

Greetings,

Prior to the [03/31/2026] performance measure reporting deadline for Epidemiology and Laboratory Capacity (ELC) CK-24-0002, we are publishing the following performance measures **reporting guidance and reporting tools**:

- ELC Performance Measures Detail Guide
- ELC CAMP Performance Measures Module (screenshots)

CDC communicates with HHS and other federal interest holders about the progress made under ELC. We ask all recipients to enter data using the web-based Salesforce ELC CAMP platform. No personally identifiable or sensitive information is included in these measures and reported data are stored and secured in the ELC CAMP system. We estimate each recipient will spend around 32 hours annually on performance measures reporting. This estimate includes time to aggregate data from internal partners and uploading/entering data into ELC CAMP.

The PM Technical Guidance document provides you with resources to support you as you prepare for this reporting cycle. Additionally, please reach out to elcevaluation@cdc.gov with questions.

Sincerely,

ELC Evaluation and Modeling Team
