

NIFA Reporting System: Add/Edit Project/Program Initiation

Classifications: Knowledge Area Dropdown Option Revision

As proposed, KA 132 will be updated from "Weather and Climate" to "Short Term and Decadal Weather" as pictured in the mockup below.

The mockup shows the 'Classifications' section with four fields: Knowledge Area, Subject of Investigation, Field of Science, and Percent. The Knowledge Area dropdown is open, showing '132' in the input field and a list of options including '132 - Short Term and Decadal Weather'. The Subject of Investigation and Field of Science dropdowns are currently set to 'Select...'. The Percent field is set to '0 %' with a note 'Must total 100%' below it.

Classifications: Subject of Investigation Dropdown Option Revision

As proposed, SOI 430 will be updated from "Climate" to "Decadal Weather Patterns" as pictured in the mockup below.

The mockup shows the 'Classifications' section with four fields: Knowledge Area, Subject of Investigation, Field of Science, and Percent. The Subject of Investigation dropdown is open, showing '430' in the input field and a list of options including '430 - Decadal Weather Patterns'. The Knowledge Area dropdown is set to 'Select...'. The Field of Science dropdown is set to 'Select...'. The Percent field is set to '0 %' with a note 'Must total 100%' below it. There is also an 'Add Classification Row' button and an 'Assurances' section with a radio button for 'Are Human Subjects Involved?'.

Classifications: Field of Science Dropdown Option Revision

As proposed, FOS 2070 will be updated from "Meteorology and Climatology" to "Meteorology" as pictured in the mockup below.
