**INSTRUCTIONS**

**PALEONTOLOGY LOCALITY RECORD**

**General:** This form is used to document a locality or multiple localities. This form can be used by bureau employees, permittees, and contractors.

- 1. Locality number.** This number is assigned by the bureau and is used to manage all reported sites or localities.
- 2. Field number.** Other numbers assigned to the site. These are normally assigned by the field party when first recording the locality.
- 3. Common name for locality.** This is the name given to paleontological localities for common reference (such as Eolambia 2, etc.).
- 4. Land owner.** Indicate the managing bureau office and administrative unit. Identify the applicable governmental entities (state, federal, etc.).
- 5. Location** (Lat/Long or UTM). Preferred format is Latitude/Longitude, NAD83. Include coordinate source and positional accuracy.
- 6. USGS map reference.** If reporting in PLSS (Public Land Survey System) provide Township, Range, Section, and mark the boundary on the map.
- 7. County.** Identify the County in which the locality is found.
- 8. State.** Identify the State in which the locality is found.
- 9. Access.** Provide specific instructions for accessing the locality as appropriate.
- 10. Geologic age.** Include the International Commission on Stratigraphy (ICS) age, or the North American Land Mammal Age (NALMA).
- 11. Geologic unit.** Identify the rock unit if known (formation, member, etc.).
- 12. Paleontological resource categories.** Check all categories that are observed at the locality (including vertebrate fossil, invertebrate fossil, trace fossil non-vertebrate, trace fossil plant)
- 13. Taxa observed.** Identify taxa (family, genus, species, etc.) and elements (humerus, femur, skull fragment, etc.) that are observed.
- 14. Collection and repository.** Identify what was collected and the name of the approved repository where it will be preserved. If not taken directly to the repository identify their interim location (museum, laboratory, office, classroom, evidence locker, tent, etc.).
- 15. Scientific description.** Characterize the locality's geology, lithology, soils, geomorphology, and mineralogy, as appropriate. Describe the paleontological resource materials were observed, and depth of observed deposits. Indicate approximate quantities of paleontological resources they are found in context (in situ) or are eroded across the surface (float). Include relevant observations or scholarly information.
- 16. Associated records.** Identify what associated records were created during the visit, including reference to field notes, photographs, etc.
- 17. General remarks.** Include information or append records that are important to understanding the resource that are not covered by this form. Include project name, number, and client; possible management issues; if this is an update to another record, or other contextual information.
- 18a. Investigator/Collector.** The name(s) of the person(s) who completed the form.
- 18b. Date visited.** Date the locality was visited and recorded.
- 19. Locality condition.** Identify whether the locality is stable and what human caused or natural factors are putting it at risk. Note any damage. Include observations of erosional conditions.
- 20. Permit number.** Indicate the permit number as appropriate.
