**Test Facility 87**  
**Subpart G: Ammonia Manufacturing (2024)**  
Subpart Overview

**OVERVIEW OF SUBPART REPORTING REQUIREMENTS**  
Subpart G requires affected facilities to report carbon dioxide (CO<sub>2</sub>) process emissions from each ammonia manufacturing process unit. First, use this page to identify each ammonia manufacturing process unit and then enter greenhouse gas (GHG) data required by Subpart G for each ammonia manufacturing process unit and for your facility. You must also report the annual urea production and annual ammonia production for your facility. If there are any ammonia manufacturing process units monitored by CEMS, please enter those separately in the second UNIT SUMMARY section. For additional information about Subpart G reporting, please use the e-GGRT Help link(s) provided.

This links the page where we have the ICR statements listed for the information collected in the e-GGRT system:

Reporters that elect to prepare their annual reports in XML instead of using the e-GGRT webforms, need to submit their XML files through the e-GGRT system. So these XML reporters would log into the e-GGRT system, upload their XML files, and proceed through the submission screens, all of which would include the link to the Paperwork Reduction Act Statement on every page.
