/shore/fell on rocks/shells
Exposure: Boating/skiing/surfing
Exposure: Construction/repairs
Exposure: Bitten/stung
Exposure: Contact with other marine/freshwater life
Exposure: Exposure to a body of water
Exposure to water via construction
Exposure: Date of exposure to seawater
Date traveled/entered destination #1
Date traveled/entered destination #2
Date traveled/entered destination #3
Date left/returned home #1
Date left/returned home #2
Date left/returned home #3
Type of fish
Exposure: Comments on water exposure
Exposure: Type of water exposure
Exposure: Hour of seawater exposure
Exposure: location of water exposure
Exposure: Minute of seawater exposure
Exposure: Other exposure
Exposure: Exposed to other water not listed?
Specify other shellfish consumed
Is case part of outbreak?
If part of an outbreak, Specify outbreak
Consumption: clams
Consumption: crab
Consumption: lobster
Consumption: mussels
Consumption: oysters
Consumption: shrimp
Consumption: crawfish
Consumption: other shellfish
Consumption: other fish
Raw consumption: clams
Raw consumption: crab
Raw consumption: lobster
Raw consumption: muss
Raw consumption: oyster

Raw consumption: shrimp
Raw consumption: crawfish
Raw consumption: other shellfish
Raw consumption: other fish
Date of seafood consumption: clams
Date of seafood consumption: crab
Date of seafood consumption: lobster
Date of seafood consumption: mussels
Date of seafood consumption: oysters
Date of seafood consumption: shrimp
Date of seafood consumption: crawfish
Date of seafood consumption: other shellfish
Date of seafood consumption: other fish
Specify other seawater/shellfish dripping exposure (if other)
State of residence
Exposure to travel outside home state in previous 7 days?
Travel destination #1
Travel destination #2
Travel destination #3
Did patient incur a wound before/during exposure?
If patient incurred wound before/during exposure, describe wound
Was Vibrio confirmed by culture?
Was there a positive CIDT result?
Name of species identified by CIDT
Name of CIDT test used if applicable
Did dining partners consume same seafood?

Did dining partners who consumed the same seafood become ill?
Was your exposure related to your occupation?
If the epidemiologic exposure window used by the jurisdiction is different from that stated in the exposure questions, specify the time interval in days here. Otherwise, leave blank.
State lab ID submitted to PulseNet
Whole Genome Sequencing (WGS) ID Number
