

Non-Power Production or Utilization Facility License Renewal Final Rule - Part 50 Burden Tables

Table 1 One-Time Recordkeeping

Section	Type of Change	Number of Recordkeepers	Burden Hours per Recordkeeper	Total Burden Hours	Total Cost at \$317/hr	Notes
50.71(e) - NPUFs Reviewing and updating procedures	New	11	8	88	\$27,896	This provision results in an increase in recordkeeping. The number of recordkeepers has been annualized over the 3 year period.
Table 1 Total				88	\$27,896	

Non-Power Production or Utilization Facility License Renewal Final Rule - Part 50 Burden Tables

Table 2 Annual Recordkeeping						
Section	Type of Change	Number of Recordkeepers	Burden Hours per Recordkeeper	Total Burden Hours	Total Cost at \$317/hr	Notes
50.71(e) - NPUFs Preparing updated FSAR (<100 kW)	New	0	110	0	\$0	There is an increase in recordkeeping burden imposed by this provision. However, because no licensees are expected to trigger these requirements during the 3-year period covered by this supporting statement, there is no change to the information collection burden.
50.71(e) - NPUFs Preparing updated FSAR (>=100 kW, but <2,000 kW)	New	4	165	660	\$209,220	This provision results in an increase in recordkeeping. The number of recordkeepers has been annualized over the 3 year period and rounded.
50.71(e) - NPUFs Preparing updated FSAR (>2,000 kW)	New	1	275	275	\$87,175	This provision results in an increase in recordkeeping. The number of recordkeepers has been annualized over the 3 year period and rounded.

Table 3 Annual Reporting

Section	Type of Change	Number of Respondents	Responses per Respondent	Total Responses	Burden Hours per Response	Total Burden Hours	Total Cost at \$317/hr	Notes
50.33 Non-power production license application	Change in Respondents	0	1	0	-2700	0	\$0	There is a reduction in reporting burden imposed by this provision due to the elimination of license terms for NPUFs in Section 50.51(c). However, because no licensees are expected to trigger these information collection requirements during the 3-year period covered by this supporting statement, there is no change to the information collection burden.
50.33(f) Eliminate license renewal application financial information requirement	Change in Respondents	0	1	0	-3,850	0	\$0	There is a reduction in reporting burden imposed by this provision. However, because no licensees are expected to trigger these information collection requirements during the 3-year period covered by this supporting statement, there is no change to the information collection burden.
50.59(b) Extend applicability of Section 50.59 to certain NPUFs	Change in Respondents	0	1	0	313	0	\$0	There is an increase in reporting burden imposed by this provision. However, because no licensees are expected to trigger these information collection requirements during the 3-year period covered by this supporting statement, there is no change to the information collection burden.
50.71(e) Preparing updated FSAR (<100 kW)	New	0	1	0	7	0	\$0	There is an increase in reporting burden imposed by this provision. However, because no licensees are expected to trigger these information collection requirements during the 3-year period covered by this supporting statement, there is no change to the information collection burden.
50.71(e) Preparing updated FSAR (>=100 kW, but <2,000 kW)	New	4	1	4	10	40	\$12,680	This provision results in an increase in reporting. The number of respondents has been annualized over the 3-year period and rounded.
50.71(e)	New	1	1	1	12	12	\$4,121	This provision results in an increase in reporting. The number of respondents has been annualized over the 3-

Preparing updated FSAR (>2,000 kW)	new	1	1	1	13	13	\$4,121	number of respondents has been annualized over the 3-year period and rounded.
50.75 Decommissioning planning	Change in Respondents	0	1	0	5	0	\$0	There is an increase in reporting burden imposed by this provision. However, because no licensees are expected to trigger these information collection requirements during the 3-year period covered by this supporting statement, there is no change to the information collection burden.
50.82 Termination of license	Change in Respondents	0	1	0	680	0	\$0	There is an increase in reporting burden imposed by this provision. However, because no licensees are expected to trigger these information collection requirements during the 3-year period covered by this supporting statement, there is no change to the information collection burden.
50.90 License amendments	Change in Respondents	0	1	0	-313	0	\$0	This is a corresponding reduction for NPUFs due to Section 50.59(b). However, because no licensees are expected to trigger these information collection requirements during the 3-year period covered by this supporting statement, there is no change to the information collection burden.
50.135 Define a license renewal process specific to NPUFs and testing facilities	New	0	1	0	2700	0	\$0	This is a corresponding increase due to Section 50.33. However, because no licensees are expected to trigger these information collection requirements during the 3-year period covered by this supporting statement, there is no change to the information collection burden.
