Regarding OMB No. 0915-0193—Revision

While these measures are a reflection of good practice, several new UDS measures (and UDS+) have been added to CHCs in the past few years. However, CHCs haven't received a significant increase to base funding during that same time. These unfunded mandates make it difficult to meet these measures in a statistically significant or meaningful way. Our annual reporting burden is already so high that our small practice needs a full-time informaticist, but our budget and revenue model (fee for service) cannot support it.

Subject: Public Comment Period Open: Proposed 2025 UDS Changes

HRSA invites your review of proposed changes to the Uniform Data System (UDS) instrument beginning with the 2025 performance year, through a Federal Register Notice (FRN). The FRN is open for public comment until January 21, 2025. To review the FRN and submit your comments, visit: <https://www.federalregister.gov/d/2024-27394>.
