## Introduction

Welcome to the Questionnaire about the Family Input Resources!

This questionnaire is part of a study sponsored by the Office of Planning, Research, and Evaluation (OPRE) in the Administration for Children and Families at the U.S. Department of Health and Human Services (HHS). The goals of this study are to (1) understand how TANF, child support, and other human services programs gather and use input from the families they have served, currently serve, or could serve for program improvement; (2) identify ways for TANF and child support programs to incorporate family input for program improvement; and (3) identify the successes and challenges these programs face in gathering and using family input.

This questionnaire is not part of any HHS monitoring or auditing activities. All individual responses will be kept private. The results of the questionnaire will be used for research purposes only.

It will take approximately 15 minutes to respond to this questionnaire; this includes the time it will take to read instructions, gather resources, and search existing data sources, as needed. We will ask you to complete this questionnaire monthly during the pilot testing period.

Your participation in this questionnaire is voluntary. Please feel to skip any question or stop the questionnaire at any time. You can skip a question by scrolling past it without selecting an answer. You can submit your questionnaire early by using the next arrow to skip sections and hitting "submit."

Please note that a high level of response to this questionnaire is critical for the study. Our findings will help improve the Family Input Resources and make it easier for families to have a voice in program improvement efforts in TANF and child support programs across the country.

We will incorporate findings from this study into public documents, based on information collected through this questionnaire and other data collection activities. In these documents, we may identify your program as a contributor to the study, but we will not include the names of individual respondents in any reporting. Personally identifiable information will not be used to retrieve survey records or data and will not be disclosed publicly.

If you consent to participate in this questionnaire, please click 'next' to begin.
