For Attachment B, is there the ability to enter comments if "other" is selected as an answer? We suggest having this ability to provide information/clarification to support that selection.

In addition, for Attachment B, some of the questions use "absolute" language, which may make it challenging to answer for plans as there may be exceptions, it may depend, etc. For example, question #5 has "after all," "after any," and "after every," in the list of responses. We suggest reviewing the questions and responses and removing "absolute" language if possible.
