What is your specialty?	Open Ended (format)
How familiar are you with shared care planning?	Likert

**Discussion Questions/Topics**

1. How do you currently approach care planning for your adult patients with MCC?
2. How might the use of this app change your approach to care planning for your adult patients with MCC?
3. What data might be missing from the clinician-facing app?
4. How might the data be presented or organized to be more helpful to you, the clinician?
5. What summary information would be most helpful to you on the landing page of the app? How do you like that information to be presented (e.g., graphs, charts, level of granularity, etc.)?

6. What information would you want to see from clinicians outside of OHSU who provide care to your MCC patient? How could it be displayed to be most useful?
7. Thinking about how you might want to improve care planning or shared decision-making with your MCC patients and their caregivers: what data would you prioritize and when (and how)?
8. What data/information would be most useful for informing clinical action/follow-up? What data/information can drive action? New data? Conflicting data? Other?
9. What changes would bring the clinician-facing app more into alignment with your clinical workflow?
10. What should the incorporation of patient reported information (including goals) look like to be most useful? What do you perceive as the value of seeing such data at the point of care?
11. Would you expect any changes in how your patients/caregivers approach appointments because of the patient app?
12. How might the availability of information from multiple sources contribute to a more efficient and/or effective shared care planning conversation?
13. Taking a moment to reflect on our discussion so far, do you have any other thoughts about how the MyCarePlanner app(s) might impact on your ability to develop and use shared care plans with your patients with/at risk of MCC

N= ~20 clinicians from practices where patients are recruited to include specialties in primary care, gerontology, nephrology, and related clinical areas and health IT staff from the respective sites
