

NONSUBSTANTIVE CHANGE REQUEST
FOR
NRC FORM 748, "NATIONAL SOURCE TRACKING TRANSACTION REPORT"
3150-0202

The NRC Form 748, used by U.S. Nuclear Regulatory Commission (NRC) and Agreement State licensees, serves as an alternate reporting method for information concerning the manufacture, transfer, receipt, and disposal of nationally tracked sources. To strengthen the security and integrity of data submitted over the web by users of the PDF version, the NRC requests a nonsubstantive change to introduce online versions of the some of the variations of the form.

The online versions of Form 748B (Transfer Source), 748C (Receive Source), 748D (Dispose Source), 748E (New Source Manufactured), 748F (Import Source), and 748G (Export Source) replicate the PDF versions, with unchanged fields. In an effort to enhance data integrity, the fields for the Source Make and Source Model in each version are now interlinked and prepopulated with accurate data formats. Licensees can effortlessly select the source make and corresponding source model from convenient dropdown menus, significantly reducing errors that might otherwise necessitate additional processing by the NRC.

This change is not anticipated to affect the burden for the form. Attached are screenshots of the online variations of the Form 748 design (i.e., 748B, 748C, 748D, 748E, 748F, and 748G) and the user-friendly Source Make and Source Model dropdown menus.
