Notification of construction/ reconstruction ^f	2	1	2
Notification and demonstration of CMS ^g	40	1	40
Notification of actual startup	2	1	2
Notification of initial performance test	2	1	2
Report of performance test	See 3B		
Notification of physical or operational change ^h	2	1	2
Semiannual reports	24	2	48
Subtotal for Reporting Requirements			
4. Recordkeeping requirements			
A. Familiarize with the regulatory requirements	See 3A		
B. Plan activities	See 3B		
C. Implement activities	See 3B		
D. Develop record system	N/A		
E. Time to enter information			
Records of daily production rate and hours of operation ⁱ	0.13	250	32.5
Records of operating parameters of CMS ^j	0.25	250	62.5
Records of startup, shutdown, and malfunctions ^k	60	1	60
F. Train personnel	N/A		
G. Audits	N/A		
Subtotal for Recordkeeping Requirements			
Total Labor Burden and Costs (rounded) ⁱ			
Total Capital and O&M Cost (rounded) ⁱ			
GRAND TOTAL (rounded) ⁱ			

Assumptions:

^a We have assumed that the average number of respondents that are subject to the regulation will be 144, with two sou

^b This ICR uses the following labor rates: \$163.17 (\$77.70 + 110%) per hour for Executive, Administrative, and Manufacturing labor; and \$31.29 (\$14.92 + 110%) per hour for Clerical labor. These rates are from the United States Department of Labor, Bureau of Labor Statistics, "Current Compensation Survey, 2010." The rates are from column 1, "Total compensation." The rates have been increased by 110 percent to account for the cost of employing workers beyond their wages and benefits, including business expenses associated with hiring, training, and other costs.

^c We have assumed that all existing respondents will have to familiarize with the regulatory requirements each year.

^d We have assumed that it will take 72 hours for each respondent to perform the initial performance test.

^e We have assumed that 20 percent of respondents will fail the performance test and will have to repeat it.

^f We have assumed that each respondent will take two hours to write the notification of construction/reconstruction request.

^g We have assumed that each respondent will take 40 hours to write the notification and demonstration of CMS report.

^h We have assumed that each respondent will take 2 hours to write the notification of physical or operational change.

ⁱ We have assumed that each respondent will enter information of daily production rate and hours of operation 250 times per year.

^j We have assumed that each respondent will take 15 minutes 250 times per year to record the operating parameters of the equipment.

^k We have assumed that each respondent will take 60 hours to record startup, shutdown, and malfunction information.

^l Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.

TOTAL (rounded) ^h				

Assumptions:

^a We have assumed that the average number of respondents will be 144 with two sources undergoing reconstruction.

^b This cost is based on the average hourly labor rate as follows: Managerial \$73.46 (GS-13, Step 5, \$45.91 + 60%); Technical \$29.50 (GS-6, Step 3, \$18.44 + 60%). This ICR assumes that Managerial hours are 5 percent of Technical hours, and are from the Office of Personnel Management (OPM), 2023 General Schedule, which excludes locality, rates of pay, benefit packages available to government employees.

^c We have assumed that it will take the agency 24 hours to review performance tests.

^d We have assumed that 20 percent of respondents will fail the performance test and will have to repeat it.

^e We have assumed that it will take the agency two hours one-time per year to review notification of construction/reconstruction.

^f We have assumed that it will take the agency two hours one-time per year to review notification of physical/operational changes.

^g We have assumed that it will take the agency eight hours one-time per year to review the performance test results.

^h Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.
