

RFS2 Renewable Fuel Producers – Cellulosic Converted Fraction (Report Form ID: RFS1700): Instructions for Completing

Who must report

- Producers must report if they generated D code 3 or 7 RINs for cellulosic biofuel—other than biogas-derived renewable fuel or RNG—that was produced from the simultaneous conversion of two or more feedstocks, where at least one feedstock had less than 75% average adjusted cellulosic content and using a process other than a thermochemical process.

Reporting requirements

- 40 CFR [80.1451\(b\)\(1\)\(ii\)\(U\)](#) sets forth the reporting requirements for this form.
- Producers must calculate this information on an annual basis or within 10 business days of generating every 500,000 gallons of cellulosic biofuel, whichever is more frequent, and report quarterly each calculation conducted during that quarter as a separate line.
- If a new calculation was not completed during a quarter, producers must report the most recent calculation conducted.
If a report field does not apply, enter the value “NA”. **Do NOT leave any field blank.**
- The feedstock energy value must be calculated according to the formula in 40 CFR 80.1426(f)(3)(vi)(B).

Reporting deadlines

- Producers must report on a quarterly basis as follows:

Calendar Quarter	Time Period Covered	Quarterly Report Deadline
Quarter 1	January 1 – March 31	June 1
Quarter 2	April 1 – June 30	September 1
Quarter 3	July 1 – September 30	December 1
Quarter 4	October 1 – December 31	March 31
